[18번 어법 선택]

① Dear Dog Owners,
 ② My name is Lily Paxton, and I'm the town's Pet Program Coordinator. ③ As part of our goal to make the community more dog-friendly, we recently opened a new dog park. ④ The park was **[designing / designed]**¹⁾ to provide an enjoyable experience for both dogs and owners. ⑤ There **[are / is]**²⁾ big grassy areas **[where / which]**³⁾ your dogs can run, jump, and play. ⑥ We have separate spaces for small dogs and big dogs, to ensure safety. ⑦ You'll also find lots of benches and areas for resting and **[stay / staying]**⁴⁾ cool. ⑧ We hope you will have a wonderful time with your dogs in this newly opened park.
 ⑨ Regards,
 Lily Paxton, Pet Program Coordinator

[19번 어법 선택]

① Maya waited in line to check in for her flight. ② Her expectations about her European backpacking trip **[was / were]**¹⁾ really high. ③ She had been **[looking / looked]**²⁾ forward to the trip for a year. ④ She couldn't wait to visit museums in Madrid and see the Eiffel Tower at night in Paris. ⑤ As she stood in line, she could feel those experiences **[was / were]**³⁾ finally so close. ⑥ When she **[approached / approached to]**⁴⁾ the counter, the airline employee asked **[to see / seeing]**⁵⁾ her passport. ⑦ Maya **[reached / reached into]**⁶⁾ her pocket but felt nothing. ⑧ She realized she **[has left / had left]**⁷⁾ her passport at home. ⑨ Her plans were ruined. ⑩ She was heartbroken, **[knowing / known]**⁸⁾ she could not board the flight and had to delay her dream trip.

[20번 어법 선택]

① People often ask me, "What surprises you most about habits?" ② One thing that continually astonishes me is the degree **[which / to which]**¹⁾ we're influenced by sheer convenience. ③ The amount of effort, time, or decision making **[requiring / required]**²⁾ by an action has a huge influence on habit formation. ④ To a truly remarkable extent, we're more likely to do something if it's convenient, and less likely if it's not. ⑤ For this reason, we should pay close attention to the convenience of any activity we want to make into a habit. ⑥ Putting a wastebasket next to our front door **[making / made]**³⁾ mail sorting slightly more **[convenient / conveniently]**⁴⁾, and I stopped **[to procrastinate / procrastinating]**⁵⁾ with this chore. ⑦ Many people report that they do a **[much / very]**⁶⁾ better job of staying close to distant family members ★now that tools like group chats make it **[easy / easily]**⁷⁾ to stay in touch.

[21번 어법 선택]

① It is common sense that people's inner beliefs may drive their external behavior. ② If you're **[attracting / attracted]**¹⁾ to a certain person, you should be more likely to socialize with that person. ③ If you favor a brand of toothpaste, you're more likely to buy it. ④ Of course, our internal thoughts don't *always* predict our public behavior, but, overall, **[that / what]**²⁾ we do obviously reflects what we think. ⑤ But beliefs and behaviors are also related in a more remarkable way. ⑥ It turns out that the arrow is as likely to point in the reverse direction. ⑦ As social psychologist David Myers observes, "If social psychology has taught us anything **[during / while]**³⁾ the last 25 years, it is that we are likely not only to think **[ourselves / us]**⁴⁾ into a way of acting but also to act **[ourselves / us]**⁵⁾ into a way of thinking."

[22번 어법 선택]

① Imagine **[to follow / following]**¹⁾ the spirit of a silence vow into daily life. ② Challenge **[you / yourself]**²⁾ to spend an entire day **[say / saying]**³⁾ only what you absolutely must say. ③ It's been widely observed by behavioral psychology experts — and anyone who's ever been on a first date — that we too often tend **[to treat / treating]**⁴⁾ "conversation" as a game of waiting for our own turn to speak. ④ We miss what's **[saying / being said]**⁵⁾ because we're mentally rehearsing our next utterance. ⑤ What if you could eliminate the idea **[that / which]**⁶⁾ the next available mini-silence is your next opening to express **[however / whatever]**⁷⁾ is in your head? ⑥ What if you were limited to, say, fifty spoken words tomorrow? ⑦ I think you'd listen quite **[different / differently]**⁸⁾. ⑧ You'd attend quite carefully to every word you heard. ⑨ You'd be **[attuning / attuned]**⁹⁾ to what you must respond to. ⑩ You might discover that the **[less / least]**¹⁰⁾ you say, the **[more / most]**¹¹⁾ you hear.

[23번 어법 선택]

① Science is concerned with accumulating and **[understands / understanding]**¹⁾ observations of the physical world. ② That understanding alone solves no problems. ③ Individual people have to act on that understanding for it to help **[solve / solving]**²⁾ problems. ④ For instance, science **[has found / has been found]**³⁾ that regular exercise can lower your risk of heart disease. ⑤ Knowing this fact is **[interesting / interested]**⁴⁾, but it will do nothing for your personal health unless you act on it and actually exercise. ⑥ And that's the hard part. ⑦ Reading an article about exercise is easy. ⑧ Getting into an actual routine of regular exercise is harder. ⑨ In this sense, science really solves *no* problems at all. ⑩ Problems are only **[solving / solved]**⁵⁾ when people take the knowledge provided by science and **[use / used]**⁶⁾ it. ⑪ In fact, many of humanity's biggest problems are caused by lack of action, and not lack of knowledge.

[24번 어법 선택]

❶ We think we're being logical, objective, and rational — and therefore accurate in our analysis, judgment, and decisions. ❷ So we think that if other people are logical, objective, and rational, they will agree with us and see **[that / what]**¹⁾ we see. ❸ But the opposite is the case. ❹ Every human brain is different. ❺ Everyone's life experience is different. ❻ Everyone's desires and knowledge **[are / is]**²⁾ different. ❼ You might think you're being realistic — that is, that your ideas match reality, but that's impossible. ❽ It's only your interpretation of reality, **[that / which]**³⁾ will always be different from **[someone else / someone else's]**⁴⁾. ❾ When two nations play each other in the World Cup, the fans of each country **[criticize / criticizes]**⁵⁾ the referees for missing all the infractions that **[another / the other]**⁶⁾ team commits. ⓫ Without fail, each fan base believes that the referees are biased against their team.

[25번 어법 선택]

❶ The graph above shows the online share of retail trade in selected European countries in 2018 and 2019. ❷ In 2019, the United Kingdom **[recording / recorded]**¹⁾ the highest online share of retail trade, **[reaching / reached]**²⁾ 19.2 percent. ❸ The Netherlands showed the largest increase in its online share of retail trade among the countries from 2018 to 2019, with a jump of over 6 percentage points. ❹ In 2018, Germany had a higher online share of retail trade than the Netherlands, whereas, in 2019, Germany fell behind the Netherlands. ❺ In 2018, Germany's online share of retail trade was less than four times **[Spain / that of Spain]**³⁾. ❻ Among the five countries, Italy recorded the lowest online share of retail trade in both 2018 and 2019.

[26번 어법 선택]

❶ Edward O. Wilson was born in Birmingham, Alabama, in 1929. ❷ In his early childhood, he became **[interesting / interested]**¹⁾ in nature and spent much time in the outdoors. ❸ At age seven, he was partially **[blinding / blinded]**²⁾ in a fishing accident; his reduced sight led Wilson to the study of ants. ❹ He could not observe larger animals from a distance. ❺ Instead, he concentrated on smaller creatures he could study up close. ❻ After studying evolutionary biology at the University of Alabama, Wilson transferred to Harvard University, **[where / which]**³⁾ he became a professor in 1956. ❼ He never received a Nobel Prize — the prize didn't recognize research in the field of evolutionary biology. ❽ However, he was **[awarding / awarded]**⁴⁾ the Crafoord Prize in 1990. ❾ Wilson, **[knowing / known]**⁵⁾ to some as the "modern-day Darwin", **[died / dying]**⁶⁾ at the age of 92 in Massachusetts.

[27번 어법 선택]**Houseplant Heaven Pop-up Shop**

Enjoy a special plant shopping experience! Explore beautiful houseplants, and **[bring / bringing]**¹⁾ some green into your home.

When: October 11-13, 10 a.m. - 8 p.m.

Where: Tasty Cup Cafe

Details

- Indoor plants are available for purchase.
- If you **[buy / will buy]**²⁾ 2 plants, you will get a 50% discount on coffee.

Activities

- Take pictures in a photo zone **[filling / filled]**³⁾ with unique plants.
- Decorate eco-friendly pots **[making / made]**⁴⁾ from recycled glass.

※ Outside food and drinks are not allowed.

[28번 어법 선택]**2025 Summer Cartoon Festival**

It's the 8th annual Summer Cartoon Festival! The festival **[drew / has drawn]**¹⁾ a lot of visitors last year. Why not be one of them this year?

Dates: July 5 - 6

Time: 9 a.m. - 6 p.m.

Place: Merryville Park

Featured Events

- Cartoon drawing classes for beginners only
- Face painting by cartoonists
- Parade of **[costuming / costumed]**²⁾ characters

Notes

- All visitors will receive character stickers.
- For a more detailed timetable and other information, **[checking / check]**³⁾ out www.SummerCartoonFest.com.

[29번 어법 선택]

① Studies of experts provide insight into what it means to have deep and flexible understanding. ② Experts in a particular domain **[are / is]**¹⁾ people who have deep, richly interconnected ideas about the world. ③ They are not just good thinkers or people who are **[exceptional / exceptionally]**²⁾ smart. ④ Rather, experts have knowledge in a specific domain — such as chess, chemistry, or tennis — and are not generalists. ⑤ However, experts do not just know “a bunch of facts.” ⑥ In fact, **[have / having]**³⁾ expertise in a topic means that knowledge **[organizes / is organized]**⁴⁾ into coherent frameworks, and the expert understands the inter-relationship between facts and can distinguish which ideas are most central. ⑦ This kind of deep but organized understanding **[allows / allows for]**⁵⁾ greater flexibility in learning and **[facilitates / facilitating]**⁶⁾ application across multiple contexts.

[30번 어법 선택]

① It is natural **[for / of]**¹⁾ people to observe happenings and then **[seek / seeks]**²⁾ explanations for why those happenings occurred. ② But sometimes the reasoning is wrong **[because / because of]**³⁾ one or more misconceptions. ③ One of these **[are / is]**⁴⁾ the *ecological fallacy*, **[where / which]**⁵⁾ an argument claims that there is a causal relationship between two things merely because they occur together. ④ For example, in the 1950s it **[found / was found]**⁶⁾ that crime rates were the highest in neighborhoods **[where / which]**⁷⁾ immigrants were most numerous. ⑤ Some people used this “co-occurrence” to argue that immigrants were a cause of crime. ⑥ But a careful analysis of this situation **[revealing / revealed]**⁸⁾ that immigrants were forced **[to live / living]**⁹⁾ in neighborhoods **[where / which]**¹⁰⁾ crime rates were already high; they could not afford more expensive housing in safer neighborhoods. ⑦ Immigrants themselves committed very **[few / little]**¹¹⁾ of the crimes. ⑧ Unless you analyze the claim carefully, you would misinterpret the relationship and thereby construct a faulty belief.

[31번 어법 선택]

① In everyday life, we use previous experience to predict where **[should we / we should]**¹⁾ pay attention. ② Different environments create different expectations. ③ This was profoundly illustrated by the scientist Jared Diamond in his book *Guns, Germs, and Steel*. ④ He describes an adventure **[wandering / wandered]**²⁾ through the New Guinea jungle with native New Guineans. ⑤ He relates that these natives tend to perform poorly at tasks Westerners **[have trained / have been trained]**³⁾ to do since childhood. ⑥ But they are hardly stupid. ⑦ They can detect the most subtle changes in the jungle, good for following the tracks of a predator or for finding the way back home. ⑧ They know which insects to leave alone, know where **[dose food exist / food exists]**⁴⁾, can build and tear down shelters with ease. ⑨ Diamond, who had never spent time in such places, **[having / has]**⁵⁾ no ability to pay attention to these things. ⑩ **[He were / Were he]**⁶⁾ to be tested on such tasks, he also would perform poorly.

[32번 어법 선택]

❶ Most entrepreneurs put in tremendous amounts of time and effort in creating and **[launch / launching]**¹⁾ new products and services and then make the mistake of overpricing them. ❷ They have created something they care deeply about, it's theirs, and this powerful sense of ownership distorts their perception of value which causes them **[to overprice / overpricing]**²⁾ their products. ❸ While many of them are quick to realize that their initial prices are too high, not all these people are happy or willing to drop their prices to make their products more **[attractive / attractively]**³⁾. ❹ And this can be a very costly mistake that may lead to the failure of their new business. ❺ When you launch a new product or service, your priority should be to get sufficient market adoption as soon as possible and you should be ready to sacrifice your initial prices and profits to achieve this aim. ❻ Once you have strong sales volumes, you can increase your prices to maximize your profits.

[33번 어법 선택]

❶ In most respects, humans are one of a relatively small number of species that evolved a very different strategy of investing more energy to reproduce more slowly. ❷ Like apes and elephants, we mature at a leisurely pace, grow large bodies, and have **[few / little]**¹⁾ babies but devote much time and energy to **[raise / raising]**²⁾ them well. ❸ This unusual strategy succeeds because while apes and elephants produce **[fewer / less]**³⁾ babies than mice, a larger percentage of their offspring **[survive / survives]**⁴⁾ to then reproduce. ❹ A house mouse can become a mother when she is just five weeks old, has four to ten pups per litter, and can have a new litter every two months over the course of her approximately **[twelve-month / twelve-months]**⁵⁾ life. ❺ However, the vast majority of her pups **[die / dies]**⁶⁾ young. ❻ In contrast, a chimp or elephant mother does not reproduce until she is at least twelve years old, and she gives birth to only one infant every five or six years over the next thirty or so years. ❼ About half of these offspring **[make / makes]**⁷⁾ it to **[become / becoming]**⁸⁾ parents.

[34번 어법 선택]

❶ When scientists make an important new discovery or experimentally prove some hypothesis, they do not, in general, keep that information to **[them / themselves]**¹⁾ so that they alone can consider its meaning and derive additional theories from it. ❷ Instead, they publish their results and make their data available for inspection. ❸ This makes **[it / this]**²⁾ possible for other scientists **[to reconsider / reconsidering]**³⁾ their data and possibly **[refute / refuting]**⁴⁾ their conclusions. ❹ More important, though, it makes **[it / this]**⁵⁾ possible for other scientists **[to use / using]**⁶⁾ that data to construct new hypotheses and **[perform / performs]**⁷⁾ new experiments. ❺ The assumption is that society as a whole will end up **[to know / knowing]**⁸⁾ more if information is spread as widely as possible, rather than being limited to **[a few / a little]**⁹⁾ people. ❻ In a strict sense, every scientist depends on the work of other scientists.

[35번 어법 선택]

❶ In the 1930s, the British psychologist Sir Frederic Bartlett asked people **[to listen / listening]**¹⁾ to folktales from other countries and then **[recall / recalled]**²⁾ these stories at a later date. ❷ As you might guess, unfamiliar stories were not **[remembering / remembered]**³⁾ as well as familiar stories. ❸ Surprisingly, however, errors in memory **[was / were]**⁴⁾ not random. ❹ Rather, subjects often rewrote similar parts of the stories in their own minds — particularly the parts that made the least sense to them. ❺ Bartlett concluded that when **[facing / faced]**⁵⁾ problems, humans draw upon mental schemata, or shelves of stored knowledge in our brains, to fill in any minor gaps in our memories. ❻ Therefore, remembering is an imaginative process that involves **[to build / building]**⁶⁾ upon past experiences.

[36번 어법 선택]

❶ History, people often say, repeats itself. ❷ And **[looking / looked]**¹⁾ at the historical records of the ancient civilizations, some things do seem **[to happen / happening]**²⁾ again and again. ❸ Civilizations expand, get overextended, and then collapse as in the cases of Rome, **[that / which]**³⁾ went under in 476 AD, and the British Empire, **[that / which]**⁴⁾ fell apart more than a thousand years later in the post-World War II era. ❹ But is this always the case? ❺ If so, archaeology would be pretty **[boring / bored]**⁵⁾; one thing would happen again and again. ❻ But that's not **[that / what]**⁶⁾ archaeologists see. ❼ Some civilizations end suddenly, like the Aztec and Inca, **[conquering / conquered]**⁷⁾ by invaders in the 1520s AD. ❽ Those empires never had the chance to collapse as a result of overexpansion. ❾ So in the case of civilizations, "history repeats itself" seems **[to be / being]**⁸⁾ an oversimplification.

[37번 어법 선택]

❶ Stanford psychology professor Dr. Carol Dweck is the internationally recognized pioneer of the concept of “growth mindset” as a way to continually grow, learn, and persevere in our efforts. ❷ Dweck found that kids who **[tell / are told]**¹⁾ they’re “smart” actually underperform in future tasks, by choosing easier tasks to avoid evidence **[that / which]**²⁾ they are not smart, **[that / which]**³⁾ Dweck calls having a “fixed mindset.” ❸ In contrast, Dweck found, kids who are praised not for their smarts but for their effort **[develop / develops]**⁴⁾ **[that / what]**⁵⁾ Dweck calls a “growth mindset.” ❹ They learn that their effort is what led to their success, and if they continue to try, over time they’ll improve and achieve more things. ❺ These kids end up **[to take / taking]**⁶⁾ on tougher things, and feel better about **[them / themselves]**⁷⁾. ❻ “Emphasizing effort gives a child a variable that they can control,” Dweck has explained.

[38번 어법 선택]

❶ To monitor our surroundings **[are / is]**¹⁾ to focus on what’s outside of ourselves: what we see, hear, smell, feel, and perhaps even taste. ❷ But sometimes **[that / what]**²⁾ really marks a place is something less specific — a *feeling* within us. ❸ An **[interesting / interested]**³⁾ example emerged from a study of subway passenger behavior. ❹ Researchers **[trying / tried]**⁴⁾ to understand why people sit where they sit or stand where they stand in subway and metro trains **[examining / examined]**⁵⁾ the factors that shape the way riders used and navigated that space in different situations. ❺ One of their findings involved the reasons many riders like to plant **[them / themselves]**⁶⁾ close to the train’s doors. ❻ Partly this was the obvious convenience of being able to exit more quickly. ❼ But it was shaped partly by a more abstract sensation — the desire to avoid the sometimes uncomfortable feeling of accidentally making eye contact with seated passengers. ❽ We can’t see feelings — but they’re very real, and they influence our experience of the world.

[39번 어법 선택]

❶ We have a 'diving reflex', like other marine mammals. ❷ This means that special nerve endings on our faces, around the mouth and nose, **[trigger / triggering]**¹⁾ this reflex only when the facial region goes under water. ❸ If we are in the water, with our head out in the air, there is no diving reflex. ❹ But if we sink just our face in a bowl of water, while the whole of the rest of our body is in the dry air, the diving reflex is triggered. ❺ It automatically closes down the airway, **[reducing / reduced]**²⁾ the risk of swallowing water, and it narrows the small air-passages in the lungs. ❻ At the same time the heart rate is slowed down to half speed and blood is shunted to the vital organs, **[protecting / protected]**³⁾ them from the effects of the brief stop in breathing. ❼ By contrast, if a chimpanzee or a gorilla found **[it / itself]**⁴⁾ in water with its face below the surface, it would panic, its heart would race and it would quickly drown.

[40번 어법 선택]

❶ There is a natural assumption of truth, or a truth bias when humans communicate with one another. ❷ In other words, when we're listening to others or reading their words, our automatic assumption is **[that / what]**¹⁾ the other person is telling the truth. ❸ This usually works out fine. ❹ If you ask someone where **[is the restroom / the restroom is]**²⁾ located or if it's raining outside, you can safely assume that most people will not lie in their responses. ❺ Imagine how difficult **[would it / it would]**³⁾ be to converse with someone if you assumed that *everything* they were telling you was false! ❻ Indeed, **[question / questioning]**⁴⁾ the truth of a statement and then **[choose / choosing]**⁵⁾ not to believe it requires additional mental steps. ❼ For the most part, humans are "cognitive misers," **[that / which]**⁶⁾ means we typically don't expend more mental effort than **[seem / seems]**⁷⁾ necessary in a given situation. ❽ It makes sense then, that when we see **[online something / something online]**⁸⁾, even if it is fake, our default is to believe it, at least at first.

[41~42번 어법 선택]

① Paying with plastic fundamentally changes **[the way / the way how]**¹⁾ we spend money, **[altering / altered]**²⁾ the calculus of our financial decisions. ② When you buy something with cash, the purchase involves an actual loss — your wallet is literally lighter. ③ Credit cards, however, make the purchase **[abstract / abstractly]**³⁾, so that you don't really feel the downside of spending money. ④ Brain-imaging experiments suggest that paying with credit cards actually **[reduce / reduces]**⁴⁾ activity in the insula, a brain region **[associating / associated]**⁵⁾ with negative feelings. ⑤ As George Loewenstein, a neuroeconomist at Carnegie Mellon, says, "The nature of credit cards ensures that your brain is anesthetized against the pain of payment." ⑥ **[Spend / Spending]**⁶⁾ money doesn't feel bad, so you spend more money.

⑦ Consider this experiment: Drazen Prelec and Duncan Simester, two business professors at MIT, **[organizing / organized]**⁷⁾ a real-life, sealed-bid auction for tickets to a Boston Celtics game. ⑧ Half the participants in the auction **[was / were]**⁸⁾ informed that they had to pay with cash; **[other / the other]**⁹⁾ half **[told / were told]**¹⁰⁾ they had to pay with credit cards. ⑨ Prelec and Simester then averaged the bids for the two different groups. ⑩ It turns out that the average credit card bid was *twice* as high as the average cash bid. ⑪ When people used their credit cards, their bids were **[much / very]**¹¹⁾ more careless. ⑫ They no longer felt the need to limit their expenses.

[43~45번 어법 선택]

① The sun shone in the cloudless sky as Becky, a retired teacher, **[walking / walked]**¹⁾ to the fruit market. ② Across town, Dana was riding a bus towards the museum for a job interview. ③ Just before reaching her stop, Dana noticed the sky had suddenly darkened. ④ Her heart sank — she had no umbrella. ⑤ As she stepped off the bus next to the market, **[where / which]**²⁾ Becky had just finished shopping, raindrops began to fall. ⑥ Dana felt panic. ⑦ She didn't want to show up to her interview **[soaking / soaked]**³⁾. ⑧ She looked around but couldn't find any stores nearby to buy an umbrella, and she didn't have time to search around. ⑨ Just then, Becky **[approached her / approached to her]**⁴⁾, holding an open umbrella in one hand and a closed one in the other. ⑩ "Take this," she said with a smile. ⑪ Dana's eyes widened. ⑫ "Are you sure?" ⑬ Becky nodded. ⑭ "I always carry an extra on rainy days." ⑮ Dana thanked her, took the umbrella, and opened it. ⑯ She saw a small card **[tied / tying]**⁵⁾ to the handle. ⑰ It read: "Cover each other." ⑱ She was touched by the message. ⑲ She hurried to the museum, arriving dry and comfortable, and performed well in her interview. ⑳ The Museum CEO was impressed by Dana and offered her the Event Manager position, her dream job. ㉑ Throughout the years ahead, she often thought back to Becky's kind gesture. ㉒ **[Inspiring / Inspired]**⁶⁾ by the memory, Dana created a museum event **[calling / called]**⁷⁾ "Cover Each Other" with paintings of people supporting others. ㉓ She donated half of the money from ticket sales to families who lost their homes to natural disasters. ㉔ Dana kept Becky's message **[framing / framed]**⁸⁾ in her office as a reminder that one kind gesture could change someone's life. ㉕ The kindness of one stranger had shaped her path, and she made sure it continued to shape the world.
