Dear Dog Owners,

My name is Lily Paxton, and I'm the town's Pet Program Coordinator. As part of our goal to make the community more dog-friendly, we recently opened a new dog park. The park was designed to provide an enjoyable experience for both dogs and owners. There are big grassy areas where your dogs can run, jump, and play. We have separate spaces for small dogs and big dogs, to ensure safety. You'll also find lots of benches and areas for resting and staying cool. We hope you will have a wonderful time with your dogs in this newly opened park.

Regards,

Lily Paxton, Pet Program Coordinator

- ① 새로 생긴 반려견 공원은 지역 사회를 반려견 친화적으로 만들기 위한 노력의 일환이다.
- ② 반려견 공원은 사람도 이용할 수 있다.
- ③ 개들이 자유롭게 운동할 수 있는 넓은 잔디밭이 있다.
- ④ 개들의 안전을 보장하기 위해서 나이별로 별도의 공간이 분리되어 있다.
- ⑤ 휴식하고 시원하게 머물 수 있는 장소가 마련되어 있다.

Maya waited in line to check in for her flight. Her expectations about her European backpacking trip were really high. She had been looking forward to the trip for a year. She couldn't wait to visit museums in Madrid and see the Eiffel Tower at night in Paris. As she stood in line, she could feel those experiences were finally so close. When she approached the counter, the airline employee asked to see her passport. Maya reached into her pocket but felt nothing. She realized she had left her passport at home. Her plans were ruined. She was heartbroken, knowing she could not board the flight and had to delay her dream trip.

[202506H1_21합축의미추론_변형]

It is common sense that people's inner beliefs may ① **drive** their external behavior. If you're attracted to a certain person, you should be more likely to ② **socialize** with that person. If you favor a brand of toothpaste, you're more likely to buy it. Of course, our internal thoughts don't *always* ③ **predict** our public behavior, but, overall, what we do obviously reflects what we think. But beliefs and behaviors are also ④ **related** in a more remarkable way. It turns out that the arrow is as likely to point in the ⑤ **arbitrary** direction. As social psychologist David Myers observes, "If social psychology has taught us anything during the last 25 years, it is that we are likely not only to think ourselves into a way of acting but also to act ourselves into a way of thinking."

5. 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

[202506H1_22요지추론_변형]

Imagine following the spirit of a silence vow into daily life. Challenge yourself to spend an entire day ① **saying** only what you absolutely must say. It's been widely observed by behavioral psychology experts — and anyone who's ever been on a first date — ② **that** we too often tend to treat "conversation" as a game of waiting for our own turn to speak. We miss what's ③ **being said** because we're mentally rehearsing our next utterance. What if you could eliminate the idea that the next available mini-silence is your next opening to express ④ **whatever** is in your head? What if you were limited to, say, fifty spoken words tomorrow? I think you'd listen quite differently. You'd attend quite carefully to every word you heard. You'd be attuned to ⑤ **which** you must respond to. You might discover that the less you say, the more you hear.

* vow: 서약 ** utterance: 발언 *** attune: 맞추다

6. 다음 글에서 밑줄 친 **science really solves no problems at all**가 의미하는 바로 가장 적절한 것은?

[202506H1_23주제추론_변형]

Science is concerned with accumulating and understanding observations of the physical world. That understanding alone solves no problems. Individual people have to act on that understanding for it to help solve problems. For instance, science has found that regular exercise can lower your risk of heart disease. Knowing this fact is interesting, but it will do nothing for your personal health unless you act on it and actually exercise. And that's the hard part. Reading an article about exercise is easy. Getting into an actual routine of regular exercise is harder. In this sense, **science really solves no problems at all**. Problems are only solved when people take the knowledge provided by science and use it. In fact, many of humanity's biggest problems are caused by lack of action, and not lack of knowledge.

* accumulate: 축적하다

- ① Just observing helps us understand science.
- ② Science is established through repeated experiments.
- ③ Acquiring a lot of scientific knowledge can help solve problems.
- ④ The higher the understanding of science, the faster the problem is solved.
- ⑤ Without action, scientific understanding is not helpful in dealing with problems.

7. 다음 글에서 밑줄 친 **the opposite is the case**가 의미하는 바로 가장 적절한 것은?

[202506H1_24제목추론_변형]

We think we're being logical, objective, and rational — and therefore accurate in our analysis, judgment, and decisions. So we think that if other people are logical, objective, and rational, they will agree with us and see what we see. But **the opposite is the case**. Every human brain is different. Everyone's life experience is different. Everyone's desires and knowledge are different. You might think you're being realistic — that is, that your ideas match reality, but that's impossible. It's only your interpretation of reality, which will always be different from someone else's. When two nations play each other in the World Cup, the fans of each country criticize the referees for missing all the infractions that the other team commits. Without fail, each fan base believes that the referees are biased against their team.

* infraction: 위반

- ① this idea holds true for most people
- ② logic and objectivity ensure agreement
- ③ people rarely see things in the same way
- ④ shared values lead to shared perspectives
- ⑤ everyone ultimately arrives at the same conclusion

[202506H1_29어법추론_변형]

Studies of experts provide insight into what it means to have deep and flexible understanding. Experts in a particular domain are people who have deep, richly interconnected ideas about the world. They are not just good thinkers or people who are exceptionally smart. Rather, experts have knowledge in a specific domain — such as chess, chemistry, or tennis — and are not generalists. However, experts do not just know "a bunch of facts." In fact, having expertise in a topic means that knowledge is organized into coherent frameworks, and the expert understands the inter-relationship between facts and can distinguish which ideas are most central. This kind of deep but organized understanding allows for greater flexibility in learning and facilitates application across multiple contexts.

* coherent: 일관성 있는

- ① Common Traits Shared by Intelligent People

[202506H1_30어휘추론_변형]

It is natural for people to observe happenings and then seek explanations for why those happenings occurred. But sometimes the reasoning is wrong because of one or more misconceptions. One of these is the *ecological fallacy*, where an argument claims that there is a causal relationship between two things merely because they occur together. For example, in the 1950s it was found that crime rates were the highest in neighborhoods where immigrants were most numerous. Some people used this "co-occurrence" to argue that immigrants were a cause of crime. But a careful analysis of this situation revealed that immigrants were forced to live in neighborhoods where crime rates were already high; they could not afford more expensive housing in safer neighborhoods. Immigrants themselves committed very few of the crimes. Unless you analyze the claim carefully, you would misinterpret the relationship and thereby construct a faulty belief.

* immigrant: 이민자

- ① People naturally look for explanations for observed events, but these explanations can sometimes be flawed.
- ② The ecological fallacy occurs when a causal relationship is claimed between two things merely because they coincide
- ③ Since safer neighborhoods were unaffordable, immigrants ended up living in areas with high crime rates.
- ④ Immigrants were substantially involved in serious crimes, irrespective of their place of residence
- ⑤ Misinterpreting relationships can lead to the formation of incorrect beliefs if claims are not analyzed thoroughly.

Most entrepreneurs put in tremendous amounts of time and effort in creating and launching new products and services and then make the mistake of overpricing them. They have created something they care deeply about, it's theirs, and this powerful sense of ownership distorts their perception of value which causes them to overprice their products. While many of them are quick to realize that their initial prices are too high, not all these people are happy or willing to drop their prices to make their products more attractive. And this can be a very costly mistake that may lead to the failure of their new business. When you launch a new product or service, your priority should be to get sufficient market adoption as soon as possible and you should be ready to sacrifice your initial prices and profits to achieve this aim. Once you have strong sales volumes, you can increase your prices to maximize your profits.

[202506H1_33빈칸추론_변형]

In most respects, humans are one of a relatively small number of species ① **that** evolved a very different strategy of investing more energy to reproduce more slowly. Like apes and elephants, we mature at a leisurely pace, grow large bodies, and have few babies but ② **devote** much time and energy to raise them well. This unusual strategy succeeds because while apes and elephants produce fewer babies than mice, a larger percentage of their offspring ③ **survive** to then reproduce. A house mouse can become a mother when she is just five weeks old, has four to ten pups per litter, and can have a new litter every two months over the course of her ④ **approximately** twelve-month life. However, the vast majority of her pups die young. In contrast, a chimp or elephant mother does not reproduce until she is at least twelve years old, and she gives birth to only one infant every five or six years over the next thirty or so years. About half of these offspring make it to ⑤ **become** parents.

* ape: 유인원 ** offspring: 자손 *** litter: 한 배에서 난 새끼

When scientists make an important new discovery or experimentally prove some hypothesis, they do not, in general, keep that information to themselves so that they alone can consider its meaning and derive additional theories from it. Instead, they publish their results and make their data available for inspection. This makes it possible for other scientists to reconsider their data and possibly refute their conclusions. More important, though, it makes it possible for other scientists to use that data to construct new hypotheses and perform new experiments. The assumption is that society as a whole will end up knowing more if information is spread as widely as possible, rather than being limited to a few people. In a strict sense, every scientist depends on the work of other scientists.

* derive: 도출하다 ** refute: 반박하다

- ① reasons for secrecy in scientific publishing
- ② difficulty of validating others' experiments
- ③ importance of collaboration among scientists
- ④ role of communication in individual scientific advancement
- ⑤ significance of sharing scientific knowledge for collective progress

In the 1930s, the British psychologist Sir Frederic Bartlett asked people to listen to folktales from other countries and then recall these stories at a later date. As you might guess, unfamiliar stories were not remembered as well as familiar stories. Surprisingly, however, errors in memory were not random. Rather, subjects often rewrote similar parts of the stories in their own minds — particularly the parts that made the least sense to them. Bartlett concluded that when facing problems, humans draw upon mental schemata, or shelves of stored knowledge in our brains, to fill in any minor gaps in our memories. Therefore, remembering is an imaginative process that involves building upon past experiences.

[202506H1_36순서추론_변형]

History, people often say, repeats itself. And looking at the historical records of the ancient civilizations, some things do seem to happen again and again. Civilizations expand, get overextended, and then collapse as in the cases of Rome, which went under in 476 AD, and the British Empire, which fell apart more than a thousand years later in the post-World War II era. But is this always the case? If so, archaeology would be pretty boring; one thing would happen again and again. But that's not what archaeologists see. Some civilizations end suddenly, like the Aztec and Inca, conquered by invaders in the 1520s AD. Those empires never had the chance to collapse as a result of overexpansion. So in the case of civilizations, "history repeats itself" seems to be an oversimplification.

* archaeology: 고고학 ** invader: 침입자 *** empire: 제국

- ① tracing the roots of civilization's collapse
- ② the fate of empires: from rome to britain
- ③ exploring the past through ancient remains
- ④ conflict and conquest in the fall of civilizations
- ⑤ why civilizations don't always decline the same way

[202506H1_37순서추론_변형]

Stanford psychology professor Dr. Carol Dweck is the internationally recognized pioneer of the concept of "growth mindset" as a way to continually grow, learn, and persevere in our efforts. Dweck found that kids who are told they're "smart" actually underperform in future tasks, by choosing easier tasks to avoid evidence that they are not smart, which Dweck calls having a "fixed mindset." In contrast, Dweck found, kids who are praised not for their smarts but for their effort develop what Dweck calls a "growth mindset." They learn that their effort is what led to their success, and if they continue to try, over time they'll improve and achieve more things. These kids end up taking on tougher things, and feel better about themselves. "Emphasizing effort gives a child a variable that they can control," Dweck has explained.

* persevere: 인내하다 ** variable: 변수

- ① 성장 사고방식은 유전적 능력과는 무관하다.
- ② 아이에게 지능을 칭찬하면 성취감이 커진다.
- ③ 아이가 어려운 일을 피하지 않도록 과제를 쉽게 줘야 한다.
- ④ 고정된 능력을 강조할수록 아이는 더 열심히 노력하게 된다.
- ⑤ 아이의 노력에 초점을 맞추면 지속적인 성장을 이룰 수 있다.

18. 다음 글의 요지로 가장 적절한 것은?

[202506H1_38문장삽입_변형]

To monitor our surroundings is to focus on what's outside of ourselves: what we see, hear, smell, feel, and perhaps even taste. But sometimes what really marks a place is something less specific — a *feeling* within us. An interesting example emerged from a study of subway passenger behavior. Researchers trying to understand why people sit where they sit or stand where they stand in subway and metro trains examined the factors that shape the way riders used and navigated that space in different situations. One of their findings involved the reasons many riders like to plant themselves close to the train's doors. Partly this was the obvious convenience of being able to exit more quickly. But it was shaped partly by a more abstract sensation — the desire to avoid the sometimes uncomfortable feeling of accidentally

making eye contact with seated passengers. We can't see feelings — but they're very real, and they influence our experience of the world.

- ① The spaces we occupy influence how we interact with others around us.
- ② We often choose spots in public spaces for convenience, such as easier exits.
- ③ We navigate environments based purely on logical reasoning and practical needs.
- ④ Physical environments matter more than emotional factors in shaping human behavior.
- ⑤ How we engage with spaces depends not only on external surroundings but also on the unseen emotions within.

There is a natural assumption of truth, or a truth bias when humans communicate with one another. In other words, when we're listening to others or reading their words, our automatic assumption is that the other person is telling the truth. This usually works out fine. If you ask someone where the restroom is located or if it's raining outside, you can safely assume that most people will not lie in their responses. Imagine how difficult it would be to converse with someone if you assumed that *everything* they were telling you was false! Indeed, questioning the truth of a statement and then choosing not to believe it requires additional mental steps. For the most part, humans are "cognitive misers," which means we typically don't expend more mental effort than seems necessary in a given situation. It makes sense then, that when we see something online, even if it is fake, our default is to believe it, at least at first.

* expend: 들이다 ** default: 기본값

- ① Why Suspicion Is the Key to Truth
- ② The Hidden Cost of Trusting Too Quickly
- ③ Truth Bias: Why Doubt Takes More Effort
- ④ Trust by Default: An Unchanging Human Trait

[202506H1_27실용문불일치_변형]

Houseplant Heaven Pop-up Shop

Enjoy a special plant shopping experience! Explore beautiful houseplants, and bring some green into your home.

When: October 11-13, 10 a.m. - 8 p.m.

Where: Tasty Cup Cafe

Details

- Indoor plants are available for purchase.
- If you buy 2 plants, you will get a 50% discount on coffee.

Activities

- Take pictures in a photo zone filled with unique plants.
- Decorate eco-friendly pots made from recycled glass.

※ Outside food and drinks are not allowed.

- ① 3일간 오후에 진행된다.
 ② 실내 식물을 무료로 받을 수 있다.
 ③ 식물을 사면 커피를 무료로 받을 것이다.
 ④ 식물로 가득 찬 포토존이 마련되어있다.
 ⑤ 외부 음식과 음료를 반입할 수 있다.

2025 Summer Cartoon Festival

It's the 8th annual Summer Cartoon Festival! The festival drew a lot of visitors last year. Why not be one of them this year?

Dates: July 5 - 6

Time: 9 a.m. - 6 p.m.

Place: Merryville Park

Featured Events

- Cartoon drawing classes for beginners only
- Face painting by cartoonists
- Parade of costumed characters

Notes

- All visitors will receive character stickers.
- For a more detailed timetable and other information, check out www.SummerCartoonFest.com.

- ① 매년 개최되는 축제이다.
- ② 2일간 진행되는 행사이다.
- ③ 초급자만을 대상으로 한 이벤트가 있다.
- ④ 캐릭터 의상을 입을 수 있는 행사가 있다.
- ⑤ 모든 방문객들은 캐릭터 스티커를 받을 것이다.

32. 다음 글에서 밑줄 친 allows for greater flexibility in learning and facilitates application across multiple contexts가 의미하는 바로 가장 적절한 것은?

[202506H1_29어법추론_변형]

Studies of experts provide insight into what it means to have deep and flexible understanding. Experts in a particular domain are people who have deep, richly interconnected ideas about the world. They are not just good thinkers or people who are exceptionally smart. Rather, experts have knowledge in a specific domain — such as chess, chemistry, or tennis — and are not generalists. However, experts do not just know “a bunch of facts.” In fact, having expertise in a topic means that knowledge is organized into coherent frameworks, and the expert understands the

inter-relationship between facts and can distinguish which ideas are most central. This kind of deep but organized understanding allows for greater flexibility in learning and facilitates application across multiple contexts.

* coherent: 일관성 있는

- ① solving problems in the same way repeatedly
- ② memorizing isolated facts without connections
- ③ transferring knowledge to different circumstances
- ④ understanding general ideas without specific cases
- ⑤ learning deeply in one area but struggling elsewhere

33. 다음 글의 제목으로 가장 적절한 것은?

[202506H1_30어휘추론_변형]

It is natural for people to observe happenings and then seek explanations for why those happenings occurred. But sometimes the reasoning is wrong because of one or more misconceptions. One of these is the *ecological fallacy*, where an argument claims that there is a causal relationship between two things merely because they occur together. For example, in the 1950s it was found that crime rates were the highest in neighborhoods where immigrants were most numerous. Some people used this “co-occurrence” to argue that immigrants were a cause of crime. But a careful analysis of this situation revealed that immigrants were forced to live in neighborhoods where crime rates were already high; they could not afford more expensive housing in safer neighborhoods. Immigrants themselves committed very few of the crimes. Unless you analyze the claim carefully, you would misinterpret the relationship and thereby construct a faulty belief.

* immigrant: 이민자

- ① The Trap of Quick Judgments in Explaining Events
- ② Jumping to Causes: Why Our Explanations Often Go Wrong
- ③ Seeing Patterns That Don't Exist: A Habit of Human Thinking
- ④ Blaming the Wrong Target: The Case Against Immigrants and Crime

34. 다음 글의 요지로 가장 적절한 것은?

[202506H1_31빈칸추론_변형]

In everyday life, we use previous experience to predict where we should pay attention. Different environments create different expectations. This was profoundly illustrated by the scientist Jared Diamond in his book *Guns, Germs, and Steel*. He describes an adventure wandering through the New Guinea jungle with native New Guineans. He relates that these natives tend to perform poorly at tasks Westerners have been trained to do since childhood. But they are hardly stupid. They can detect the most subtle changes in the jungle, good for following the tracks of a predator or for finding the way back home. They know which insects to leave alone, know where food exists, can build and tear down shelters with ease. Diamond, who had never spent time in such places, has no ability to pay attention to these things. Were he to be tested on such tasks, he also would perform poorly.

* profoundly: 심오하게 ** subtle: 미묘한

- ① Attention remains stable regardless of environmental changes.
- ② Most survival skills depend more on instinct than on training.
- ③ Cultural background explains differences in levels of knowledge.
- ④ People focus on things that are shaped by experiences in familiar settings.
- ⑤ Intelligence should be measured by survival ability, not cultural standards.

[202506H1_32빈칸추론_변형]

Most entrepreneurs put in tremendous amounts of time and effort in creating and launching new products and services and then make the mistake of overpricing ① them. They have created something they care deeply about, it's theirs, and this powerful sense of ownership distorts their perception of value which ② causes them to overprice their products. While many of them are quick to realize ③ what their initial prices are too high, not all these people are happy or willing to drop their prices to make their products more attractive. And this can be a very costly mistake ④ that may lead to the failure of their new

business. When you launch a new product or service, your priority should be to get sufficient market adoption as soon as possible and you should be ready to sacrifice your initial prices and profits ⑤ to achieve this aim. Once you have strong sales volumes, you can increase your prices to maximize your profits.

* entrepreneur: 기업가 ** tremendous: 엄청난

[202506H1_33빈칸추론_변형]

In most respects, humans are one of a relatively small number of species that evolved a very different strategy of investing more energy to reproduce more slowly. Like apes and elephants, we mature at a leisurely pace, grow large bodies, and have few babies but devote much time and energy to raising them well. This unusual strategy succeeds because while apes and elephants produce fewer babies than mice, a larger percentage of their offspring survive to then reproduce. A house mouse can become a mother when she is just five weeks old, has four to ten pups per litter, and can have a new litter every two months over the course of her approximately twelve-month life. However, the vast majority of her pups die young. In contrast, a chimp or elephant mother does not reproduce until she is at least twelve years old, and she gives birth to only one infant every five or six years over the next thirty or so years. About half of these offspring make it to becoming parents.

* ape: 유인원 ** offspring: 자손 *** litter: 한 배에서 난 새끼

- ① Humans grow slowly, have few babies, and invest much energy in raising them.
- ② Mice can reproduce several times during their one-year lifespan.
- ③ Mice produce many offspring, most of which grow up and reproduce.
- ④ Chimpanzees and elephants have long reproductive cycles and few offspring.
- ⑤ About half of the offspring of chimpanzees and elephants become parents.

When scientists make an important new discovery or experimentally prove some hypothesis, they do not, in general, keep that information to themselves so that they alone can consider its meaning and derive additional theories from ① them. Instead, they publish their results and make their data available for inspection. This makes it possible for other scientists to reconsider their data and ② possibly refute their conclusions. More important, though, it makes it possible for other scientists to use that data ③ to construct new hypotheses and perform new experiments. The assumption is ④ that society as a whole will end up knowing more if information is spread as widely as possible, rather than being limited to a few people. In a strict sense, every scientist ⑤ depends on the work of other scientists.

* derive: 도출하다 ** refute: 반박하다

In the 1930s, the British psychologist Sir Frederic Bartlett asked people to listen to folktales from other countries and then recall these stories at a later date. As you might guess, unfamiliar stories were not remembered as well as familiar stories. Surprisingly, however, errors in memory were not random. Rather, subjects often rewrote similar parts of the stories in their own minds — particularly the parts that made the least sense to them. Bartlett concluded that when facing problems, humans draw upon mental schemata, or shelves of stored knowledge in our brains, to fill in any minor gaps in our memories. Therefore, remembering is an imaginative process that involves building upon past experiences.

* folktale: 민간 설화

- ① 낯선 이야기는 익숙한 이야기보다 덜 정확하게 기억되었다.
- ② 참가자들은 이해하기 어려운 부분을 스스로 수정하는 경향이 있었다.
- ③ 기억의 오류는 대부분 일정한 방식 없이 우연히 발생했다.
- ④ 사람들은 기존 지식을 바탕으로 기억의 틈을 메우기도 한다.
- ⑤ 기억은 과거 경험에 기초해 구성되는 창의적인 활동으로 간주한다.

History, people often say, repeats itself. And looking at the historical records of the ancient civilizations, some things do seem to happen again and again. Civilizations expand, get overextended, and then collapse as in the cases of Rome, which went under in 476 AD, and the British Empire, which fell apart more than a thousand years later in the post-World War II era. But is this always the case? If so, archaeology would be pretty boring; one thing would happen again and again. But that's not what archaeologists see. Some civilizations end suddenly, like the Aztec and Inca, conquered by invaders in the 1520s AD. Those empires never had the chance to collapse as a result of overexpansion. So in the case of civilizations, "history repeats itself" seems to be an oversimplification.

* archaeology: 고고학 ** invader: 침입자 *** empire: 제국

- ① From Rome to Britain: A Shared Fate
- ② Empires Rise and Fall the Same Way
- ③ History Always Repeats in Civilizations
- ④ Collapse of Empires Through Conquest
- ⑤ Historical Outcomes: Not Bound by Repetition

Stanford psychology professor Dr. Carol Dweck is the internationally recognized pioneer of the concept of "growth mindset" as a way to continually grow, learn, and persevere in our efforts. Dweck found that kids who are told they're "smart" actually underperform in future tasks, by choosing easier tasks to avoid evidence that they are not smart, which Dweck calls having a "fixed mindset." In contrast, Dweck found, kids who are praised not for their smarts but for their effort develop what Dweck calls a "growth mindset." They learn that their effort is what led to their success, and if they continue to try, over time they'll improve and achieve more things. These kids end up taking on tougher things, and feel better about themselves. "Emphasizing effort gives a child a variable that they can control," Dweck has explained.

* persevere: 인내하다 ** variable: 변수

[202506H1_38문장삽입_변형]

To monitor our surroundings is to focus on what's outside of ourselves: what we see, hear, smell, feel, and perhaps even taste. But sometimes what really marks a place is something less specific — a *feeling* within us. An interesting example emerged from a study of subway passenger behavior. Researchers trying to understand why people sit where they sit or stand where they stand in subway and metro trains examined the factors that shape the way riders used and navigated that space in different situations. One of their findings involved the reasons many riders like to plant themselves close to the train's doors. Partly this was the obvious convenience of being able to exit more quickly. But it was shaped partly by a more abstract sensation — the desire to avoid the sometimes uncomfortable feeling of accidentally making eye contact with seated passengers. We can't see feelings — but they're very real, and they influence our experience of the world.

- ① How to Examine Passengers' Feelings
- ② The Factors That Influence Our Feelings

[202506H1_39문장삽입_변형]

We have a 'diving reflex', like other marine mammals. This means that special nerve endings on our faces, around the mouth and nose, trigger this reflex only when the facial region goes under water. If we are in the water, with our head out in the air, there is no diving reflex. But if we sink just our face in a bowl of water, while the whole of the rest of our body is in the dry air, the diving reflex is triggered. It automatically closes down the airway, reducing the risk of swallowing water, and it narrows the small air-passages in the lungs. At the same time the heart rate is slowed down to half speed and blood is shunted to the vital organs, protecting them from the effects of the brief stop in breathing. By contrast, if a chimpanzee or a gorilla found itself in water with its face below the surface, it would panic, its heart would race and it would quickly drown.

* reflex: 반사 ** trigger: 유발하다 *** shunt: 방향을 돌리다

- ① The diving reflex is triggered only when we have our face submerged in water.
- ② The rest of the body must also be underwater for the diving reflex to occur.
- ③ The diving reflex helps prevent water from entering the airway.
- ④ The diving reflex slows down the heartbeat and directs blood to vital organs.
- ⑤ Great apes respond to submersion with fear and increased heart rate.

[202506H1_40요약문추론_변형]

There is a natural assumption of truth, or a truth bias when humans communicate with one another. In other words, when we're listening to others or reading their words, our automatic assumption is ① what the other person is telling the truth. This usually works out fine. If you ask someone where the restroom ② is located or if it's raining outside, you can safely assume that most people will not lie in their responses. Imagine how ③ difficult it would be to converse with someone if you assumed that *everything* they were telling you was false! Indeed, ④ questioning the truth of a statement and then choosing not to believe it requires additional mental steps. For the most part, humans are "cognitive misers," ⑤ which means we typically don't expend more mental effort than seems necessary in a given situation. It makes sense then, that when we see something online, even if it is fake, our default is to believe it, at least at first.

* expend: 들이다 ** default: 기본값

Paying with plastic fundamentally changes the way we spend money, altering the calculus of our financial decisions.

- (A) As George Loewenstein, a neuroeconomist at Carnegie Mellon, says, "The nature of credit cards ensures that your brain is anesthetized against the pain of payment." Spending money doesn't feel bad, so you spend more money. Consider this experiment: Drazen Prelec and Duncan Simester, two business professors at MIT, organized a real-life, sealed-bid auction for tickets to a Boston Celtics game.
- (B) Half the participants in the auction were informed that they had to pay with cash: the other half were told they had to pay with credit cards. Prelec and Simester then averaged the bids for the two different groups. It turns out that the average credit card bid was *twice* as high as the average cash bid. When people used their credit cards,

their bids were much more reckless. They no longer felt the need to limit their expenses.

- (C) When you buy something with cash, the purchase involves an actual loss — your wallet is literally lighter. Credit cards, however, make the purchase abstract, so that you don't really feel the downside of spending money. Brain-imaging experiments suggest that paying with credit cards actually reduces activity in the insula, a brain region associated with negative feelings.

* calculus: 계산법 * anesthetize: 마비시키다 * bid: 입찰

Dear Dog Owners,

My name is Lily Paxton, and I'm the town's Pet Program Coordinator. As part of our goal to make the community more dog-friendly, we recently opened a new dog park. ① The park was designed to provide an enjoyable experience for both dogs and owners. ② There are big grassy areas where your dogs can run, jump, and play. ③ We have separate spaces for small dogs and big dogs, to ensure safety. ④ Having separate spaces for small and big dogs is beneficial for their emotional well-being. ⑤ You'll also find lots of benches and areas for resting and staying cool. We hope you will have a wonderful time with your dogs in this newly opened park.

Regards,

Lily Paxton, Pet Program Coordinator

[202506H1_19심경추론_변형]

Maya waited in line to check in for her flight. Her expectations about her European backpacking trip were really high. She had been looking forward to the trip for a year. She couldn't wait to visit museums in Madrid and see the Eiffel Tower at night in Paris. As she stood in line, she could feel those experiences were finally so close. When she approached the counter, the airline employee asked to see her passport. Maya reached into her pocket but felt nothing. She realized she had left her passport at home. Her plans were ruined. She was heartbroken, knowing she could not board the flight and had to delay her dream trip.

As Maya stood in line dreaming of Madrid's museums and Paris's glowing Eiffel Tower, her excitement ____ (A) ____ in an instant when she reached for her passport — only to ____ (B) ____ she had left it at home, along with her long-awaited adventure.

(A)

- ① shattered
- ② collapsed
- ③ faded
- ④ plummeted
- ⑤ broke

(B)

- recognize
- prove
- confess
- refute
- deny

빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

[202506H1_20주장추론_변형]

People often ask me, "What surprises you most about habits?" One thing that continually astonishes me is the degree to which we're influenced by sheer convenience. The amount of effort, time, or decision making required by an action has a huge influence on habit formation. To a truly remarkable extent, we're more likely to do something if it's convenient, and less likely if it's not. For this reason, we should pay close attention to the convenience of any activity we want to make into a habit. Putting a wastebasket next to our front door made mail sorting slightly more convenient, and I stopped procrastinating with this chore. Many people report that they do a much better job of staying close to distant family members now that tools like group chats make it easy to stay in touch.

* sheer: 순전한 ** procrastinate: 미루다

What never fails to ____ (A) ____ me about habits is that our choices are shaped by ____ (B) ____ rather than by the effort or decision-making they require.

(A)

- ① surprise
- ② impress
- ③ fascinate
- ④ overwhelm
- ⑤ amaze

(B)

- comfort
- fluency
- efficiency
- clarity
- effortlessness

[202506H1_21합축의미추론_변형]

It is common sense that people's inner beliefs may drive their external behavior. If you're attracted to a certain person, you should be more likely to socialize with that person. If you favor a brand of toothpaste, you're more likely to buy it. Of course, our internal thoughts don't *always* predict our public behavior, but, overall, what we do obviously reflects what we think. But beliefs and behaviors are also related in a more remarkable way. It turns out that the arrow is as likely _____ . As social psychologist David Myers observes, "If social psychology has taught us anything during the last 25 years, it is that we are likely not only to think ourselves into a way of acting but also to act ourselves into a way of thinking."

- ① to vanish into thin air
- ② to split into two directions
- ③ to point in the reverse direction
- ④ to shift toward personal preferences
- ⑤ to lead to fixed patterns of thought

52. 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

[202506H1_22요지추론_변형]

Imagine following the spirit of a silence vow into daily life. Challenge yourself to spend an entire day saying only what you absolutely must say. It's been widely observed by behavioral psychology experts — and anyone who's ever been on a first date — that we too often tend to treat "conversation" as a game of waiting for our own turn to speak. We miss what's being said because we're mentally rehearsing our next utterance. What if you could eliminate the idea that the next available mini-silence is your next opening to express whatever is in your head? What if you were limited to, say, fifty spoken words tomorrow? I think you'd listen quite differently. You'd attend quite carefully to every word you heard. You'd be attuned to what you must respond to. You might discover that the less you say, _____ .

* vow: 서약 ** utterance: 발언 *** attune: 맞추다

- ① the more you hear
- ② the more you doubt
- ③ the louder others speak
- ④ the harder it gets to answer
- ⑤ the less you understand others

53. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것을 고르시오.

[202506H1_23주제추론_변형]

Science is concerned with accumulating and understanding observations of the physical world. That understanding alone solves no problems. Individual people have to act on that understanding for it to help solve problems.

- (A) Problems are only solved when people take the knowledge provided by science and use it. In fact, many of humanity's biggest problems are caused by lack of action, and not lack of knowledge.
- (B) For instance, science has found that regular exercise can lower your risk of heart disease. Knowing this fact is interesting, but it will do nothing for your personal health unless you act on it and actually exercise.
- (C) And that's the hard part. Reading an article about exercise is easy. Getting into an actual routine of regular exercise is harder. In this sense, science really solves *no* problems at all.

* accumulate: 축적하다

- ① (A) - (C) - (B)
- ② (B) - (A) - (C)
- ③ (B) - (C) - (A)
- ④ (C) - (A) - (B)

It is natural for people to observe happenings and then seek explanations for why those happenings occurred. But sometimes the reasoning is wrong because of one or more misconceptions. One of these is the *ecological fallacy*, where an argument claims that there is a causal relationship between two things merely because they occur together. For example, in the 1950s it was found that crime rates were the highest in neighborhoods where immigrants were most numerous. Some people used this "co-occurrence" to argue that immigrants were a cause of crime. But a careful analysis of this situation revealed that immigrants were forced to live in neighborhoods where crime rates were already high; they could not afford more expensive housing in safer neighborhoods. Immigrants themselves committed very few of the crimes. Unless you analyze the claim carefully, you would _____ the relationship and thereby construct a faulty belief.

* immigrant: 이민자

- ① reinforce ② exaggerate ③ misinterpret
④ overlook ⑤ investigate

In everyday life, we use previous experience to predict where we should pay attention. Different environments create different expectations. This was profoundly illustrated by the scientist Jared Diamond in his book *Guns, Germs, and Steel*. He describes an adventure wandering through the New Guinea jungle with native New Guineans. He relates that these natives tend to perform poorly at tasks Westerners have been trained to do since childhood. But they are hardly stupid. They can detect the most subtle changes in the jungle, good for following the tracks of a predator or for finding the way back home. They know which insects to leave alone, know where food exists, can build and tear down shelters with ease. Diamond, who had never spent time in such places, has no ability to pay attention to these things. Were he to be tested on such tasks, he also would perform poorly.

* profoundly: 심오하게 ** subtle: 미묘한

Jared Diamond, who have been in New Guinea jungle with natives, note people _____ (A) _____ at tasks in familiar environments but _____ (B) _____ in unfamiliar ones, regardless of intelligence.

- | (A) | (B) |
|------------|-----------|
| ① shine | adapt |
| ② struggle | thrive |
| ③ excel | suffer |
| ④ fail | struggle |
| ⑤ excel | surrender |

When scientists make an important new discovery or experimentally prove some hypothesis, they do not, in general, keep that information to themselves so that they alone can consider its meaning and derive additional theories from it. Instead, they publish their results and make their data available for inspection. This makes it possible for other scientists to reconsider their data and possibly refute their conclusions. More important, though, it makes it possible for other scientists to use that data to construct new hypotheses and perform new experiments. The assumption is that society as a whole will end up knowing more if information is spread as widely as possible, rather than being limited to a few people. In a strict sense, every scientist depends on the work of other scientists.

* derive: 도출하다 ** refute: 반박하다

Scientific advancement relies not on (A) findings for exclusive benefit, but on (B) data to support shared progress.

(A)

- ① protecting
- ② concealing
- ③ monopolizing
- ④ publishing
- ⑤ storing

(B)

- distributing
- verifying
- sharing
- transmitting
- collecting

[202506H1_35무관한문장_변형]

In the 1930s, the British psychologist Sir Frederic Bartlett asked people to listen to folktales from other countries and then recall these stories at a later date. As you might guess, unfamiliar stories were not remembered as well as familiar stories. Surprisingly, however, errors in memory were not random. Rather, subjects often rewrote similar parts of the stories in their own minds — particularly the parts that made the least sense to them. Bartlett concluded that when facing problems, humans draw upon mental schemata, or shelves of stored knowledge in our brains, to fill in any minor gaps in our memories. Therefore, remembering is _____.

* folktale: 민간 설화

- ① a learned behavior that reflects repeated experiences
- ② a mental activity that relies on subjective interpretation
- ③ an internal mechanism that modifies disconnected elements
- ④ a dynamic process that reorganizes fragmented experiences
- ⑤ an imaginative process that involves building upon past experiences

History, people often say, repeats itself. And looking at the historical records of the ancient civilizations, some things do seem to happen again and again. Civilizations expand, get overextended, and then collapse as in the cases of Rome, which went under in 476 AD, and the British Empire, which fell apart more than a thousand years later in the post-World War II era. But is this always the case? If so, archaeology would be pretty boring; one thing would happen again and again. But that's not what archaeologists see. Some civilizations end suddenly, like the Aztec and Inca, conquered by invaders in the 1520s AD. Those empires never had the chance to collapse as a result of overexpansion. So in the case of civilizations, "history repeats itself" seems to be _____.

* archaeology: 고고학 ** invader: 침입자 *** empire: 제국

- ① a cultural tradition
- ② an oversimplification
- ③ a historical coincidence
- ④ an archaeological discovery
- ⑤ a predictable pattern of history

[202506H1_38문장삽입_변형]

To monitor our surroundings is to focus on what's outside of ourselves: what we see, hear, smell, feel, and perhaps even taste. But sometimes what really marks a place is something less specific — a *feeling* within us. An interesting example emerged from a study of subway passenger behavior. Researchers trying to understand why people sit where they sit or stand where they stand in subway and metro trains examined the factors that shape the way riders used and navigated that space in different situations. One of their findings involved the reasons many riders like to plant themselves close to the train's doors. Partly this was the obvious convenience of being able to exit more quickly. But it was shaped partly by a more abstract sensation — the desire to avoid the sometimes uncomfortable feeling of accidentally making eye contact with seated passengers. We can't see feelings — but they're very real, and they influence _____.

- ① our experience of the world
- ② our perception of daily spaces
- ③ our decisions in shared spaces
- ④ our movements in crowded places
- ⑤ our interpretation of external environments

66. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것을 고르시오.

[202506H1_39문장삽입_변형]

We have a 'diving reflex', like other marine mammals.

- (A) At the same time the heart rate is slowed down to half speed and blood is shunted to the vital organs, protecting them from the effects of the brief stop in breathing. By contrast, if a chimpanzee or a gorilla found itself in water with its face below the surface, it would panic, its heart would race and it would quickly drown.
- (B) But if we sink just our face in a bowl of water, while the whole of the rest of our body is in the dry air, the diving reflex is triggered. It automatically closes down the airway, reducing the risk of swallowing water, and it narrows the small air-passages in the lungs.
- (C) This means that special nerve endings on our faces, around the mouth and nose, trigger this reflex only when the facial region goes under water. If we are in the water, with our head out in the air, there is no diving reflex.

* reflex: 반사 ** trigger: 유발하다 *** shunt: 방향을 돌리다

- ① (A) - (C) - (B) ② (B) - (A) - (C)
③ (B) - (C) - (A) ④ (C) - (A) - (B)
⑤ (C) - (B) - (A)

[202506H1_40요약문추론_변형]

There is a natural assumption of truth, or a truth bias when humans communicate with one another. In other words, when we're listening to others or reading their words, our automatic assumption is that the other person is telling the truth. This usually works out fine. If you ask someone where the restroom is located or if it's raining outside, you can safely assume that most people will not lie in their responses. Imagine how difficult it would be to converse with someone if you assumed that *everything* they were telling you was false! Indeed, questioning the truth of a statement and then choosing not to believe it requires _____. For the most part, humans are "cognitive misers," which means we typically don't expend more mental effort than seems necessary in a given situation. It makes sense then, that when we see something online, even if it is fake, our default is to believe it, at least at first.

* expend: 들이다 ** default: 기본값

- ① additional mental steps
② complete emotional detachment
③ higher levels of linguistic accuracy
④ blind trust in spoken communication
⑤ frequent exposure to false information

[202506H1_23주제추론_변형]

Science is concerned with accumulating and understanding observations of the physical world. That understanding alone solves no problems. Individual people have to act on that understanding for it to help solve problems. For instance, science has found that regular exercise can lower your risk of heart disease. Knowing this fact is interesting, but it will do nothing for your personal health unless you act on it and actually exercise. And that's the hard part. Reading an article about exercise is easy. Getting into an actual routine of regular exercise is harder. In this sense, science really solves *no* problems at all. Problems are only solved when people take the knowledge provided by science and use it. In fact, many of humanity's biggest problems are _____.

* accumulate: 축적하다

- ① the result of a shortage of scientific discoveries
- ② due to unsolvable mysteries of the natural world
- ③ caused by lack of action, and not lack of knowledge
- ④ resulting from the complexity of scientific knowledge
- ⑤ stemming from widespread misunderstandings of science

Stanford psychology professor Dr. Carol Dweck is the internationally recognized pioneer of the concept of "growth mindset" as a way to continually grow, learn, and persevere in our efforts. Dweck found that kids who are told they're "smart" actually underperform in future tasks, by choosing easier tasks to avoid evidence that they are not smart, which Dweck calls having a "fixed mindset." In contrast, Dweck found, kids who are praised not for their smarts but for their effort develop what Dweck calls a "growth mindset." They learn that their effort is what led to their success, and if they continue to try, over time they'll improve and achieve more things. These kids end up taking on tougher things, and feel better about themselves. "Emphasizing effort gives a child a variable that they can control," Dweck has explained.

* persevere: 인내하다 ** variable: 변수

Stanford's Carol Dweck showed that (A) kids for their hard work, not their intelligence, helps them develop a "growth mindset," making them more willing to (B) challenges and grow from their efforts.

(A)

(B)

- | | |
|-----------------|----------|
| ① motivating | avoid |
| ② complimenting | resist |
| ③ rewarding | overcome |

To monitor our surroundings is to focus on what's outside of ourselves: what we see, hear, smell, feel, and perhaps even taste. But sometimes what really marks a place is something less specific — a *feeling* within us.

- (A) One of their findings involved the reasons many riders like to plant themselves close to the train's doors. Partly this was the obvious convenience of being able to exit more quickly.
- (B) But it was shaped partly by a more abstract sensation — the desire to avoid the sometimes uncomfortable feeling of accidentally making eye contact with seated passengers. We can't see feelings — but they're very real, and they influence our experience of the world.
- (C) An interesting example emerged from a study of subway passenger behavior. Researchers trying to understand why people sit where they sit or stand where they stand in subway and metro trains examined the factors that shape the way riders used and navigated that space in different situations.

- ① (A) - (C) - (B) ② (B) - (A) - (C)
③ (B) - (C) - (A) ④ (C) - (A) - (B)
⑤ (C) - (B) - (A)

[202506H1_39문장삽입_변형]

We have a 'diving reflex', like other marine mammals. This means that special nerve endings on our faces, around the mouth and nose, trigger this reflex only when the facial region goes under water. If we are in the water, with our head out in the air, there is no diving reflex. But if we sink just our face in a bowl of water, while the whole of the rest of our body is in the dry air, the diving reflex is triggered. It automatically closes down the airway, reducing the risk of swallowing water, and it narrows the small air-passages in the lungs. At the same time the heart rate is slowed down to half speed and blood is

shunted to the vital organs, protecting them from the effects of the brief stop in breathing. By contrast, if a chimpanzee or a gorilla found itself in water with its face below the surface, it would panic, its heart would race and it would quickly drown.

* reflex: 반사 ** trigger: 유발하다 *** shunt: 방향을 돌리다

The diving reflex is an involuntary (A) response that is triggered when the face is (B) in water.

(A)

- ① aggressive
② medicinal
③ defensive
④ protective
⑤ expressive

(B)

- pressed
submerged
swelling
immersed
contracted

[202506H1_40요약문추론_변형]

There is a natural assumption of truth, or a truth bias when humans communicate with one another.

- (A) Imagine how difficult it would be to converse with someone if you assumed that *everything* they were telling you was false! Indeed, questioning the truth of a statement and then choosing not to believe it requires additional mental steps.
- (B) In other words, when we're listening to others or reading their words, our automatic assumption is that the other person is telling the truth. This usually works out fine. If you ask someone where the restroom is located or if it's raining outside, you can safely assume that most people will not lie in their responses.
- (C) For the most part, humans are "cognitive misers," which means we typically don't expend more mental effort than seems necessary in a given situation. It makes sense then, that when we see something online, even if it is fake, our default is to believe it, at least at first.

* expend: 들이다 ** default: 기본값

- ① (A) - (C) - (B) ② (B) - (A) - (C)
③ (B) - (C) - (A) ④ (C) - (A) - (B)
⑤ (C) - (B) - (A)

[202506H1_41~42장문2문항_변형]

Paying with plastic fundamentally changes the way we spend money, _____. When you buy something with cash, the purchase involves an actual loss — your wallet is literally lighter. Credit cards, however, make the purchase abstract, so that you don't really feel the downside of spending money. Brain-imaging experiments suggest that paying with credit cards actually reduces activity in the insula, a brain region associated with negative feelings. As George Loewenstein, a neuroeconomist at Carnegie Mellon, says, "The nature of credit cards ensures that your brain is anesthetized against the pain of payment." Spending money doesn't feel bad, so you spend more money.

Consider this experiment: Drazen Prelec and Duncan Simester, two business professors at MIT, organized a real-life, sealed-bid auction for tickets to a Boston Celtics game. Half the participants in the auction were informed that they had to pay with cash; the other half were told they had to pay with credit cards. Prelec and Simester then averaged the bids for the two different groups. It turns out that the average credit card bid was *twice* as high as the average cash bid. When people used their credit cards, their bids were much more careless. They no longer felt the need to limit their expenses.

* calculus: 계산법 ** anesthetize: 마비시키다 *** bid: 입찰

88. 윗글의 내용과 일치하지 않는 것은?

- ① Using credit cards basically transforms how we spend money by changing the way we calculate our financial choices.
- ② Paying with credit cards can make spending feel less unpleasant because it reduces activity in the insula.
- ③ The way credit cards work dulls your brain's reaction to the discomfort of paying.
- ④ During the MIT experiment, people using cash placed much higher bids for Boston Celtics tickets.
- ⑤ Using credit cards made people bid more recklessly, as they didn't feel the need to control their spending.

89. 윗글의 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

- ① altering the calculus of our financial decisions
- ② causing us to save less for future financial goals
- ③ leading us to prioritize convenience over budgeting
- ④ changing the emotional value we attach to what we buy
- ⑤ making us underestimate the real cost of our purchases

It is natural for people to observe happenings and then seek explanations for why those happenings occurred. But sometimes the reasoning is wrong because of one or more misconceptions. One of these is the *ecological fallacy*, where an argument claims that there is a causal relationship between two things merely because they occur together. For example, in the 1950s it was found that crime rates were the highest in neighborhoods where immigrants were most numerous. Some people used this "co-occurrence" to argue that immigrants were a cause of crime. But a careful analysis of this situation revealed that (A) 이민자들이 이미 범죄율이 높은 지역에 거주할 수밖에 없었다; they could not afford more expensive housing in safer neighborhoods. Immigrants themselves committed very few of the crimes. (B) 그 주장을 주의 깊게 분석하지 않으면, 당신은 그 관계를 잘못 해석하여 잘못된 믿음을 형성할 수 있다.

* immigrant: 이민자

When scientists make an important new discovery or experimentally prove some hypothesis, they do not, in general, keep that information to themselves so that they alone can consider its meaning and derive additional theories from it. Instead, they publish their results and make their data available for inspection. This makes it possible for other scientists to reconsider their data and possibly refute their conclusions. More important, though, (A) 이것이 다른 과학자들이 새로운 가설들을 세우고 새로운 실험들을 수행하기 위하여 그 데이터를 사용하는 것을 가능하도록 한다. The (B) is that society as a whole will end up knowing more if information is spread as widely as possible, rather than being limited to a few people. In a strict sense, every scientist depends on the work of other scientists.

* derive: 도출하다 ** refute: 반박하다

[202506H1_35무관한문장_변형]

In the 1930s, the British psychologist Sir Frederic Bartlett asked people to listen to folktales from other countries and then recall these stories at a later date. As you might guess, unfamiliar stories were not remembered as well as familiar stories. Surprisingly, however, errors in memory were not random. Rather, subjects often rewrote similar parts of the stories in their own minds — particularly the parts that made the least sense to them. Bartlett concluded that when facing problems, humans draw upon mental schemata, or shelves of stored knowledge in our brains, to fill in any minor gaps in our memories. Therefore, (A) 기억하는 것은 과거의 경험을 기반으로 하는 것을 포함하는 상상의 과정이다.

* folktale: 민간 설화

124. 밑글의 밑줄 친 (A)의 우리말과 같도록 아래 <조건>을 참고하여 알맞게 영작하시오.

<보기>

build / imagine / remember / involves / past / experiences / upon

<조건>

- <보기> 어형 변화 주의, <보기> 포함 총 11단어

125. 밑글을 아래와 같이 요약할 때, 빈칸 ㉠~㉢에 들어갈 단어를 알맞게 채우시오.

According to Bartlett, remembering is not a simple ㉠ of information but an ㉡ process of actively filling in the gaps of unfamiliar stories by using mental schemata, since ㉢ influences the way we reconstruct memories.

[202506H1_36순서추론_변형]

History, people often say, repeats itself. And looking at the historical records of the ancient civilizations, some things do seem to happen again and again. (A) 문명은 확장하고, 과도하게 확장되다가, 결국 붕괴한다. 서기 476년에 멸망한 로마의 경우에서처럼, and the British Empire, which fell apart more than a thousand years later in the post-World War II era. But is this always the case? If so, archaeology would be pretty boring; one thing would happen again and again. But that's not what archaeologists see. Some civilizations end suddenly, like the Aztec and Inca, conquered by invaders in the 1520s AD. Those empires never had the chance to collapse as a result of overexpansion. So in the case of civilizations, "history repeats itself" seems to be an oversimplification.

* archaeology: 고고학 ** invader: 침입자 *** empire: 제국

126. 밑글의 밑줄 친 (A)의 우리말과 같도록 아래 <조건>을 참고하여 알맞게 영작하시오.

Stanford psychology professor Dr. Carol Dweck is the internationally recognized pioneer of the concept of "growth mindset" as a way to continually grow, learn, and persevere in our efforts. (A) Dweck은 "똑똑하다"라는 말을 듣는 아이들은 그들이 똑똑하지 않다는 증거를 피하기 위해 더 쉬운 과제를 선택함으로써 실제로 미래 과제에서 기대에 못 미치는 성과를 낸다는 것을 발견했는데, Dweck은 이를 "고정 사고방식"을 가진 것으로 부른다. In contrast, Dweck found, kids who are praised not for their smarts but for their effort develop what Dweck calls a "growth mindset." They learn that their effort is what led to their success, and if they continue to try, over time they'll improve and achieve more things. These kids end up taking on tougher things, and feel better about themselves. "(B) [they / control / effort / emphasizing / a / a / gives / can / variable / that / child]," Dweck has explained.

* persevere: 인내하다 ** variable: 변수

128. 밑글의 밑줄 친 (A)의 우리말과 같도록 아래 <보기>의 단어를 알맞게 배열하시오.

<보기>

smart, / who / to / told / in future tasks, / are / choosing / they / avoid / by / evidence / are / actually / "smart" / kids / not / that / underperform / easier tasks / they're

Dweck found that _____

which Dweck calls having a "fixed mindset."

[202506H1_39문장삽입_변형]

We have a 'diving reflex', like other marine mammals. This means that special nerve endings on our faces, around the mouth and nose, trigger this reflex only when the facial region goes under water. If we are in the water, with our head out in the air, there is no diving reflex. But if we sink just our face in a bowl of water, while the whole of the rest of our body is in the dry air, the diving reflex is triggered. It automatically closes down the airway, reducing the risk of swallowing water, and it narrows the small air-passages in the lungs. At the same time the heart rate is slowed down to half speed and blood is shunted to the vital organs, protecting them from the effects of the brief stop in breathing. By contrast, if a chimpanzee or a gorilla found itself in water with its face below the surface, it would panic, its heart would race and it would quickly _____.

* reflex: 반사 ** trigger: 유발하다 *** shunt: 방향을 돌리다

132. 밑글을 아래와 같이 요약할 때, 아래 <조건>을 참고하여 요약문을 완성하시오.

<조건>

- 각각 주어진 단어(구)만을 모두 한 번씩 사용

(ㄱ): trigger / reflex / the / diving

(ㄴ): submerged / the face / in / water / is

(ㄷ): helps / by / prevent / down / slowing / the metabolism / drowning

→ Humans (ㄱ) _____ when only (ㄴ) _____, which (ㄷ) _____

133. 밑글의 빈칸에 들어갈 단어를 아래 <보기>의 영영풀이를 참고하여 알맞게 쓰시오.

<보기>

[VERB] to die through submersion in and inhalation of water

→ d _____

[202506H1_40요약문추론_변형]

There is a natural assumption of truth, or a truth bias when humans communicate with one another. In other words, when we're listening to others or reading their words, our automatic assumption is that the other person is telling the truth. This usually works out fine. (A) 만약 당신이 누군가에게 화장실이 어디 있는지 나 밖에 비가 오고 있는지를 물어 본다면, you can safely assume that most people will not lie in their responses. (B) 만약 당신이 그들이 당신에게 말하는 '모든 것'이 거짓이라고 가정한다면 누군가와 대화하는 것이 얼마나 어려울지 상상해 보라! Indeed, questioning the truth of a statement and then choosing not to believe it requires additional mental steps. For the most part, humans are "cognitive misers," which means we typically don't expend more mental effort than seems necessary in a given situation. It makes sense then, that when we see something online, even if it is fake, our default is to believe it, at least at first.

* expend: 들이다 ** default: 기본값

134. 밑줄의 밑줄 친 (A)의 우리말과 같도록 아래 <보기>의 단어를 알맞게 배열하시오.

(A) 신용카드로 지불하는 것은 우리가 돈을 소비하는 방식을 근본적으로 바꾸며, 우리의 재정적 결정에 대한 계산법을 변화시킨다. When you buy something with cash, the purchase involves an actual loss — your wallet is literally lighter. Credit cards, however, make the purchase abstract, so that you don't really feel the downside of spending money. Brain-imaging experiments suggest that paying with credit cards actually reduces activity in the insula, a brain region associated with negative feelings. As George Loewenstein, a neuroeconomist at Carnegie Mellon, says, "The nature of credit cards ensures that your brain is anesthetized against the pain of payment." Spending money doesn't feel bad, so you spend more money.

Consider this experiment: Drazen Prelec and Duncan Simester, two business professors at MIT, organized a real-life, sealed-bid auction for tickets to a Boston Celtics game. Half the participants in the auction were informed that they had to pay with cash ; the other half were told they had to pay with credit cards. Prelec and Simester then averaged the bids for the two different groups. (B) 평균 신용카드 입찰 금액은 평균 현금 입찰 금액의 '두 배'만큼 높은 것으로 나타났다. When people used their credit cards, their bids were much more careless. They no longer felt the need to limit their expenses.

* calculus: 계산법 ** anesthetize: 마비시키다 *** bid: 입찰

The sun shone in the cloudless sky as Becky, a retired teacher, walked to the fruit market. Across town, Dana was riding a bus towards the museum for a job interview. Just before reaching her stop, Dana noticed the sky had suddenly darkened. Her heart sank — she had no umbrella. **(A) Becky가 장보기를 막 끝낸 시장 옆에서 그녀가 버스에서 내렸을 때, 빗방울이 떨어지기 시작했다.**

Dana felt panic. She didn't want to show up to her interview soaked. She looked around but couldn't find any stores nearby to buy an umbrella, and she didn't have time to search around. Just then, Becky approached her, holding an open umbrella in one hand and a closed one in the other. "Take this," she said with a smile. Dana's eyes widened. "Are you sure?" Becky nodded. "I always carry an extra on rainy days."

Dana thanked her, took the umbrella, and opened it. She saw a small card tied to the handle. It read: "Cover each other." She was touched by the message. She hurried to the museum, arriving dry and comfortable, and performed well in her interview. The Museum CEO was impressed by Dana and offered her the Event Manager position, her dream job. Throughout the years ahead, she often thought back to Becky's kind gesture.

(B) 그 기억에 영감을 받아서, Dana는 다른 사람을 돕는 사람들의 그림들로 "서로를 감싸주세요"라는 미술관 행사를 만들었다. She donated half of the money from ticket sales to families who lost their homes to natural disasters. Dana kept Becky's message framed in her office as a reminder that one kind gesture could change someone's life. The kindness of one stranger had shaped her path, and she made sure it continued to shape the world.

* soaked 흠뻑 젖은

Dear Dog Owners,

My name is Lily Paxton, and I'm the town's Pet Program Coordinator. Ⓐ As part of our goal to make the community more dog-friendly, we recently opened a new dog park. Ⓑ The park designed to provide an enjoyable experience for both dogs and owners. Ⓒ There are big grassy areas which your dogs can run, jump, and play. We have separate spaces for small dogs and big dogs, to ensure safety. You'll also find lots of benches and areas for resting and staying cool. Ⓓ We hope you will have a wonderful time with your dogs in this newly opened park.

Regards,

Lily Paxton, Pet Program Coordinator

Ⓐ It is natural for people to observe happenings and then seek explanations for what those happenings occurred. But sometimes the reasoning is wrong because of one or more misconceptions. Ⓑ One of these is the *ecological fallacy*, which an argument claims that there is a causal relationship between two things merely because they occur together. For example, Ⓒ in the 1950s it was found that crime rates were the highest in neighborhoods where immigrants were most numerous. Some people used this “co-occurrence” to argue that immigrants were a cause of crime. Ⓓ But a careful analysis of this situation revealed that immigrants were forced living in neighborhoods where crime rates were already high; they could not afford more expensive housing in safer neighborhoods. Immigrants themselves committed very few of the crimes. Ⓔ Unless you analyze the claim carefully, you would misinterpret the relationship and thereby construct a faulty belief.

* immigrant: 이민자

[202506H1_32빈칸추론_변형]

Most entrepreneurs put in tremendous amounts of time and effort in creating and launching new products and services and then make the mistake of overpricing them. ㉠ They have created something they care deeply about, it's theirs, and ㉡ this powerful sense of ownership distorts their perception of value which causes them overpricing their products. While many of them are quick to realize that their initial prices are too high, ㉢ not all these people are happy or willing to drop their prices to make their products more attractively. ㉣ And this can be a very costly mistake that may lead to the failure of their new business. When you launch a new product or service, your priority should be to get sufficient market adoption as soon as possible and you should be ready to sacrifice your initial prices and profits to achieve this aim. Once you have strong sales volumes, you can increase your prices to maximize your profits.

We have a 'diving reflex', like other marine mammals. ㉠ This means that special nerve endings on our faces, around the mouth and nose, to trigger this reflex only when the facial region goes under water. If we are in the water, with our head out in the air, there is no diving reflex. But if we sink just our face in a bowl of water, while the whole of the rest of our body is in the dry air, the diving reflex is triggered. ㉢ It automatically closes down the airway, reduce the risk of swallowing water, and it narrows the small air-passages in the lungs. At the same time ㉡ the heart rate is slowed down to half speed and blood is shunted to the vital organs, protecting them from the effects of the brief stop in breathing. By contrast, ㉣ if a chimpanzee or a gorilla found itself in water with its face below the surface, it would panic, its heart would race and it would quickly drown.

* reflex: 반사 ** trigger: 유발하다 *** shunt: 방향을 돌리다

There is a natural assumption of truth, or a truth bias when humans communicate with one another. In other words, when we're listening to others or reading their words, ㉠ our automatic assumption is that the other person is telling the truth. This usually works out fine. ㉢ If you ask someone what the restroom is located or if it's raining outside, you can safely assume that most people will not lie in their responses. ㉡ Imagine how difficult it would be to converse with someone if you assumed that everything they were telling you were false! Indeed, questioning the truth of a statement and then choosing not to believe it requires additional mental steps. For the most part, ㉣ humans are "cognitive misers," that means we typically don't expend more mental effort than seems necessary in a given situation. ㉤ It makes sense then, that when we see something online, even if it is fake, our default is to believe it, at least at first.

* expend: 들이다 ** default: 기본값

㉠ Paying with plastic fundamentally changes the way we spend money, alters the calculus of our financial decisions. When you buy something with cash, the purchase involves an actual loss — your wallet is literally lighter. **㉢ Credit cards, however, make the purchase abstract, so that you don't really feel the downside of spending money.** Brain-imaging experiments suggest that paying with credit cards actually reduces activity in the insula, a brain region associated with negative feelings. As George Loewenstein, a neuroeconomist at Carnegie Mellon, says, "The nature of credit cards ensures that your brain is anesthetized against the pain of payment." Spending money doesn't feel bad, so you spend more money.

Consider this experiment: Drazen Prelec and Duncan Simester, two business professors at MIT, organized a real-life, sealed-bid auction for tickets to a Boston Celtics game. **㉡ Half the participants in the auction informed that they had to pay with cash; the other half were told they had to pay with credit cards.** Prelec and Simester then averaged the bids for the two different groups. **㉣ It turns out that the average credit card bid was twice as high as the average cash bid.** **㉤ When people used their credit cards, their bids were much more careless.** They no longer felt the need to limit their expenses.

* calculus: 계산법 ** anesthetize: 마비시키다 *** bid: 입찰

[202506H1_43~45장문3문항_변형]

The sun shone in the cloudless sky as Becky, a retired teacher, walked to the fruit market. Across town, Dana was riding a bus towards the museum for a job interview. Just before reaching her stop, Dana noticed the sky had suddenly darkened. Her heart sank — she had no umbrella. **㉠ As she stepped off the bus next to the market, which Becky had just finished shopping, raindrops began to fall.**

Dana felt panic. She didn't want to show up to her interview soaked. She looked around but couldn't find any stores nearby to buy an umbrella, and she didn't have time to search around. Just then, **㉢ Becky approached her, holding an open umbrella in one hand and a closed one in the other.** "Take this," she said with a smile. Dana's eyes widened. "Are you sure?" Becky nodded. "I always carry an extra on rainy days."

Dana thanked her, took the umbrella, and opened it. She saw a small card tied to the handle. It read: "Cover each other." She was touched by the message. **㉡ She hurried to the museum, arriving dry and comfortable, and performing well in her interview.** The Museum CEO was impressed by Dana and offered her the Event Manager position, her dream job. Throughout the years ahead, she often thought back to Becky's kind gesture.

㉣ Inspired by the memory, Dana created a museum event calling "Cover Each Other" with paintings of people supporting others. She donated half of the money from ticket sales to families who lost their homes to natural disasters. **㉤ Dana kept Becky's message framed in her office as a reminder that one kind gesture could change someone's life.** The kindness of one stranger had shaped her path, and she made sure it continued to shape the world.

Dear Dog Owners,

My name is Lily Paxton, and I'm the town's Pet Program Coordinator. As part of our goal to make the community more dog-friendly, we recently opened a new dog park. The park was designed providing an enjoyable experience for both dogs and owners. There are big grassy areas which your dogs can run, jump, and play. We have separate spaces for small dogs and big dogs, to ensure safety. You'll also find lots of benches and areas for resting and stay cool. We hope you will have a wonderful time with your dogs in this newly opened park.

Regards,

Lily Paxton, Pet Program Coordinator

People often ask me, "What surprises you most about habits?" One thing that continually astonishes me is the degree which we're influenced by sheer convenience. The amount of effort, time, or decision making required by an action have a huge influence on habit formation. To a truly remarkable extent, we're more likely to do something if it's convenient, and less likely if it's not. For this reason, we should pay close attention to the convenience of any activity we want to make into a habit. Put a wastebasket next to our front door made mail sorting slightly more conveniently, and I stopped procrastinating with this chore. Many people report what they do a much better job of staying close to distant family members now that tools like group chats make it easy to stay in touch.

It is common sense that people's inner beliefs may drive their external behavior. If you're attracting to a certain person, you should be more likely to socialize with that person. If you favor a brand of toothpaste, you're more likely to buy it. Of course, our internal thoughts don't *always* predict our public behavior, but, overall, what do we obviously reflects what we think. But beliefs and behaviors are also related in a more remarkable way. It turns out what the arrow is as likely to point in the reverse direction. As social psychologist David Myers observes, "If social psychology has been taught us anything during the last 25 years, it is that we are likely not only to think ourselves into a way of acting but also acting ourselves into a way of thinking."

Imagine following the spirit of a silence vow into daily life. Challenge yourself to spend an entire day to say only that you absolutely must say. It's been widely observed by behavioral psychology experts — and anyone who's ever been on a first date — what we too often tend to treat "conversation" as a game of waiting for our own turn to speak. We miss what's being said because we're mentally rehearsing our next utterance. What if you could eliminate the idea which the next available mini-silence is your next opening to express however is in your head? What if you were limited to, say, fifty spoken words tomorrow? I think you'd listen quite differently. You'd attend quite carefully to every word you heard. You'd be attuned to how you must respond to. You might discover that the less you say, the more you hear.

Science is concerned with accumulating and understanding observations of the physical world. That understanding alone solves no problems. Individual people have to act on that understanding for it to help solve problems. For instance, science has found what regular exercise can lower your risk of heart disease. Knowing this fact is interesting, but it will do nothing for your personal health unless you will act on it and actually exercise. And that's the hard part. Reading an article about exercise is easy. Getting into an actual routine of regular exercise are harder. In this sense, science really solves *no* problems at all. Problems are only solved when people take the knowledge provided by science and used it. In fact, many of humanity's biggest problems are caused by lack of action, and not lack of knowledge.

We think we're being logical, objective, and rational — and therefore accurate in our analysis, judgment, and decisions. So we think what if other people are logical, objective, and rational, they will agree with us and see that we see. But the opposite is the case. Every human brain is different. Everyone's life experience is different. Everyone's desires and knowledge are different. You might think you're being realistic — that is, that your ideas match reality, but that's impossible. It's only your interpretation of reality, that will always be different from someone else's. When two nations play each other in the World Cup, the fans of each country criticizes the referees for missing all the infractions that the other team commits. Without fail, each fan base believes that the referees are biased against their team.

Edward O. Wilson was born in Birmingham, Alabama, in 1929. In his early childhood, he became interesting in nature and spent much time in the outdoors. At age seven, he was partially blinded in a fishing accident; his reduced sight led Wilson to the study of ants. He could not observe larger animals from a distance. Instead, he concentrated on smaller creatures he could study up close. After studying evolutionary biology at the University of Alabama, Wilson transferred to Harvard University, which he became a professor in 1956. He never received a Nobel Prize — the prize didn't recognize research in the field of evolutionary biology. However, he awarded the Crafoord Prize in 1990. Wilson, knew to some as the "modern-day Darwin", died at the age of 92 in Massachusetts.

Studies of experts provide insight into which it means to have deep and flexible understanding. Experts in a particular domain is people who have deep, richly interconnected ideas about the world. They are not just good thinkers or people who are exceptionally smart. Rather, experts have knowledge in a specific domain — such as chess, chemistry, or tennis — and is not generalists. However, experts do not just know “a bunch of facts.” In fact, having expertise in a topic means what knowledge is organized into coherent frameworks, and the expert understands the inter-relationship between facts and can distinguish which ideas are most central. This kind of deep but organized understanding allows for greater flexibility in learning and facilitating application across multiple contexts.

It is natural for people to observe happenings and then seek explanations for why those happenings occurred. But sometimes the reasoning is wrong because one or more misconceptions. One of these is the *ecological fallacy*, which an argument claims that there is a causal relationship between two things merely because they occur together. For example, in the 1950s it was found that crime rates were the highest in neighborhoods which immigrants were most numerous. Some people used this "co-occurrence" to argue that immigrants were a cause of crime. But a careful analysis of this situation revealed that immigrants were forced living in neighborhoods which crime rates were already high; they could not afford more expensive housing in safer neighborhoods. Immigrants themselves committed very few of the crimes. Unless you analyze the claim carefully, you would misinterpret the relationship and thereby constructing a faulty belief.

* immigrant: 이민자

In everyday life, we use previous experience to predict where should we pay attention. Different environments create different expectations. This was profoundly illustrated by the scientist Jared Diamond in his book *Guns, Germs, and Steel*. He describes an adventure wandering through the New Guinea jungle with native New Guineans. He relates that these natives tend to perform poorly at tasks where Westerners have been trained to do since childhood. But they are hardly stupid. They can detect the most subtle changes in the jungle, good for following the tracks of a predator or for finding the way back home. They know which insects to leave alone, knowing where food exists, can build and tear down shelters with ease. Diamond, who had never spent time in such places, have no ability to pay attention to these things. Were he to be tested on such tasks, he also would have performed poorly.

Most entrepreneurs put in tremendous amounts of time and effort in creating and launching new products and services and then make the mistake of overpricing it. They have created something they care deeply about, it's theirs, and this powerful sense of ownership distorts their perception of value which causes them overpricing their products. While many of them are quick to realize what their initial prices are too high, not all these people are happy or willing to drop their prices to make their products more attractively. And this can be a very costly mistake what may lead to the failure of their new business. When you launch a new product or service, your priority should be to get sufficient market adoption as soon as possible and you should be ready to sacrifice your initial prices and profits to achieve this aim. Once you have strong sales volumes, you can increase your prices to maximize your profits.

Stanford psychology professor Dr. Carol Dweck is the internationally recognized pioneer of the concept of "growth mindset" as a way to continually grow, learn, and persevere in our efforts. Dweck found that kids who tell they're "smart" actually underperform in future tasks, by choosing easier tasks to avoid evidence which they are not smart, that Dweck calls having a "fixed mindset." In contrast, Dweck found, kids who are praised not for their smarts but for their effort develop that Dweck calls a "growth mindset." They learn that their effort is that led to their success, and if they continue to try, over time they'll improve and achieve more things. These kids end up to take on tougher things, and feel better about themselves. "Emphasizing effort gives a child a variable that they can control," Dweck has explained.

To monitor our surroundings is to focus on what's outside of ourselves: that we see, hear, smell, feel, and perhaps even taste. But sometimes that really marks a place is something less specific — a *feeling* within us. An interesting example emerged from a study of subway passenger behavior. Researchers tried to understand what people sit where they sit or stand where they stand in subway and metro trains examined the factors that shape the way riders used and navigated that space in different situations. One of their findings involved the reasons which many riders like to plant themselves close to the train's doors. Partly this was the obvious convenience of being able to exit more quickly. But it was shaped partly by a more abstract sensation — the desire to avoid the sometimes uncomfortable feeling of accidentally make eye contact with seated passengers. We can't see feelings — but they're very real, and they influence our experience of the world.

We have a 'diving reflex', like other marine mammals. This means that special nerve endings on our faces, around the mouth and nose, triggers this reflex only when the facial region goes under water. If we are in the water, with our head out in the air, there is no diving reflex. But if we sink just our face in a bowl of water, while the whole of the rest of our body is in the dry air, the diving reflex is triggered. It automatically closes down the airway, reduce the risk of swallowing water, and it narrows the small air-passages in the lungs. At the same time the heart rate is slowed down to half speed and blood is shunted to the vital organs, protect them from the effects of the brief stop in breathing. By contrast, if a chimpanzee or a gorilla found it in water with its face below the surface, it would panic, its heart would race and it would quickly drown.

There is a natural assumption of truth, or a truth bias when humans communicate with one another. In other words, when we're listening to others or reading their words, our automatic assumption is that the other person is telling the truth. This usually works out fine. If you ask someone where is the restroom located or if it's raining outside, you can safely assume that most people will not lie in their responses. Imagine how difficult would it be to converse with someone if you assumed that *everything* they were telling you were false! Indeed, questioning the truth of a statement and then choosing not to believe it requires additional mental steps. For the most part, humans are "cognitive misers," that means we typically don't expend more mental effort than seems necessary in a given situation. It makes sense then, which when we see something online, even if it is fake, our default is to believe it, at least at first.

Paying with plastic fundamentally changes the way we spend money, altered the calculus of our financial decisions. When you buy something with cash, the purchase involves an actual loss — your wallet is literally lighter. Credit cards, however, make the purchase abstractly, so that you don't really feel the downside of spending money. Brain-imaging experiments suggest that paying with credit cards actually reduces activity in the insula, a brain region associating with negative feelings. As George Loewenstein, a neuroeconomist at Carnegie Mellon, says, "The nature of credit cards ensures that your brain is anesthetized against the pain of payment." Spending money doesn't feel bad, so you spend more money.

Consider this experiment: Drazen Prelec and Duncan Simester, two business professors at MIT, organized a real-life, sealed-bid auction for tickets to a Boston Celtics game. Half the participants in the auction was informed what they had to pay with cash; the other half told they had to pay with credit cards. Prelec and Simester then averaged the bids for the two different groups. It turns out that the average credit card bid was *twice* as high as the average cash bid. When people used their credit cards, their bids were much more careless. They no longer felt the need to limit their expenses.

* calculus: 계산법 ** anesthetize: 마비시키다 *** bid: 입찰

[202506H1_43~45장문3문항_변형]

The sun shone in the cloudless sky as Becky, a retired teacher, walking to the fruit market. Across town, Dana was riding a bus towards the museum for a job interview. Just before reaching her stop, Dana noticed the sky had suddenly darkened. Her heart sank — she had no umbrella. As she stepped off the bus next to the market, which Becky had just finished shopping, raindrops began to fall.

Dana felt panic. She didn't want to show up to her interview soaked. She looked around but couldn't find any stores nearby to buy an umbrella, and she didn't have time to search around. Just then, Becky approached her, held an open umbrella in one hand and a closed one in the other. "Take this," she said with a smile. Dana's eyes widened. "Are you sure?" Becky nodded. "I always carry an extra on rainy days."

Dana thanked her, took the umbrella, and opened it. She saw a small card tied to the handle. It read: "Cover each other." She was touched by the message. She hurried to the museum, arriving dry and comfortable, and performing well in her interview. The Museum CEO was impressed by Dana and offered her the Event Manager position, her dream job. Throughout the years ahead, she often thought back to Becky's kind gesture.

Inspired by the memory, Dana created a museum event called "Cover Each Other" with paintings of people supported others. She donated half of the money from ticket sales to families who lost their homes to natural disasters. Dana kept Becky's message framed in her office as a reminder which one kind gesture could change someone's life. The kindness of one stranger had shaped her path, and she made sure it continued to shape the world.

The sun shone in the cloudless sky as Becky, a retired teacher, walked to the fruit market. Across town, Dana was riding a bus towards the museum for a job interview. Just before reaching her stop, Dana noticed the sky had suddenly ㉠ d_____. Her heart sank — she had no umbrella. As she stepped off the bus next to the market, where Becky had just finished shopping, raindrops began to fall.

Dana felt panic. She didn't want to show up to her interview soaked. She looked around but couldn't find any stores nearby to buy an umbrella, and she didn't have time to search around. Just then, Becky approached her, holding an open umbrella in one hand and a closed one in the other. "Take this," she said with a smile. Dana's eyes widened. "Are you sure?" Becky nodded. "I always carry an ㉡ e_____ on rainy days."

Dana thanked her, took the umbrella, and opened it. She saw a small card tied to the handle. It read: "Cover each other." She was ㉢ t_____ by the message. She hurried to the museum, arriving dry and comfortable, and performed well in her interview. The Museum CEO was impressed by Dana and offered her the Event Manager position, her dream job. Throughout the years ahead, she often thought back to Becky's kind gesture.

㉣ i_____ by the memory, Dana created a museum event called "Cover Each Other" with paintings of people supporting others. She donated half of the money from ticket sales to families who lost their homes to natural disasters. Dana kept Becky's message framed in her office as a ㉤ r_____ that one kind gesture could change someone's life. The kindness of one stranger had shaped her path, and she made sure it continued to shape the world.

* soaked 흠뻑 젖은

㉠ _____ ㉡ _____ ㉢ _____

㉣ _____ ㉤ _____

81	82	83	84	85	86	87	88	89	
④	④	①	④	④	④	②	④	①	

1) ④

[해설]

안전을 보장하기 위해 크기별로 소형견과 대형견을 위한 별도의 공간이 마련되어 있다.

2) ⑤ 출발선에서 끝난 여정

[해설]

- ① 아무 데도 갈 수 없는 항공편
- ② 여행을 계획하는 즐거움
- ③ 에펠탑과 그 밖의 놀라움들
- ④ 한 줄, 한 기회, 한 번의 실수

3) ⑤ difficult (어려운) → easy(쉬운)

[해설]

전체 글의 주제는 "편의성(convenience)이 습관 형성에 긍정적 영향을 준다"는 것으로, 도구들이 연락을 '쉽게(easy)' 만들어서 사람들이 더 잘 연락하게 된다는 맥락이므로, 그 반대 의미인 '어렵게(difficult)'는 문맥에 어긋난다.

4) ⑤ arbitrary (임의의) → reverse (반대의)

[해설]

신념이 행동을 이끌 수 있지만 그 반대로 행동이 사고를 이끌 가능성도 있다.

5) ⑤ which → what

[해설]

관계대명사

- 전치사 'to'의 목적어 자리이며, 뒤에 목적어가 없는 불완전한 문장이므로 'what'으로 고쳐야 한다.

6) ⑤ 행동이 없으면 과학적 이해는 문제를 다루는 데에 도움이 되지 않는다.

[해설]

과학은 반복적인 관찰과 이해와 관련이 있지만 이해만으로는 문

제를 해결할 수 없으며, 행동으로 이어져야 문제를 해결하는 데 도움을 줄 수 있다는 내용의 글로, "과학은 사실 어떤 문제도 해결하지 않는다"는 과학적 지식의 습득과 이해가 행동으로 이어져야 문제 처리에 도움이 된다는 것을 의미한다.

① 관찰하는 것만으로도 과학을 이해하는 데 도움을 준다.

② 과학은 반복적인 실험을 통해서 확립된다.

③ 과학적 지식을 많이 습득하면 문제 해결에 도움이 된다.

④ 과학에 대한 이해가 높을수록 문제 해결 속도가 빨라진다.

7) ③ 사람들이 세상을 같은 방식으로 보는 경우가 드물다.

[해설]

사람들은 자신이 논리적이고 객관적이라고 믿지만, 사실 각자의 뇌 구조와 경험, 욕망, 지식이 달라서 동일한 현실을 전혀 다르게 해석하며, 이는 객관성의 환상을 만들어낸다는 내용의 글로, 밑줄의 '사실은 정반대다'는 '사람들이 세상을 다르게 본다'는 것을 의미한다. 따라서 ③번의 사람들이 세상을 같은 방식으로 보는 경우가 드물다가 가장 적절하다.

① 이 생각은 대부분의 사람들에게 해당된다.

② 논리와 객관성은 합의를 보장한다.

④ 공유된 가치관은 공유된 관점으로 이어진다.

⑤ 결국 모든 사람은 같은 결론에 도달한다.

8) ② entirely (완전히) → partially (부분적으로)

[해설]

사고로 좁아진 시야로 인해 가까이 연구할 수 있는 더 작은 생물에 집중했으므로 완전 설명이 아닌 부분적 설명이다.

9) ③ 전문가들이 그들의 지식을 어떻게 정리해서 사용하는가

[해설]

① 지능이 높은 사람들이 공유하는 공통적인 특징들

② 전문성 개발에서 융통성(유연성)의 역할

④ 왜 일반적인 지식이 전문 지식보다 더 나은가

⑤ 지능과 전문성의 차이

10) ④ 이민자들 스스로 거주지와 관계없이 흉악 범죄와 상당히 연루되어 있었다.

[해설]

이민자들은 재정적 이유로 범죄율이 높은 지역에 거주할 수밖에 없었고 그들 스스로는 범죄를 거의 저지르지 않았다.

① 사람들은 관찰된 사건에 대해 자연스럽게 설명을 찾으려 하지만, 이러한 설명은 때때로 잘못될 수 있다.

② 생태학적 오류는 두 가지가 단지 동시에 발생한다는 이유만으로 인과 관계가 있다고 주장될 때 발생한다.

③ 더 안전한 동네가 비쌌기 때문에, 이민자들은 결국 범죄율이 높은 지역에 살게 되었다.

⑤ 주장을 철저히 분석하지 않으면 관계를 잘못 해석하여 잘못된 믿음을 형성할 수 있다.

11) ② wanders → wandering

[해설]

능동 현재분사구문

- 정동사 describes가 있어 준동사가 필요하며 주어와 능동의 관계이고 접속사가 없으므로 현재분사 'wandering'으로 고쳐야 한다.

12) ⑤ 혁신의 숨겨진 비용: 왜 제품 창작자들이 종종 자기 제품 가격을 너무 높게 책정하는가

[해설]

① 진심을 담아 창조하기: 왜 내 제품을 사랑하는 것이 보상을 주는가

② 열정이 시장을 만나다: 기업가들이 신념으로 성공하는 방법

③ 애착의 함정: 열정이 왜 당신 제품의 매력을 높일 수 있는가

④ 애착의 대가: 감정적 결정이 어떻게 제품 기능을 망치는가

13) ⑤ become → becoming

[해설]

전치사의 목적어

- make it to : ~에 이른다. 도달하다.
'make it'이 동반하는 'to'는 전치사이다. 전치사의 목적어는 명사 또는 동명사가 적절하므로 'becoming'으로 고쳐야 한다.

14) ⑤ 공동의 발전을 위한 과학 지식 공유의 중요성

[해설]

- ① 과학 연구 결과를 비밀로 하는 이유들
- ② 타인의 실험을 검증하는 데 따르는 어려움
- ③ 과학자들 사이의 협력의 중요성
- ④ 개별 과학 발전에서 소통이 하는 역할

15) ⑤ 과거 다시 쓰기: 우리의 마음이 빈틈을 채우는 방식

[해설]

- ① 우리가 잊는 것은 우리가 누구인지를 드러낸다
- ② 이야기 회상하기: 기억의 정확성의 시험
- ③ 인간 기억의 예측할 수 없는 특성
- ④ 민담이 우리의 문화적 기억을 형성하는 방식

16) ⑤ 문명은 왜 항상 같은 방식으로 몰락하지 않는가

[해설]

- ① 문명 붕괴의 뿌리 찾기
- ② 제국들의 운명: 로마에서 브리튼까지
- ③ 고대 유적을 통해 과거 탐구하기
- ④ 문명 몰락에 숨겨진 갈등과 정복

17) ⑤

- ⑤ 우리가 공간과 상호작용을 하는 방식은 외부 환경뿐만 아니라 내면에 있는 보이지 않는 감정에도 달려 있다.

[해설]

- ① 우리가 차지하는 공간은 주변 사람들과 어떻게 상호작용을 하는지에 영향을 준다.
- ② 우리는 더 쉽게 나갈 수 있는 편리함 같은 이유로 공공장소의 자리를 고른다.
- ③ 우리는 오로지 논리적 사고와 실용적 필요에 따라 환경을 탐색한다.
- ④ 물리적 환경이 인간 행동을 형성하는 데 있어 감정적 요소보다 더 중요하다.

19) ③

[해설]

(A) 수일치

- 주어는 'that절' 안에 있는 'special nerve endings'이므로, 복수 동사 'trigger'이 와야 한다.

(B) 현재분사 vs 과거분사

- 주어와 능동 관계이며, 목적어 'the risk of swallowing water'를 취하므로, 능동의 의미를 가진 현재분사 'reducing'이 와야 한다.

(C) 가정법 과거

- 주절의 동사가 'would + 동사원형' 이므로, 가정법 과거의 형태로 'found'가 와야 한다.

20) ③ 진실 편향: 왜 의심하는 데 더 많은 노력이 드는가

[해설]

- ① 왜 의심이 진실의 열쇠인가
- ② 너무 쉽게 믿는 것의 숨겨진 대가
- ③ 기본적으로 믿음: 인간의 변하지 않는 특성
- ⑤ 진실의 함정: 왜 우리는 거짓 정보에 속는가

21) ③ which → where

[해설]

관계부사

- 주어 동사를 포함한 완전한 문장이 오기 때문에 관계부사 where로 고쳐야 한다.

22) ③ approached to → approached

[해설]

3형식 타동사

- 동사 'approach'는 타동사로 전치사 없이 동사 뒤에 바로 목적어가 와야 한다.

23) ③ does → is

[해설]

대동사

- 'if it is not convenient'의 대동사 형태로 'if it is not'으로 고쳐야 한다.

24) ③ reflect → reflects

[해설]

명사절 수 일치

- 관계대명사 what을 포함한 명사절은 단수 취급하므로 'reflects'로 고쳐야 한다.

25) ④ 침묵: 대화의 또 다른 절반

[해설]

- ① 우리가 듣지 못하는 이유
- ② 현대사회의 소음으로부터의 탈출
- ③ 우리는 들리기 위해 말하는 것인가?
- ⑤ 과도한 말이 우리를 외롭게 만드는 이유

- ④ 과학 지식은 사람들이 그것을 자신의 삶에 적극적으로 적용할 때만 문제를 해결할 수 있다.

[해설]

- ① 과학 지식의 부족이 인류가 직면한 많은 문제의 원인이다.
- ② 과학에 따르면 규칙적인 운동이 심장병을 예방하는 유일한 효과적인 방법이다.
- ③ 과학적 사실을 이해하는 것은 어렵고 종종 사람들이 행동하지 못하게 한다.
- ⑤ 사람들이 행동하지 않는 것이 과학이 종종 현실 세계의 문제를 해결하지 못하는 주된 이유다.

27) ③

28) ② 7 → 6

[해설]

- 네덜란드는 2018년 9.1, 2019년 15.3으로 6.2 증가했다.

29) ④ which → where

[해설]

관계부사

- 주어 동사 보어를 포함한 완전한 문장이므로 관계부사 where로 고쳐야 한다.

30) ④

[해설]

- ① 오전 10시 ~ 오후 8시 진행된다.
- ② 실내 식물을 구매할 수 있다.
- ③ 식물을 2개 사면 커피를 할인받을 수 있다.
- ⑤ 외부 음식과 음료를 반입할 수 없다.

31) ④

[해설]

- 의상을 입은 캐릭터의 퍼레이드가 있다.

32) ③ 지식을 다른 상황에 옮겨 적용하는 것

[해설]

- 앞 문장에서는 전문가의 지식은 단순한 정보의 집합이 아니라, 서로 연결되고 중심 개념이 뚜렷한 구조화된 형태라고 설명한다. 따라서 단순히 한 분야에서만 통하는 지식이 아닌, 다른 맥락으로 지식을 전이하여 활용할 수 있는 능력을 의미한다.

- ① 같은 방식으로 문제를 반복적으로 푸는 것
- ② 연결 없이 단편적인 사실들을 암기하는 것
- ④ 구체적인 사례 없이 일반적인 개념만 이해하는 것
- ⑤ 한 분야에선 깊이 있게 배우지만 다른 데선 어려움을 겪는 것

33) ② 원인으로 성급히 뛰어들기: 우리의 설명이 자주 틀리는 이유

[해설]

- ① 사건을 설명할 때 빠른 판단의 함정
- ③ 존재하지 않는 패턴을 보는 것: 인간 사고의 습관
- ④ 잘못된 대상 비난하기: 이민자와 범죄에 관한 사례
- ⑤ 잘못된 믿음, 진짜 결과들: 일상에서 사건을 잘못 해석하는 것

34) ④ 사람들은 익숙한 환경에서의 경험에 의해 형성된 것들에 주의를 기울인다.

[해설]

- ① 주의력은 환경과 관계없이 안정적으로 유지된다.
- ② 대부분의 생존 기술은 훈련보다 본능에 더 많이 의존한다.
- ③ 지식 수준의 차이는 문화적 배경으로 설명될 수 있다.
- ⑤ 지능은 문화적 기준이 아니라 생존 능력에 따라 측정되어야 한다.

35) ③ what → that

[해설]

명사절 접속사 that

- 동사 'realize'의 목적어 자리로 명사절이 필요하며, 뒤에 완전한 문장이 오므로 'that'으로 고쳐야 한다.

36) ③ 쥐는 자녀 수가 많고, 대부분이 성체가 되어 번식에 성공한다.

[해설]

쥐의 새끼들은 대부분은 어릴 때 죽는다고 명시하고 있기에, 성체가 되어 번식에 성공한다는 말은 일치하지 않는다.

- ① 인간은 천천히 성장하고 자녀 수는 적지만 양육에 많은 에너지를 쓴다.
- ② 쥐는 생후 1년 동안 여러 번 번식할 수 있다.
- ④ 침팬지와 코끼리는 번식 주기가 길고 자녀 수가 적다.
- ⑤ 침팬지와 코끼리의 자녀 중 절반 정도가 자녀를 낳는다.

37) ①

[해설]

대명사 일치

- 'that information'을 지칭하므로 'it'으로 고쳐야 한다.

38) ③

[해설]

기억의 오류들은 무작위적인 것이 아니었다.

39) ⑤ 역사적 결과는 반복이라는 틀에 얽매이지 않는다

[해설]

- ① 로마에서 영국까지: 공통된 운명
- ② 제국들은 같은 방식으로 흥망성쇠를 겪는다
- ③ 문명에서 역사는 항상 반복된다
- ④ 정복으로 인한 제국들의 몰락

40) ② 아이를 똑똑하다고 칭찬하는 것이 아이의 성장을 방해하는 이유

[해설]

- ① 노력보다 재능이 더 중요한 이유
- ③ 고정 마인드셋이 학업 성과를 높이는 방법
- ④ 타고난 재능과 성공에 관한 과학적 배경
- ⑤ 문제를 일으키는 아이들을 훈육하는 전략

41) ⑤ 우리 안의 감정 : 부분적으로 우리의 행동을 형성한다.

[해설]

- ① 승객들의 감정을 조사하는 방법
- ② 우리의 감정에 영향을 주는 요소들
- ③ 우리가 특정 공공장소에 끌리는 이유
- ④ 입구 주변에 서는 것의 장점

42) ② 다이빙 반사가 발생하려면 신체의 나머지 부분도 물에 있어야 한다.

[해설]

얼굴 부분이 물 속에 잠길 때만 다이빙 반사가 일어나며, 몸도 반드시 물에 들어가야 한다는 내용은 없다.

- ① 다이빙 반사는 얼굴을 물에 잠기도록 할 때만 유발된다.
- ③ 다이빙 반사는 기도로 물이 들어가는 것을 막는 데 도움을 준다.
- ④ 다이빙 반사는 심장 박동을 늦추고 혈액을 주요 장기로 보내 준다.
- ⑤ 유인원들은 얼굴이 잠기면 공포와 심박수 증가로 반응한다.

43) ① what → that

[해설]

명사절 접속사 that

- 'is'의 보어 역할인 명사절로, 뒤에 완전한 문장이 이어지므로 관계대명사 'what'이 아닌 접속사 'that'으로 고쳐야 한다.

44) ⑤

45) ④

[해설]

주어진 글은 이 글은 신용카드를 사용할 때 사람들이 돈을 쓰는 방식이 어떻게 달라지는지를 설명한다. 먼저 (C)에서 현금과 신용카드 결제의 차이, 그리고 신용카드가 뇌의 인식 방식에 어떤 영향을 주는지 과학적 배경을 설명하고, 그로 인해 전문가의 말을 인용하여 신용카드가 지불의 고통을 마비시켜 돈을 더 쓰게 된다는 주장을 하는 (A)가 적절하다. 실제 실험(경매 실험)을 통해 앞서 말한 주장을 구체적인 예시로 든 (B)로 마무리된다.

46) ⑤ which → that

[해설]

동격의 접속사 that + 완전한 문장

- 명사 'a reminder'와 동격의 관계이며, 뒤에 완전한 문장이 오므로 'that'이 적절하다.

47) ③

[해설]

- ① Dana가 버스에서 내렸을 때 비가 내렸다.
- ② Becky는 Dana에게 여분의 우산을 건넸다.
- ④ Dana가 Becky에게 영감을 받아 행사를 기획했다.
- ⑤ Dana는 티켓 판매금의 절반을 기부했다.

48) ④ 소형견과 대형견을 위한 분리된 공간을 마련하는 것은 그들의 정서적 행복에 도움이 된다.

[해설]

새로 개장한 반려견 공원에는 소형견과 대형견을 위한 별도의 공간을 마련해서 반려견들의 안전을 보장하고 있다는 내용으로 ④ 번의 분리된 공간 마련이 반려견들의 정서적 행복에 도움이 된다는 것은 이 글과 무관하다.

49) ① 마드리드의 박물관들과 파리의 반짝이는 에펠탑을 꿈꾸며 줄에 서 있던 마야의 기대는 여권을 꺼내려는 순간 (A) 산산이 부서졌고, 결국 그것을 집에 두고 왔다는 사실을 (B) 깨닫고 오랫동안 기다려 온 모험도 함께 무너졌다.

[해설]

- ② collapsed : 무너졌다 / prove : 입증하다
- ③ faded : 사라졌다 / confess : 자백하다
- ④ plummeted : 급락했다 / refute : 반박하다
- ⑤ broke : 깨졌다 / deny : 부인하다

50) ⑤ 습관에 대해 나를 늘 (A) 놀라게 하는 것은, 우리의 선택은 선택이 요구하는 노력이나 의사 결정에 의해서가 아니라 (B) 수월함에 의해 형성된다는 사실이다.

[해설]

- ① surprise : 놀라게 하다 / comfort : 편안함, 안락
- ② impress : 깊은 인상을 주다 / fluency : 유창함
- ③ fascinate : 매료하다 / efficiency : 효율성
- ④ overwhelm : 압도하다 / clarity : 명료함

51) ③ 반대 방향을 가리킬

[해설]

우리가 하는 것은 우리가 생각하는 바를 반영 즉 생각하여 행동에 이르기도 하고 그와 반대로 행동하여 사고 방식에 이를 가능성도 있다.

- ① 공중으로 사라질
- ② 두 방향으로 갈라질
- ④ 개인적 선호 쪽으로 향할
- ⑤ 고정된 사고방식으로 이어질

52) ① 더 많이 듣게 된다

[해설]

예를 들어 말을 50단어로 제한받는다면 당신이 듣는 모든 단어에 매우 신중히 귀를 기울일 것이라는 앞의 내용으로 보아, 말을 줄이면 더 많이 듣게 된다는 내용이 와야 자연스럽다.

- ② 당신은 더욱 의심하게 된다
- ③ 다른 사람들이 더 많이 말한다
- ④ 대답하기 더 어려워진다
- ⑤ 다른 사람의 말을 덜 이해한다

53) ③

[해설]

주어진 글은 과학에 대한 이해뿐만 아니라 행동으로 이어져야 문제를 해결하는 것을 도울 수 있다는 내용이다. 이어서 과학이 규칙적인 운동과 심장병과의 관련성을 발견했지만 실제로 운동하지 않으면 도움이 되지 않는다는 예시를 제시하는 (B)가 이어지고, 그런 부분에서 아는 바를 행동으로 옮기기가 어렵다는 점에서 과학은 문제를 해결하지 않는다고 부연하는 (C)가 이어진다. 마지막으로 과학이 제공하는 지식을 사용할 때만 문제는 해결되며, 대부분의 문제는 지식의 부족이 아닌 실천의 부족에 의해 야기된다는 결론을 나타내는 (A)로 마무리된다.

54) ③ 심판이 자기 팀에게 편파적이다

[해설]

사람들은 자신이 논리적이고 객관적이라고 믿지만, 각자의 뇌 구조와 경험, 욕망, 지식이 달라서 동일한 현실을 전혀 다르게 해석한다는 내용이다. 그 예시로 월드컵 경기에서 상대 팀의 반칙을 놓친 것을 두고 심판을 비난하는 경우를 들고 있다. 따라서 빈칸 내용으로는 사람들은 예외없이 '심판이 자기 팀에게 편파적이다'라고 믿는다는 내용이 적절하다.

- ① 양 팀은 동일한 삶의 경험이 있다
- ② 자기 팀의 반칙은 공정하게 판정되었다
- ④ 그들의 경기 분석은 완전히 객관적이다
- ⑤ 심판이 이성적이고 공정한 결정을 내렸다

55) ② 개미 연구에서, 지각은 단순한 감각보다 더 중요한 것으로 입증되었다.

[해설]

이 글은 진화생물학자 Edward O. Wilson의 생애와 업적을 시간 순으로 기술하였다. 특히 자연에 관한 관심, 사고로 인한 시력 손상과 그에 따른 연구 방향 변화, 학업 및 수상 경력 등이 중심 내용이다. ②번 문장은 개미 연구 자체의 특성에 관한 것으로, Wilson의 구체적 삶이나 연구 배경과는 연관성이 없으므로 이 글과 무관하다.

56) ③ 특정 분야에 대해 깊이 있게 구조화된 이해와 예리한 통찰을 갖춘 것은 전문가가 개념들 사이의 복잡한 연결 관계를 (A) 인지하고, 자신의 지식을 다양한 상황에 융통성 있게 (B) 활용하도록 해준다

[해설]

- ① imagine : 상상하다 / discard : 버리다
- ② identify : 식별하다 / ignore : 간과하다
- ④ recognize : 인지하다 / construct : 구성하다
- ⑤ generate : 생성하다 / demonstrate : 보여주다

57) ③ 잘못 해석하다

[해설]

사람들은 현상을 관찰하고 원인을 찾지만, 생태학적 오류와 이민자 범주를 사례에서 설명하듯, 사람들이 사건 관계를 잘못 해석해서 잘못된 믿음을 가지게 된다는 내용이다. 따라서 '잘못 해석하다'가 적절하다.

- ① 강화하다 ② 과장하다 ④ 간과하다 ⑤ 조사하다

58) ③ New Guinea 정글에서 원주민들과 함께 시간을 보냈던 Jared Diamond는 사람들은 익숙한 환경에서는 일을 (A) 잘 해내지만, 낯선 환경에서는 지능과 상관없이 (B) 어려움을 겪는다고 언급한다.

[해설]

- ① shine : 두각을 나타내다 / adapt : 적응하다
- ② struggle : 어려움을 겪다 / thrive : 성공하다
- ④ fail : 실패하다 / struggle : 어려움을 겪다
- ⑤ excel : 잘 해내다 / surrender : 항복하다

59) ②

[해설]

주어진 문장은 기업들이 가격을 지나치게 높게 책정하는 실수를 저지르는 것에 대한 문제를 제기하고 있고, 이 문제에 대한 원인을 설명하는 (B)가 오는 것이 자연스럽다. 그 다음은 (A)에서 그 실수로 인한 결과가 전개되고 (사업 실패로 이어질 수 있음) 마지막으로 앞서 설명한 문제 상황에 대한 구체적인 해결책인 (C)로 이어지는 것이 자연스럽다.

60) ⑤

[해설]

생쥐는 어린 나이에 자주 번식하지만 대부분 새끼가 일찍 죽고 이와 대조적으로 침팬지나 코끼리는 늦은 나이에 적게 번식하지만, 자손의 생존율이 높다는 내용이 이어지므로 ⑤번이 적절하다.

61) ③ 과학의 발전은 발견을 (A) 독점하여 개인만의 이익을 추구하는 것이 아니라, 데이터를 (B) 공유함으로써 공동의 발전을 도모하는 데 기반을 둔다.

[해설]

- ① protecting : 보호하여 / distributing : 배포함으로써
- ② concealing : 감춰서 / verifying : 검증함으로써
- ④ publishing : 발표하여 / transmitting : 전달함으로써
- ⑤ storing : 저장하여 / collecting : 수집함으로써

62) ⑤ 과거 경험을 바탕으로 구축되는 상상적 과정

[해설]

기억은 단순한 재생이 아니라, 상상력과 재해석이 개입된 창의적인 활동이고, 기존 지식 구조를 활용해 기억의 공백을 메운다는 지문의 핵심 개념을 반영하고 있다.

- ① 반복된 경험을 반영하는 학습된 행동
- ② 주관적인 해석에 의존하는 정신적 활동
- ③ 단절된 요소들을 수정하는 내적 메커니즘
- ④ 단편화된 경험을 재조직하는 역동적인 과정

63) ② 지나친 단순화

[해설]

모든 문명이 과도하게 팽창하다가 멸망하게 된다는 점은 잉카와 아즈텍과 같은 문명의 경우를 보면 사실이 아니라는 점을 알려주는 내용이다. 따라서 "역사는 역사를 반복한다"라는 말은 과한 단순화라고 하는 것이 적절하다.

- ① 문화적 전통
- ③ 역사적 우연
- ④ 고고학적 발견
- ⑤ 예측 가능한 역사적 패턴

64) ③ 일부 연구에 따르면 기억력과 집중력 같은 인지 능력을 향상시키는 것이 학업 성취도를 높이는 데에도 도움이 될 수 있다

다고 한다.

[해설]

해당 문장은 겉보기에 학습이나 성장 마인드셋에 관련된 것처럼 보이지만, 본문 전체의 핵심 주제인 “노력에 대한 칭찬과 성장 마인드셋”과는 직접적인 관련이 없고, 총체적인 ‘성장’보다는, ‘어휘 학습’에 관한 것에 불과하므로 ③번은 이 글과 무관하다.

65) ① 우리가 세상을 경험하는 방식

[해설]

우리 안의 보이지 않는 감정이 지각할 수 없는 형태로 존재하지만, 실제로 우리가 세상을 경험하는 방식 전체에 영향을 미친다는 내용으므로 ①번이 적절하다.

- ② 우리가 일상적인 공간을 인식하는 방식
- ③ 공유된 공간에서 우리가 내리는 결정들
- ④ 혼잡한 장소에서 우리가 이동하는 방식
- ⑤ 외부 환경에 대한 우리의 해석

66) ⑤

[해설]

주어진 글은 우리는 다른 해양 포유류처럼 ‘잠수 반사’를 가지고 있다는 내용이다. 그것이 의미하는 바를 설명하고 잠수 반사가 일어나지 않을 경우를 말하는 (C)가 이어지고, 반대로 얼굴만 물속에 있고 나머지 몸 전체는 물 밖에 있을 때 잠수 반사가 일어난다는 내용의 (B)로 이어져야 한다. 마지막으로 잠수 반사가 일어날 때 벌어지는 일을 부연 설명하고 침팬지와 고릴라는 잠수 반사를 겪지 않는다는 내용의 (A)로 마무리되는 것이 자연스럽다.

67) ① 추가적인 정신적 단계들

[해설]

인간이 인지적 구두쇠로서 불필요한 노력을 들이지 않으려 하기 때문에 추가적인 정신적 과정이 필요한 의심 대신 진실을 자동으로 믿으려는 경향이 있다고 설명하고 있으므로, 사람들이 진실을 의심하고 믿지 않기로 결정하는 데 더 많은 정신적 노력이 필요하다는 것이 적절하다.

- ② 완전한 감정적 분리
- ③ 더 높은 수준의 언어적 정확성
- ④ 말로 하는 의사소통에 대한 맹목적 신뢰
- ⑤ 거짓 정보에 자주 노출되는 것

68) ④

[해설]

주어진 문장은 안전을 위해 개의 크기에 따라 공간이 마련되어 있다는 내용으로 개들을 위한 공간이 있다는 내용에 연결되며, 이후 휴게 공간도 마련되어 있다는 내용이 추가되고 있으므로 주어진 문장이 들어가기에 적절한 곳은 ④번이다.

69) ③

[해설]

주어진 문장은 유럽 배낭여행에 대한 Maya의 기대감을 표현하고 있다. (B)에서 기대감을 가지고 탑승 수속 줄에서 있는 모습을 설명하고, 이후 (C)에서 카운터에서 항공사 지원이 여권을 요청했으나 없어졌다는 내용으로 이어진다. 마지막으로 여권을 집에 두고 온 것을 깨닫고 상심한 내용의 (A)로 마무리하는 것이 자연스럽다.

70) ④

[해설]

주어진 문장의 ‘For this reason’에 해당하는 이유가 사람들은 편리하면 더 하려고 하고 불편하면 잘하지 않으려고 한다는 것을 말하며, 따라서 습관으로 만들고자 하는 행동의 편리성에 집중해야 한다는 내용이 이어지고 이를 예시를 통해 구체적으로 설명하므로 ④번의 위치가 적절하다.

71) ④

[해설]

주어진 문장에서 ‘a more remarkable way’는 행동하여 사고방식에 이를 가능성이 있고, 이는 전반부에 기술된 생각이 행동을 받

영한다는 것과 반대 방향의 상관관계를 보여주어 놀라다는 것을 기술하고 있으므로 내용의 전환이 이루어지는 ④번의 위치가 적절하다.

72) ⑤

[해설]

이 글에서 우리는 다음 말을 생각하느라 말해지고 있는 것을 놓치지만, 말을 제한받는다면 듣는 단어에 귀 기울이게 될 것이라는 내용을 다루고 있다. 따라서 다르게 듣는다는 것은 이전과 달리 신중하게 듣는 것을 의미하므로 ⑤번의 위치가 적절하다.

73) ③ 지식의 부족이 아니라 행동 부족으로 인해 발생하는

[해설]

과학적 지식 그 자체로는 문제를 해결하지 못하며, 사람들이 그 지식을 바탕으로 행동해야 비로소 문제가 해결된다는 내용으로 문제의 원인이 지식 부족이 아니라 행동 부족임을 분명히 강조하고 있으므로 ③번이 적절하다.

- ① 과학적 발견의 부족으로 인한 결과
- ② 자연 세계의 풀 수 없는 신비로 인한
- ④ 과학적 지식의 복잡성에서 비롯된
- ⑤ 과학에 대한 광범위한 오해에서 비롯된

74) ⑤

[해설]

주어진 글은 우리가 자신을 논리적이고 합리적이라고 생각한다는 내용으로 시작한다. (C)에서는 이러한 생각 때문에 상대 역시 나와 같은 생각을 할 것이라 기대하지만, 실제로는 사람마다 다른 생각을 한다는 점을 근거로 제시한다. 이어지는 (B)는 그 기대가 잘못된 이유를 부연하며, ‘현실’이란 결국 개인의 해석일 뿐이고 그 인식은 사람마다 다르다는 점을 덧붙인다. 마지막으로 (A)에서는 이를 구체적 사례(축구 팬들의 심판 판정에 대한 반응)로 보여주며 글의 주장을 마무리한다.

75) ⑤ Instead : 대신 / However : 그러나

[해설]

- ① Accordingly : 따라서 / However : 그러나
- ② Even so : 그럼에도 불구하고 / Hence : 그러므로, 따라서
- ③ Instead : 대신 / Hence : 그러므로, 따라서
- ④ Even so : 그럼에도 불구하고 / In addition : 게다가, 더구나

76) ④

[해설]

글의 전반부는 전문가의 정의와 특징을 설명하고 있으며, ④번부터는 전문성이 단순한 지식의 양이 아닌 조직화한 지식 구조라는 점을 강조한다. 따라서 제시문은 바로 앞의 특정 분야의 지식을 가진다는 설명과 이어서, 단순히 사실을 아는 것에 그치지 않는다는 전문가 지식의 본질을 구체화하는 내용 앞에 들어가는 것이 가장 자연스럽다.

77) ④ 사람들은 종종 (A) 동시에 발생하는 두 사건이 인과 관계가 있다고 가정함으로써 생태학적 오류를 저지르는데, 예를 들어, 1950년대 경제적 제약 때문에 (B) 위험한 지역에 살 수밖에 없었던 이민자들과 높은 범죄율을 연결하는 경우이다.

[해설]

- ① unexpectedly : 예기치 않게 / peaceful : 평화로운
- ② concurrently : 동시에 / crowded : 붐비는
- ③ successively : 연속적으로 / industrial : 공업의
- ⑤ coincidentally : 우연히 / unhygienic : 비위생적인

78) ③

[해설]

주어진 글은 사람들이 어디에 집중할지를 예측하기 위해 과거 경험을 사용하고 다른 환경은 다른 기대를 만든다는 내용이다. 이를 부연하는 사례를 소개하고자 (B)에서 Jared Diamond의 책에서 뉴기니 원주민과 함께한 경험이 소개된다. 이어서 (C)는 원주민들이 서양 과제에는 약하지만 정글에서는 뛰어난 능력을 보인다는 점을 기술하며 (B)를 구체화한다. 마지막으로 (A)에서 그들 실제 능력과 Diamond의 한계를 비교하며, 주제를 마무리한다.

79) ③ 많은 기업가들이 자신들의 신제품에 대한 감정적 애착으로 인해 가격을 (A) **부풀리는** 실수를 범하며, (B) **즉각적인** 이익보다 초기 시장 안착을 우선하지 못한다.

[해설]

- ① overvalue : 가격을 과대평가하다 / modest : 적은
- ② distort : 왜곡하다 / delayed : 지연된
- ④ increase : 인상하다 / gradual : 점진적인
- ⑤ overprice : 너무 비싸게 책정하다 / sustained : 지속적인

80) ③ 일부 종들이 많은 자손을 빠르게 낳는 반면에, 인간과 다른 대형 포유류는 번식에 더 느린 접근 방식을 취하고, 그들의 자손을 (A) **돌보는 데** 더 많은 에너지를 집중하며 결과적으로 그들의 생존 가능성을 (B) **높인다**.

[해설]

- ① abandoning : 버리다 / reducing : 낮추다
- ② guiding : 지도하다 / maintaining : 유지하다
- ④ feeding : 먹이다 / sustaining : 유지하다
- ⑤ tending : 보살피다 / undermining : 약화시키다

81) ④ 새로운 가설과 실험이 항상 획기적인 혁신으로 이어진다는 데에는 의심의 여지가 없다.

[해설]

이 글은 과학자들은 새로운 발견이나 데이터를 공개함으로써 다른 과학자들이 이를 검토하거나 새로운 연구를 이어갈 수 있도록 한다는 내용이다. 새로운 가설과 실험이 지구를 뒤엎을 혁신으로 이어진다는 내용은 이 글과는 무관하다.

82) ④ 그들에게 별로 이해가 되지 않았던

[해설]

기억의 오류가 무작위가 아니라 기억에 빈틈이 생긴 부분이라고 했고, 그 빈틈은 보통 잘 이해되지 않은 내용에서 생기기 때문에 ④번이 적절하다.

- ① 이야기의 주요 내용을 설명했던
- ② 그들의 개인적인 의견을 보여줬던
- ③ 그들이 믿는 것과 반대되었던
- ⑤ 강한 감정 반응을 일으켰던

* 원문 변형

made the least sense to them → didn't make much sense to them

83) ① 일부 문명은 내부의 (A) **무리한** 확장으로 인해 서서히 쇠퇴한 반면, 다른 문명은 외부의 침략으로 갑작스럽게 사라졌으며, 이는 역사적 흐름이 일반적으로 생각되는 것보다 훨씬 더 (B) **다양하다**는 점을 시사한다.

[해설]

- ② overextension : 무리한 확장 / typical : 전형적인
- ③ conflict : 갈등 / simplistic : 지나치게 단순한
- ④ instability : 불안정 / unified : 통일된
- ⑤ disorder : 무질서 / isolated : 고립된

84) ④ 스탠포드의 캐롤 드웁은 아이들의 지능이 아닌 노력을 (A) **격려하는 것**이 '성장 마인드셋'을 발달시키는 데 도움이 되며, 아이들이 기꺼이 도전을 (B) **다루고** 자신의 노력으로부터 성장하려는 의지가 더 강해진다는 것을 보여주었습니다

[해설] ① motivating : 동기 부여하는 것 / avoid : 피하다

- ② complimenting : 칭찬하는 것 / resist : 저항하다
- ③ rewarding : 보상하는 것 / overcome : 극복하다
- ⑤ praising : 칭찬하는 것 / ignore : 무시하다

85) ④

[해설]

주어진 글은 우리가 주변을 살피는 것이 우리 자신 바깥에 있는 것에 집중하거나 때로는 감정이 특징짓는 요소로 작용하기도 한다는 내용이다. 이어서 (C)에서 이에 대한 예시로 지하철 승객

행동 연구를 소개하고 (A)는 실용적 이유로 예시를 부연하고 마지막으로 (B)에서 보이지 않는 감정이 행동에 영향을 준다는 것으로 마무리한다.

86) ④ 잠수 반사는 물속에서 얼굴이 (B) **잠길** 때 유발되는 비자발적인(무의식중의) (A) **보호적인** 반응이다.

[해설]

- ① aggressive: 공격적인 / pressed: 눌린
- ② medicinal: 치료적인 / submerged: (물에) 잠긴
- ③ defensive: 방어적인 / swelling: 불어난
- ④ protective: 보호적인 / immersed: 담겨진, 잠긴
- ⑤ expressive: 표현하는 / contracted: 수축된

87) ②

[해설]

주어진 글은 인간은 진실 편향이 있다는 내용이다. 이어서 인간은 소통할 때 상대방이 진실을 말하고 있다고 가정한다는 내용인 (B)가 이어지고 상대방의 말을 거짓으로 가정하거나 진술의 진실성을 의심하려면 진실을 말한다고 가정하는 것보다 추가적인 인지적 노력이 필요하다는 (A)가 이어진다. 마지막으로 대부분 인간은 추가적 정신적 노력을 기울이지 않고 온라인에서 진실 편향이 있음에 일리가 있다는 (C)로 마무리된다.

88) ④ MIT 실험하는 동안, 현금을 사용한 사람들은 보스턴 셀틱스 티켓에 훨씬 더 높은 금액을 입찰했다.

[해설]

신용카드 입찰 금액의 평균이 현금 입찰 금액의 두 배만큼 높게 나왔다.

- ① 신용카드 사용은 재정 결정에 대한 계산법을 변화시켜 소비하는 방식을 근본적으로 바꾼다.
- ② 신용카드로 결제하는 것은 뇌의 특정 부위의 활동 감소로 인해 지출이 덜 불쾌하게 느껴질 수 있다.
- ③ 신용카드가 작동하는 방식은 지불할 때 느끼는 불편함에 대한 뇌의 반응을 둔하게 만든다.
- ⑤ 신용카드를 사용하자 사람들은 더 무모하게 입찰했는데, 지출을 통제해야 한다는 필요성을 느끼지 않았기 때문이다.

89) ① 우리의 재정적 결정 방식을 변화시키며

[해설]

신용카드를 사용하면 재정적 결정 방식이 변화하고 소비에 대한 감각이 둔해져 더 쉽게 지출한다는 내용이므로 ①번이 적절하다.

- ② 미래 재정 목표를 위해 덜 저축하게 만들며
- ③ 예산보다 편리함을 우선하게 만들며
- ④ 구매한 물건에 대한 감정적 가치를 변화시키며
- ⑤ 구매의 실제 비용을 과소평가하게 만들며

90) The park **was designed to provide** an **enjoyable** experience for both dogs and owners.

91) You'll also find lots of benches and areas for resting and staying cool.

92) She realized she had left her passport at home.

93) **knowing** she could not board the flight and **had** to delay her dream trip

94) One thing that continually astonishes me is the degree to which we're influenced by sheer convenience.

95) now that tools like group chats make it easy to stay in touch

96) If you're attracted to a certain person, you should be more likely to socialize with that person.

97) we are likely not only to think ourselves into a way of acting but also to act ourselves into a way of thinking

98) We miss what's being said because we're mentally rehearsing our next utterance.

99) You might discover that the **less** you say, the more you hear.

100) it will do nothing for your personal health unless you act on it and actually exercise

101) many of humanity's biggest problems are **caused** by lack of action, and not lack of knowledge

102) they will agree with us and see what we see

103) criticize (비난하다)

[해설]

누군가 또는 무언가의 문제점을 말하거나 결점을 찾아내다

104) share (점유율)

[해설]

전체 중 특정 사람, 집단, 또는 부문에 할당되거나 속하는 비율이나 부분

105) Germany's online share of retail trade was less than four times that of Spain

106) he concentrated on smaller creatures he could study up close

107) (ㄱ) partial **blindness** (ㄴ) **concentration** to (ㄷ) being **awarded**

[해설]

어린 시절 사고로 (ㄱ) **부분 시력을 잃은** 에드워드 O. 윌슨은 개미에 (ㄴ) **집중하게 되었고**, 진화 생물학의 선도적인 학자가 되어 결국 크라푸르드 상을 (ㄷ) **수상하고** '현대의 다윈'이라는 칭호를 얻게 되었다.

108) a 50% discount on coffee

[해설]

식물을 두 개 사면 무엇을 받을 수 있나?

109) Take pictures in a photo zone **filled** with unique plants.

110) beginners

[해설]

카툰 그리기 수업에는 누가 참여할 수 있나?

111) character stickers

[해설]

이 축제에서 모든 방문객들이 받게 되는 것은 무엇인가?

112) They are not just good thinkers or people who are exceptionally smart.

113) the expert **understands** the inter-relationship between facts and can distinguish which ideas are most central

114) immigrants were **forced** to live in neighborhoods where crime rates were already high

115) Unless you analyze the claim carefully, you would misinterpret the relationship and thereby construct a faulty belief.

116) He relates that these natives tend to perform poorly at tasks Westerners have been trained to do since childhood.

117) Were he to be tested on such tasks, he also would perform poorly.

118) which **causes** them **to overprice** their products

119) your priority should be to get sufficient market **adoption** as soon as possible

120) because while apes and elephants produce fewer babies than mice, a larger percentage of their offspring survive to then reproduce

121) About half of these offspring make it to becoming parents.

122) it makes it possible for other scientists to use that data to construct **new** hypotheses and perform **new** experiments

123) assumption (가정)

[해설]

증거는 없지만 어떤 것이 사실이거나 일어날 것이라고 믿는 것

124) **remembering** is an **imaginative** process that involves **building** upon past experiences

125) ㉠ storing ㉡ imaginative ㉢ familiarity

[해설]

바들렛에 따르면, 기억하는 것은 단순히 정보를 ㉠ **저장하는 것**이 아니라, 낯선 이야기 속 빈 부분을 채우기 위해 정신적 틀(도식)을 활용하여 능동적으로 재구성하는 ㉡ **상상력 기반의** 과정이다. 이는 ㉢ **익숙함**이 우리가 기억을 재구성하는 방식에 영향을 주기 때문이다.

126) Civilizations expand, get **overextended**, and then collapse as in the cases of Rome, which went under in 476 AD

127) ㉠ oversimplified ㉡ repetitions ㉢ ends

[해설]

역사적 ㉡ **반복**만으로는 문명들이 서로 다른 방식으로 ㉢ **몰락**하는 과정을 충분히 설명할 수 없으므로 역사는 반복된다는 생각은 ㉠ **지나치게 단순화된** 관점이다.

128) kids who are told they're "smart" actually underperform in future tasks, by choosing easier tasks to avoid evidence that they are not smart,

129) Emphasizing effort gives a child a variable that they can control

130) what really marks a place is something less specific

131) the desire to avoid the sometimes uncomfortable feeling of accidentally **making** eye contact with **seated** passengers

132) (ㄱ): trigger the diving reflex

(ㄴ): the face is submerged in water

(ㄷ): helps prevent drowning by slowing down the metabolism

[해설]

사람은 (B) **얼굴만 물에 잠겨도** (A) **잠수 반사를 유발하는데**, 이는 (C) **신진대사를 늦춰** **익사를 방지하는 데 도움이 된다**.

133) drown (익사하다)

[해설]

물에 빠져 물을 들이마심으로써 사망하다.

134) If you ask someone where the restroom is located or if it's raining outside

135) Imagine how difficult it would be to converse with someone if you assumed that everything they were telling you was false!

136) **Paying** with plastic fundamentally **changes** the way we spend money, **altering** the calculus of our financial decisions.

137) It **turns** out that **the average** credit card bid **was** twice as high as **the average** cash bid.

138) As she stepped off the bus next to the market, where Becky had just finished shopping, raindrops began to fall.

139) **Inspired** by the memory, Dana created a museum event **called** "Cover Each Other" with paintings of people **supporting** others.

140) ②, ③

[해설]

② The park **was designed** to provide an enjoyable experience for both dogs and owners.

- 수동태

: 주어와 수동의 관계이고, 동사 'design'의 목적어가 없으므로 수동태가 적절하다.

③ There are big grassy areas **where** your dogs can run, jump, and play.

- 관계부사 + 완전한 문장

: 명사 'big grassy areas'를 수식하며, 뒤에 완전한 문장이 오므로 관계부사가 적절하다.

141) ①, ④

[해설]

① Her expectations about her European backpacking trip **were** really high.

- 주어 동사 수일치

: 주어 'her expectations'에 맞춰 복수 동사가 적절하다.

④ She was heartbroken, **knowing** she could not board the flight and had to delay her dream trip.

- 능동 현재분사구문

: 주어와 능동의 관계이며, 접속사가 없고 목적어가 있으므로 현재분사가 적절하다.

She was heartbroken, (and **she** knew →) **knowing** ~

142) ①, ③, ④

[해설]

① One thing that continually astonishes me is the degree **to which** we're influenced by sheer convenience.

- 전치사 + 관계대명사 + 완전한 문장

: 선행사와 동일한 명사가 전치사 뒤에 있을 때, '전치사 + 관계대명사' 구조를 사용하며 뒤에 완전한 문장이 온다.

the degree + we're influenced ~ to **the degree**.
→ the degree **to which** we're ~ sheer convenience.

③ we should pay close attention to the convenience of any activity we want to make **it** into a habit.

- 목적격 관계대명사 생략 + 불완전 문장

: 목적격 관계대명사가 생략된 구조이며, 목적격 관계대명사는 목적어가 없는 불완전한 문장을 수반하므로, 목적어가 없어야 한다.

the convenience of any activity (**that**) we want to make **it** into a habit.

④ Putting a wastebasket next to our front door made mail sorting slightly more **convenient**.

- 5형식 make + O + O.C (형용사)

: 5형식 동사 'make'의 목적격 보어자리로 형용사가 적절하다.

143) ②, ④

[해설]

② our internal thoughts don't always predict our public behavior, but, overall, **what** we do obviously reflects what we think.

- 선행사포함 관계대명사 what + 불완전 문장 → 명사절 역할

: 주어 자리의 명사절이 필요하며, 뒤에 목적어가 없는 불완전한 문장이 오므로 'what'이 적절하다.

[what we do] obviously **reflects** what we think.

S1 S2 V2 O2

V1

④ "If social psychology has taught us anything **during** the last 25 years,

- 전치사 during, for + 명사(구) vs 접속사 while + 절

: '~동안'에 해당하는 표현은 'while, during, for'가 있다. 접속사 'while' 뒤에 주어+동사 혹은 현재분사, 과거분사가 와야 한다. 전치사 'during'은 뒤에 특정 기간을 나타내는 명사가 와야 하고, 'for'는 뒤에 주로 숫자를 포함한 시간의 길이가 온다.

144) ①, ③

[해설]

① Challenge yourself to spend an entire day saying only **what** you absolutely must say.

- 선행사포함 관계대명사 what + 불완전 문장 → 명사절 역할

: 'saying'의 목적어 자리이며, 뒤에 목적어가 없는 불완전한 문장이 오므로 'what'이 적절하다.

③ What if you could eliminate the idea **that** the next available mini-silence is your next opening to express whatever is in your head?

- 동격의 접속사 that + 완전한 문장

: 명사 'the idea'와 동격의 관계이며, 뒤에 완전한 문장이 오므로 'that'이 적절하다.

145) ②, ③

[해설]

② science has found **that** regular exercise can lower your risk of heart disease.

- 명사절 접속사 that + 완전한 문장

: 동사 'has found'의 목적어 자리로 명사절이 필요하며, 뒤에 완전한 문장이 오므로 'that'이 적절하다.

③ Problems are only solved when people take the knowledge provided by science and **use** it.

- 동사 병렬구조

: when people **take** the knowledge ~ and **use** it.

146) ③, ④

[해설]

③ It's only your interpretation of reality, **which** will always be different from someone else's.

- 관계대명사 계속적 용법

: 관계대명사 'that'은 계속적 용법으로 사용할 수 없다.

④ the fans of each country criticize the referees for missing all the infractions that the other team commits **them**.

- 목적격 관계대명사 + 불완전 문장

: 목적격 관계대명사는 목적어가 없는 불완전한 문장을 수반하므로, 목적어가 없어야 한다.

the infractions **that** the other team commits **Ø**.

V

O

147) ③, ④

[해설]

③ Wilson transferred to Harvard University, **where** he became a professor in 1956.

- 관계부사 + 완전한 문장

: 명사 'Harvard University'를 수식하며, 뒤에 완전한 문장이 오므로 관계부사가 적절하다.

④ Wilson, **known** to some as the "modern-day Darwin", died at the age of 92 in Massachusetts.

- 수동 과거분사구문 응용

: 주어와 수동의 관계이며, 뒤에 목적어가 없으므로 과거분사가 적절하다.

Wilson, (who were) **known** to some as ~

148) a), c), d)

[해설]

a) Studies of experts provide insight into **what** it means to have deep and flexible understanding.

- 간접의문문 (의문대명사 what + 불완전 문장)

: 전치사 'into'의 목적어 자리에 명사절로 간접의문문이 필요하며, '의문사 + 주어 + 동사'의 어순이 적절하다. 의문대명사 'what, which, who'는 불완전한 문장을 수반한다.

c) experts have knowledge in a specific domain — such as chess, chemistry, or tennis — and **are** not generalists.

- 동사 병렬구조

: experts **have** knowledge ~ and **are** not generalists.

d) having expertise in a topic **means** that knowledge is organized into coherent frameworks,

- 동사 찾기

: 문장의 동사가 없고, 'to 부정사'는 동사의 역할을 할 수 없으므로, 동명사 주어에 맞춰 단수 동사 'means'가 적절하다.

149) a), b), d)

[해설]

a) It is natural for people to observe happenings and then seek explanations for **why** those happenings occurred.

- 간접의문문 (의문부사 + 완전한 문장)

: 전치사 'for'의 목적어 자리에 명사절로 간접의문문이 필요하며, '의문사 + 주어 + 동사'의 어순이 적절하다. 의문부사 'how, when, why, where'은 완전한 문장을 수반하고, 의문대명사 'what, which, who'는 불완전한 문장을 수반한다. 동사 'occurred'가 자동사의 용례로 목적어가 필요 없는 완전한 문장이므로 'why'가 적절하다.

b) One of these is the *ecological fallacy*, **where** an argument claims that there is a causal relationship between two things merely because they occur together.

- 관계부사 + 완전한 문장

: 명사 'the *ecological fallacy*'를 수식하며, 뒤에 완전한 문장이 오므로 관계부사가 적절하다.

d) But a careful analysis of this situation revealed that immigrants were forced **to live** in neighborhoods where crime rates were already high;

- 5형식 수동태

: force + O + O.C (to V) → be forced to V

150) a), d), e)

[해설]

a) we use previous experience to predict where **we should** pay attention.

- 간접의문문

: 'to predict'의 목적어 자리에 명사절로 간접의문문이 필요하며, '의문사 + 주어 + 동사'의 어순이 적절하다.

d) Diamond, who had never spent time in such places, **has** no ability to pay attention to these things.

- 주어 동사 수일치

: 주어 'Diamond'에 맞춰 단수 동사가 적절하다.

e) Were he to be tested on such tasks, he also **would perform** poorly.

- 가정법 미래 + if 생략 도치

if S + should / were to V, S + 조동사과거 + 동사원형

: 불가능 또는 가능성이 희박한 일, 완곡한 제안, 정중한 태도를 표현하는 데 쓰인다. 흔히 가정법 미래로 분류하지만 엄

밀히 따지면 가정법 과거의 한 종류이다. 접속사 'if'가 생략되면 'were, had'가 주어 앞으로 도치된다.

If he **were** to be tested on such tasks, he also **would perform** poorly.

→ **Were** he to be tested on such tasks, he also **would perform** poorly.

151) b), c)

[해설]

b) this powerful sense of ownership distorts their perception of value which causes them **to overprice** their products.

- 5형식 cause + O + O.C (to V)

: 5형식 동사 'cause'는 목적어와 목적격 보어의 관계가 능동일 때 to 부정사를 사용한다.

c) not all these people are happy or willing to drop their prices to make their products more **attractive**.

- 5형식 make + O + O.C (형용사)

: 5형식 동사 'make'의 목적격 보어자리로 형용사가 적절하다.

152) a), c)

[해설]

a) we mature at a leisurely pace, grow large bodies, and have few babies but devote much time and energy to **raising** them well.

- 전치사 + 동명사

: 'devote A to ~ing'에서 'to'는 전치사로 동명사 또는 명사를 수반한다.

c) when she is just five weeks old, **has** four to ten pups per litter, and can have a new litter every two months over the course of her approximately twelve-month life.

- 동사 병렬구조

: when she **is** ~, **has** four ~, and **can have** ~

153) b), d)

[해설]

b) This makes it possible for other scientists to reconsider their data and possibly **refute** their conclusions.

- to 부정사 병렬구조

: **to reconsider** their data and possibly **(to) refute** ~

d) The assumption is that society as a whole will end up **knowing** more if information is spread as widely as possible,

- 동명사 관용표현

: end up ~ing : 결국 ~하다

154) a), d)

[해설]

a) the British psychologist Sir Frederic Bartlett asked people **to listen** to folktales from other countries and then recall these stories at a later date.

- 5형식 ask + O + O.C (to V)

: 5형식 동사 'ask'는 목적어와 목적격 보어의 관계가 능동일 때 to 부정사를 사용한다.

d) Bartlett concluded that when **facing** problems, humans draw upon mental schemata, or shelves of stored knowledge in our brains,

- 접속사 + 능동 현재분사구문

: 주어와 능동의 관계이며, 뒤에 목적어가 있으므로 현재분사가 적절하다.

when (**they** are) **facing** problems, **humans** draw upon ~

155) a), d)

[해설]

a) Civilizations expand, **get** overextended, and then collapse as in the cases of Rome,

- 동사 병렬구조

: Civilizations **expand**, **get** overextended, and then **collapse** ~

④ Some civilizations end suddenly, like the Aztec and Inca, **conquered** by invaders in the 1520s AD.

- 수동 과거분사구문 응용

: 명사 'the Aztec and Inca'와 수동의 관계이며, 뒤에 목적어가 없으므로 과거분사가 적절하다.

like **the Aztec and Inca**, (**which** were) **conquered** by ~

156) ①, ②, ③

[해설]

① Dweck found that kids who **are told** they're "smart" actually underperform in future tasks,

- 4형식 수동태

: tell + I.O + D.O (that절) → be told + that절

② by choosing easier tasks to avoid evidence **that** they are not smart, which Dweck calls having a "fixed mindset."

- 동격의 접속사 that + 완전한 문장

: 명사 'evidence'와 동격의 관계이며, 뒤에 완전한 문장이 오므로 'that'이 적절하다.

③ Dweck found, kids who are praised not for their smarts but for their effort develop **what** Dweck calls a "growth mindset."

- 선행사포함 관계대명사 what + 불완전 문장

: 동사 'develop'의 목적어 자리이며, 뒤에 목적어가 없는 불완전한 문장이 오므로 'what'이 적절하다.

kids [who are ~ effort] **develop** **[what]** Dweck **calls** **Ø**

S1

V1

S2

V2 O2

a "growth mindset."

O.C2

157) ②, ③

[해설]

② Researchers trying to understand why people sit where they sit or stand where they stand in subway and metro trains **examined** the factors

- 동사 찾기

: 문장의 동사가 없고, 현재분사는 동사의 역할을 할 수 없으므로, 주어와 시제에 맞춰 'examined'가 적절하다.

Researchers [trying to understand ~ trains] **examined** ~

S

V

③ One of their findings involved the reasons **which** many riders like to plant themselves close to the train's doors.

- 관계부사 생략 + 완전한 문장

: 관계부사는 완전한 문장을 수반하며, 선행사 'the place, the reason, the time'등의 뒤에 올 때 생략할 수 있다. 뒤에 완전한 문장이 이어지므로 'which'은 올 수 없다.

158) ①, ②

[해설]

① This means that special nerve endings on our faces, around the mouth and nose, **trigger** this reflex only when the facial region goes under water.

- 동사 찾기

: 'that 절'의 동사가 없고, 'to 부정사'는 동사의 역할을 할 수 없으므로, 주어 'special nerve endings'에 맞춰 복수 동사 'trigger'가 적절하다.

② It automatically closes down the airway, **reducing** the risk of swallowing water, and it narrows the small air-passages in the lungs.

- 능동 현재분사구문

: 주어와 능동의 관계이며, 접속사가 없고 목적어가 있으므로 현재분사가 적절하다.

It automatically ~, (as **it** reduces →) **reducing** the risk ~

159) ②, ③, ④

[해설]

② If you ask someone **where** the restroom is located or if it's raining outside,

- 간접의문문 (의문부사 + 완전한 문장)

: 동사 'ask'의 직접 목적어 자리에 명사절로 간접의문문이 필요하며, '의문사 + 주어 + 동사'의 어순이 적절하다. 의문부사 'how, when, why, where'은 완전한 문장을 수반하고, 의문대명사 'what, which, who'는 불완전한 문장을 수반한다. 완전한 문장이 왔으므로 'where'이 적절하다.

③ Imagine how difficult it would be to converse with someone if you assumed that **everything** they were telling you **was** false!

- 동사 찾기

: **everything** [(that) they were telling you Ø] **was** false!

S

V

④ humans are "cognitive misers," **which** means we typically don't expend more mental effort than seems necessary in a given situation.

- 관계대명사 계속적 용법

: 관계대명사 'that'은 계속적 용법으로 사용할 수 없다.

160) ①, ③

[해설]

① Paying with plastic fundamentally changes the way we spend money, **altering** the calculus of our financial decisions.

- 능동 현재분사구문

: 의미상 주어와 능동의 관계이며, 접속사가 없고 목적어가 있으므로 현재분사가 적절하다. 의미상 주어는 앞 문장이다. (and it alters →) **altering** the calculus ~

③ Half the participants in the auction **were informed** that they had to pay with cash; the other half were told they had to pay with credit cards.

- 4형식 수동태

: inform + I.O + D.O (that절) → be informed + that절

161) ①, ③, ④

[해설]

① As she stepped off the bus next to the market, **where** Becky had just finished shopping, raindrops began to fall.

- 관계부사 + 완전한 문장

: 명사 'the market'을 수식하며, 뒤에 완전한 문장이 오므로 관계부사가 적절하다.

③ She hurried to the museum, arriving dry and comfortable, and **performed** well in her interview.

- 동사 병렬구조

: he **hurried** to ~ and **performed** ~

④ Inspired by the memory, Dana created a museum event **called** "Cover Each Other" with paintings of people supporting others.

- 5형식 수동태

: 5형식 동사 'call'은 능동태일 때 목적어와 목적격 보어를 수반한다. 보어 역할을 하는 명사구 'Cover Each Other'이 있으므로 수동태가 적절하다.

call + O + O.C (명사) → be called + 명사

162) Dear Dog Owners,

My name is Lily Paxton, and I'm the town's Pet Program Coordinator. As part of our goal to make the community more dog-friendly, we recently opened a new dog park. The park was designed **to provide** an enjoyable experience for

both dogs and owners. There are big grassy areas **where** your dogs can run, jump, and play. We have separate spaces for small dogs and big dogs, to ensure safety. You'll also find lots of benches and areas for resting and **staying** cool. We hope you will have a wonderful time with your dogs in this newly opened park.

Regards,

Lily Paxton, Pet Program Coordinator

163) Maya waited in line to check in for her flight. Her expectations about her European backpacking trip **were** really high. She had been looking forward to the trip for a year. She couldn't wait to visit museums in Madrid and **see** the Eiffel Tower at night in Paris. As she stood in line, she could feel those experiences were finally so close. When she approached the counter, the airline employee asked **to see** her passport. Maya reached into her pocket but felt nothing. She realized she had left her passport at home. Her plans were ruined. She was heartbroken, **knowing** she could not board the flight and had to delay her dream trip.

164) People often ask me, "What surprises you most about habits?" One thing that continually astonishes me is the degree **to which** we're influenced by sheer convenience. The amount of effort, time, or decision making required by an action **has** a huge influence on habit formation. To a truly remarkable extent, we're more likely to do something if it's convenient, and less likely if it's not. For this reason, we should pay close attention to the convenience of any activity we want to make into a habit. **Putting** a wastebasket next to our front door made mail sorting slightly more **convenient**, and I stopped procrastinating with this chore. Many people report **that** they do a much better job of staying close to distant family members now that tools like group chats make it easy to stay in touch.

165) It is common sense that people's inner beliefs may drive their external behavior. If you're **attracted** to a certain person, you should be more likely to socialize with that person. If you favor a brand of toothpaste, you're more likely to buy it. Of course, our internal thoughts don't **always** predict our public behavior, but, overall, what **we do** obviously reflects what we think. But beliefs and behaviors are also related in a more remarkable way. It turns out **that** the arrow is as likely to point in the reverse direction. As social psychologist David Myers observes, "If social psychology **has taught** us anything during the last 25 years, it is that we are likely not only to think ourselves into a way of acting but also **to act** ourselves into a way of thinking."

166) Imagine following the spirit of a silence vow into daily life. Challenge yourself to spend an entire day **saying** only **what** you absolutely must say. It's been widely observed by behavioral psychology experts — and anyone who's ever been on a first date — **that** we too often tend to treat "conversation" as a game of waiting for our own turn to speak. We miss what's being said because we're mentally rehearsing our next utterance. What if you could eliminate the idea **that** the next available mini-silence is your next opening to express **whatever** is in your head? What if you were limited to, say, fifty spoken words tomorrow? I think you'd listen quite differently. You'd attend quite carefully to every word you heard. You'd be attuned to **what** you must respond to. You might discover that the less you say, the more you hear.

167) Science is concerned with accumulating and understanding observations of the physical world. That understanding alone solves no problems. Individual people

have to act on that understanding for it to help solve problems. For instance, science has found **that** regular exercise can lower your risk of heart disease. Knowing this fact is interesting, but it will do nothing for your personal health unless you (**will 삭제**) act on it and actually exercise. And that's the hard part. Reading an article about exercise is easy. Getting into an actual routine of regular exercise **is** harder. In this sense, science really solves **no** problems at all. Problems are only solved when people take the knowledge provided by science and **use** it. In fact, many of humanity's biggest problems are caused by lack of action, and not lack of knowledge.

168) We think we're being logical, objective, and rational — and therefore accurate in our analysis, judgment, and decisions. So we think **that** if other people are logical, objective, and rational, they will agree with us and see **what** we see. But the opposite is the case. Every human brain is different. Everyone's life experience is different. Everyone's desires and knowledge are different. You might think you're being realistic — that is, that your ideas match reality, but that's impossible. It's only your interpretation of reality, **which** will always be different from someone else's. When two nations play each other in the World Cup, the fans of each country **criticize** the referees for missing all the infractions that the other team commits. Without fail, each fan base believes that the referees are biased against their team.

169) The graph above shows the online share of retail trade in selected European countries in 2018 and 2019. In 2019, the United Kingdom recorded the highest online share of retail trade, **reaching** 19.2 percent. The Netherlands showed the largest increase in its online share of retail trade among the countries from 2018 to 2019, with a jump of over 6 percentage points. In 2018, Germany had a higher online share of retail trade than the Netherlands, whereas, in 2019, Germany fell behind the Netherlands. In 2018, Germany's online share of retail trade was less than four times **that** of Spain. Among the five countries, Italy recorded the lowest online share of retail trade in both 2018 and 2019.

170) Edward O. Wilson was born in Birmingham, Alabama, in 1929. In his early childhood, he became **interested** in nature and spent much time in the outdoors. At age seven, he was partially blinded in a fishing accident; his reduced sight led Wilson to the study of ants. He could not observe larger animals from a distance. Instead, he concentrated on smaller creatures he could study up close. After studying evolutionary biology at the University of Alabama, Wilson transferred to Harvard University, **where** he became a professor in 1956. He never received a Nobel Prize — the prize didn't recognize research in the field of evolutionary biology. However, he **was awarded** the Crafoord Prize in 1990. Wilson, **known** to some as the "modern-day Darwin", died at the age of 92 in Massachusetts.

171) Houseplant Heaven Pop-up Shop

Enjoy a special plant shopping experience! Explore beautiful houseplants, and bring some green into your home.

When: October 11-13, 10 a.m. - 8 p.m.

Where: Tasty Cup Cafe

Details

- Indoor plants are available for purchase.
- If you (**will 삭제**) buy 2 plants, you will get a 50% discount on coffee.

Activities

- Take pictures in a photo zone **filled** with unique plants.
- Decorate eco-friendly pots **made** from recycled glass.

※ Outside food and drinks are not allowed.

172) 2025 Summer Cartoon Festival

It's the 8th annual Summer Cartoon Festival! The festival drew a lot of visitors last year. Why not be one of them this year?

Dates: July 5 - 6

Time: 9 a.m. - 6 p.m.

Place: Merryville Park

Featured Events

- Cartoon drawing classes for beginners only
- Face painting by cartoonists
- Parade of costumed characters

Notes

- All visitors will receive character stickers.
- For a more detailed timetable and other information, check out www.SummerCartoonFest.com.

173) Studies of experts provide insight into what it means to have deep and flexible understanding. Experts in a particular domain are people who have deep, richly interconnected ideas about the world. They are not just good thinkers or people who are exceptionally smart. Rather, experts have knowledge in a specific domain — such as chess, chemistry, or tennis — and are not generalists. However, experts do not just know “a bunch of facts.” In fact, having expertise in a topic means that knowledge is organized into coherent frameworks, and the expert understands the inter-relationship between facts and can distinguish which ideas are most central. This kind of deep but organized understanding allows for greater flexibility in learning and facilitates application across multiple contexts.

174) It is natural for people to observe happenings and then seek explanations for why those happenings occurred. But sometimes the reasoning is wrong because of one or more misconceptions. One of these is the *ecological fallacy*, where an argument claims that there is a causal relationship between two things merely because they occur together. For example, in the 1950s it was found that crime rates were the highest in neighborhoods where immigrants were most numerous. Some people used this “co-occurrence” to argue that immigrants were a cause of crime. But a careful analysis of this situation revealed that immigrants were forced to live in neighborhoods where crime rates were already high; they could not afford more expensive housing in safer neighborhoods. Immigrants themselves committed very few of the crimes. Unless you analyze the claim carefully, you would misinterpret the relationship and thereby construct a faulty belief.

175) In everyday life, we use previous experience to predict where we should pay attention. Different environments create different expectations. This was profoundly illustrated by the scientist Jared Diamond in his book *Guns, Germs, and Steel*. He describes an adventure wandering through the New Guinea jungle with native New Guineans. He relates that these natives tend to perform poorly at tasks (where 삭제) Westerners have been trained to do since childhood. But they are hardly stupid. They can detect the most subtle changes in the jungle, good for following the tracks of a predator or for finding the way back home. They know which insects to leave alone, know where food exists, can build and tear down shelters with ease. Diamond, who had never spent time in such places, has no ability to pay attention to these things. Were he to be tested on such tasks, he also would perform poorly.

176) Most entrepreneurs put in tremendous amounts of time and effort in creating and launching new products and

services and then make the mistake of overpricing them. They have created something they care deeply about, it's theirs, and this powerful sense of ownership distorts their perception of value which causes them to overprice their products. While many of them are quick to realize that their initial prices are too high, not all these people are happy or willing to drop their prices to make their products more attractive. And this can be a very costly mistake that may lead to the failure of their new business. When you launch a new product or service, your priority should be to get sufficient market adoption as soon as possible and you should be ready to sacrifice your initial prices and profits to achieve this aim. Once you have strong sales volumes, you can increase your prices to maximize your profits.

177) In most respects, humans are one of a relatively small number of species that evolved a very different strategy of investing more energy to reproduce more slowly. Like apes and elephants, we mature at a leisurely pace, grow large bodies, and have few babies but devote much time and energy to raising them well. This unusual strategy succeeds because while apes and elephants produce fewer babies than mice, a larger percentage of their offspring survive to then reproduce. A house mouse can become a mother when she is just five weeks old, has four to ten pups per litter, and can have a new litter every two months over the course of her approximately twelve-month life. However, the vast majority of her pups die young. In contrast, a chimp or elephant mother does not reproduce until she is at least twelve years old, and she gives birth to only one infant every five or six years over the next thirty or so years. About half of these offspring make it to becoming parents.

178) When scientists make an important new discovery or experimentally prove some hypothesis, they do not, in general, keep that information to themselves so that they alone can consider its meaning and derive additional theories from it. Instead, they publish their results and make their data available for inspection. This makes it possible for other scientists to reconsider their data and possibly refute their conclusions. More important, though, it makes it possible for other scientists to use that data to construct new hypotheses and perform new experiments. The assumption is that society as a whole will end up knowing more if information is spread as widely as possible, rather than being limited to a few people. In a strict sense, every scientist depends on the work of other scientists.

179) In the 1930s, the British psychologist Sir Frederic Bartlett asked people to listen to folktales from other countries and then recall these stories at a later date. As you might guess, unfamiliar stories were not remembered as well as familiar stories. Surprisingly, however, errors in memory were not random. Rather, subjects often rewrote similar parts of the stories in their own minds — particularly the parts that made the least sense to them. Bartlett concluded that when facing problems, humans draw upon mental schemata, or shelves of stored knowledge in our brains, to fill in any minor gaps in our memories. Therefore, remembering is an imaginative process that involves building upon past experiences.

180) History, people often say, repeats itself. And looking at the historical records of the ancient civilizations, some things do seem to happen again and again. Civilizations expand, get overextended, and then collapse as in the cases of Rome, which went under in 476 AD, and the British Empire, which fell apart more than a thousand years later in the post-World War II era. But is this always the case? If so, archaeology

would be pretty boring; one thing would happen again and again. But that's not **what** archaeologists see. Some civilizations end suddenly, like the Aztec and Inca, **conquered** by invaders in the 1520s AD. Those empires never had the chance to collapse as a result of overexpansion. So in the case of civilizations, "history repeats itself" seems to be an oversimplification.

181) Stanford psychology professor Dr. Carol Dweck is the internationally recognized pioneer of the concept of "growth mindset" as a way to continually grow, learn, and persevere in our efforts. Dweck found that kids who **are told** they're "smart" actually underperform in future tasks, by choosing easier tasks to avoid evidence **that** they are not smart, **which** Dweck calls having a "fixed mindset." In contrast, Dweck found, kids who are praised not for their smarts but for their effort develop **what** Dweck calls a "growth mindset." They learn that their effort is **what** led to their success, and if they continue to try, over time they'll improve and achieve more things. These kids end up **taking** on tougher things, and feel better about themselves. "Emphasizing effort gives a child a variable that they can control," Dweck has explained.

182) To monitor our surroundings is to focus on what's outside of ourselves: **what** we see, hear, smell, feel, and perhaps even taste. But sometimes **what** really marks a place is something less specific — a *feeling* within us. An interesting example emerged from a study of subway passenger behavior. Researchers **trying** to understand **why** people sit where they sit or stand where they stand in subway and metro trains examined the factors that shape the way riders used and navigated that space in different situations. One of their findings involved the reasons (**which** 삭제) many riders like to plant themselves close to the train's doors. Partly this was the obvious convenience of being able to exit more quickly. But it was shaped partly by a more abstract sensation — the desire to avoid the sometimes uncomfortable feeling of accidentally **making** eye contact with seated passengers. We can't see feelings — but they're very real, and they influence our experience of the world.

183) We have a 'diving reflex', like other marine mammals. This means that special nerve endings on our faces, around the mouth and nose, **trigger** this reflex only when the facial region goes under water. If we are in the water, with our head out in the air, there is no diving reflex. But if we sink just our face in a bowl of water, while the whole of the rest of our body is in the dry air, the diving reflex is triggered. It automatically closes down the airway, **reducing** the risk of swallowing water, and it narrows the small air-passages in the lungs. At the same time the heart rate is slowed down to half speed and blood is shunted to the vital organs, **protecting** them from the effects of the brief stop in breathing. By contrast, if a chimpanzee or a gorilla found **itself** in water with its face below the surface, it would panic, its heart would race and it would quickly drown.

184) There is a natural assumption of truth, or a truth bias when humans communicate with one another. In other words, when we're listening to others or reading their words, our automatic assumption is that the other person is telling the truth. This usually works out fine. If you ask someone where **the restroom is** located or if it's raining outside, you can safely assume that most people will not lie in their responses. Imagine how difficult **it would** be to converse with someone if you assumed that **everything** they were telling you **was** false! Indeed, questioning the truth of a statement and then choosing not to believe it requires additional mental steps.

For the most part, humans are "cognitive misers," **which** means we typically don't expend more mental effort than seems necessary in a given situation. It makes sense then, **that** when we see something online, even if it is fake, our default is to believe it, at least at first.

185) Paying with plastic fundamentally changes the way we spend money, **altering** the calculus of our financial decisions. When you buy something with cash, the purchase involves an actual loss — your wallet is literally lighter. Credit cards, however, make the purchase **abstract**, so that you don't really feel the downside of spending money. Brain-imaging experiments suggest that paying with credit cards actually reduces activity in the insula, a brain region **associated** with negative feelings. As George Loewenstein, a neuroeconomist at Carnegie Mellon, says, "The nature of credit cards ensures that your brain is anesthetized against the pain of payment." Spending money doesn't feel bad, so you spend more money. Consider this experiment: Drazen Prelec and Duncan Simester, two business professors at MIT, organized a real-life, sealed-bid auction for tickets to a Boston Celtics game. Half the participants in the auction **were** informed **that** they had to pay with cash; the other half **were told** they had to pay with credit cards. Prelec and Simester then averaged the bids for the two different groups. It turns out that the average credit card bid was **twice** as high as the average cash bid. When people used their credit cards, their bids were much more careless. They no longer felt the need to limit their expenses.

186) The sun shone in the cloudless sky as Becky, a retired teacher, **walked** to the fruit market. Across town, Dana was riding a bus towards the museum for a job interview. Just before reaching her stop, Dana noticed the sky had suddenly darkened. Her heart sank — she had no umbrella. As she stepped off the bus next to the market, **where** Becky had just finished shopping, raindrops began to fall.

Dana felt panic. She didn't want to show up to her interview soaked. She looked around but couldn't find any stores nearby to buy an umbrella, and she didn't have time to search around. Just then, Becky approached her, **holding** an open umbrella in one hand and a closed one in the other. "Take this," she said with a smile. Dana's eyes widened. "Are you sure?" Becky nodded. "I always carry an extra on rainy days."

Dana thanked her, took the umbrella, and opened it. She saw a small card tied to the handle. It read: "Cover each other." She was touched by the message. She hurried to the museum, arriving dry and comfortable, and **performed** well in her interview. The Museum CEO was impressed by Dana and offered her the Event Manager position, her dream job. Throughout the years ahead, she often thought back to Becky's kind gesture.

Inspired by the memory, Dana created a museum event called "Cover Each Other" with paintings of people **supporting** others. She donated half of the money from ticket sales to families who lost their homes to natural disasters. Dana kept Becky's message framed in her office as a reminder **that** one kind gesture could change someone's life. The kindness of one stranger had shaped her path, and she made sure it continued to shape the world.

187) ㉠ dog-friendly ㉡ enjoyable ㉢ separate ㉣ safety
