

WORKBOOK 괄호 안에서 옳은 어법과 어휘를 골라 보세요.

1. 큰 포유류의 초식동물 종은 포식자나 인간으로부터의 위협에 대해 다른 방식으로 반응한다.¹⁾
[Big / Small] mammalian [herbivore / carnivore] species react to danger from [predators / preys] or humans in [similar / different] ways.
2. 어떤 종들은 그들이 위협을 감지할 때 긴장하고, 빠르고, 즉각적인 비행을 하도록 프로그래밍되어 있다.²⁾
Some species are nervous, fast, and [programmed / programming] for [delayed / instant] flight when they [perceive / are perceived] a threat.
3. 다른 종들은 더 느리고, 덜 긴장하고, 무리 속에서 보호를 찾고, 위협을 받았을 때 그들의 자리를 지키고 필요할 때까지 도망가지 않는다.³⁾
Other species [is / are] slower, less nervous, [are sought / seek] protection in herds, [stand / stands] their ground when [threatening / threatened], and don't run until necessary.
4. 자연스럽게, 긴장하는 동물 종들은 갇힌 상태를 유지하기 어렵다.⁴⁾
Naturally, the [calm / nervous] species are [easy / difficult] to keep in captivity.
5. 만약 우리 안에 놓여지면, 그들은 패닉에 빠지게 될 가능성이 있고 충격으로 죽거나 탈출하려는 시도로 그들 자신을 반복적으로 울타리에 부딪혀 죽을 가능성이 있다.⁵⁾
If put into an enclosure, they are likely to panic, and either [dies / die] of shock [nor / or] hit [them / themselves] repeatedly to death against the fence in their attempts to [escape / be escaped].
6. 예를 들어, 이것은 가젤에 해당하는데 이들은 수천 년 동안 비옥한 초승달 지대의 일부 지역에서 가장 빈번하게 사냥된 사냥감 종이였다.⁶⁾
That's [false / true], for example, of gazelles, [in which / which] for thousands of years [were / was] the [least / most] frequently [hunted / hunting] game species in some parts of the Fertile Crescent.
7. 그 지역에 처음으로 정착한 인간들이 가젤보다 길들일 기회가 더 많았던 포유류는 없다.⁷⁾
There is no mammal species [that / what] the [first / last] settled peoples of that area had [less / more] opportunity to domesticate than gazelles.
8. 그러나 어떤 가젤 종도 지금까지 길들여진 적이 없다.⁸⁾
But no gazelle species has ever [been domesticated / domesticated].
9. 도망가고, 자신을 맹목적으로 벽에 부딪히고, 거의 30피트까지 뛰어오를 수 있고, 시속 50마일 속도로 달릴 수 있는 동물을 무리 지으려고 노력하는 것을 상상해봐라!⁹⁾
Just imagine [trying / to try] to herd an animal that [runs / run] away, blindly [hit / hits] [it / itself] against walls, can leap up to [nearly / near] 30 feet, and can run at a speed of 50 miles per hour!

WORKBOOK 괄호 안에서 옳은 어법과 어휘를 골라 보세요.

1. 자원이 제한적이고 위험이 컸던 시기에 태어난 종에게 있어, 자원이 풍부하고 외부의 위험이 거의 없을 때 나누고 협력하려는 우리의 타고난 성향은 복잡하다.¹⁾

For a species **[born / bearing]** in a time when resources were **[unlimited / limited]** and dangers were **[small / great]**, our natural tendency to share and cooperate **[is / are]** complicated when resources are plenty and outside dangers are **[little / few]**.

2. 우리가 더 적게 가질 때, 우리가 가진 것을 나누는 데 더 개방적이 되는 경향이 있다.²⁾

When we have **[more / less]**, we tend **[to be / being]** more open to sharing **[that / what]** we have.

3. 특정 유목 부족은 많은 것을 가지고 있지 않지만, 그렇게 하는 것이 그들의 이익에 부합하기 때문에 그들은 기꺼이 나누려고 한다.³⁾

Certain nomadic tribes don't have **[much / little]**, yet they are **[unhappy / happy]** to share **[because of / because]** it is in **[their / its]** interest to do so.

4. 만약 당신이 여행 중 그들을 우연히 만나면, 그들은 자신의 집을 열고 당신에게 음식과 환대를 제공할 것이다.⁴⁾

If you **[are happened / happen]** upon them in your travels, they **[open / will open]** up their homes and **[give / to give]** you their food and hospitality.

5. 이는 그들이 좋은 사람이어서만이 아니다. 이는 그들의 생존이 나누는 것에 달려 있기 때문인데, 왜냐하면 그들은 또 다른 날 그들이 음식과 거처가 필요한 여행자가 될 수 있음을 알기 때문이다.⁵⁾

It's not just **[because / why]** they are **[nice / mean]** people; it's **[because of / because]** their survival depends on sharing, for they know **[what / that]** they may be the travelers in need of food and shelter another **[day / days]**.

6. 아이러니하게도, 우리가 더 많이 가질수록, 우리의 울타리는 더 커지고, 사람들을 멀리 두기 위한 우리의 보안은 더 정교해지며, 우리는 더 적게 나누기를 원하게 된다.⁶⁾

Ironically, the **[most / more]** we have, the **[bigger / smaller]** our fences, the more sophisticated our security to keep people away and the **[more / less]** we want **[sharing / to share]**.

7. 우리의 더 많은 것에 대한 욕망은 '일반 대중'과의 줄어든 실제적인 상호작용과 결합되어서, 현실에 대한 단절이나 눈멀음을 만들어내기 시작한다.⁷⁾

Our desire for **[less / more]**, **[combined / combining]** with our **[reduced / improved]** physical interaction with the **"[uncommon / common]** folk," starts to create a **[disconnection / connection]** or blindness to reality.

WORKBOOK 괄호 안에서 옳은 어법과 어휘를 골라 보세요.

- 우리가 행복하거나 슬프거나, 만족스럽거나 불만족스러운 것은 좋은 일이 일어나면 행복하고, 나쁜 일이 일어나면 슬픈 것처럼 단지 삶의 경험의 각각의 개별적인 연속적인 순간에 의해 결정되지 않는다.¹⁾
Whether we feel happy or **[sad / sadly]**, content or discontent, **[is / are]** not determined merely by each individual **[successive / successful]** **[moment / moments]** of life experience — a good thing **[is happened / happens]** and I'm happy, a bad thing **[happens / is happened]** and I'm sad.
- 우리의 경험은 우리의 기분에 영향을 미치지만, 우리는 각 돌풍에 의해 완전히 새로운 방향으로 날아가지 않는다.²⁾
[Since / While] our experiences **[are affected / affect]** our mood, we are not **[blowing / blown]** in a completely new direction by each **[gust / gusts]** of wind.
- 인간으로서 우리는 좋을 뿐 아니라 나쁘기도 한 새로운 정보와 사건들에 적응하고 우리의 개인적인 기본 행복 수준으로 돌아간다.³⁾
As humans, we **[adjust / refuse]** — to **[new / old]** information and events both good **[or / and]** bad — and return to our personal default level of well-being.
- 기복은 있을 것이지만, 시간이 지나면서 고유한 수위를 찾는 물처럼 우리는 우리의 기준선으로 끌려가는데 즉, 나쁜 소식 후에는 다시 '올라'오고 좋은 소식 후에는 다시 '내려'온다.⁴⁾
There will be highs and lows, but over time, like water **[seeks / seeking]** its own level, we are **[pulled / pulling]** toward our baseline — back *up* after **[good / bad]** news and back *down* after **[good / bad]**.
- 첫사랑의 행복감은 사라지고, 결별의 절망도 그렇다.⁵⁾
The **[euphoria / depression]** of first love **[fades / fade]**, and so **[is / does]** the despair of a break-up.
- 이 경향은 어린 아이들과 그들의 장난감 기쁨에서 가장 잘 보여진다. 그들은 간절히 원하던 것을 얻을 때, 그들의 남은 인생동안 행복할 것이라고 믿는다.⁶⁾
This tendency is best **[seeing / seen]** with little kids and **[its / their]** toy joy: When they get **[what / that]** they've longed for, they believe they will be happy for **[rest / the rest]** of their lives.
- 그리고 그들의 남은 인생의 처음 몇 분 동안, 그들은 그렇다.⁷⁾
And for the **[last / first]** few minutes of the rest of their lives, they **[are / do]**.
- 하지만 그리고 나서 어른들처럼 아이들은 적응한다.⁸⁾
But then the kids — like adults — **[adapt / adopt]**.

WORKBOOK 괄호 안에서 옳은 어법과 어휘를 골라 보세요.

- 비록 당신은 하루에 더 많은 활동을 밀어 넣기 위해 잠자는 것을 미룰 수 있지만, 결국 당신의 수면에 대한 필요는 압도적이게 되고 잠을 잘 수 밖에 없게 된다.¹⁾
Although you may put off **[going / to go]** to sleep in order to squeeze **[more / less]** activities into your day, eventually your need for sleep becomes **[overwhelming / overwhelmed]** and you are forced **[to get / getting]** some sleep.
- 이러한 매일의 수면 욕구는 부분적으로 아데노신이라고 알려진 화합물 때문으로 보인다.²⁾
This daily drive for sleep **[appears / appear]** to be due, in part, to a compound **[known / knowing]** as adenosine.
- 이 자연 화학물질은 깨어 있는 시간이 증가할수록 당신의 혈액 속에 쌓인다.³⁾
This **[synthetic / natural]** chemical builds up in your blood as time awake **[increases / decreases]**.
- 당신이 자는 동안, 당신의 몸은 아데노신을 분해한다.⁴⁾
[During / While] you sleep, your body breaks down the adenosine.
- 따라서, 이 분자는 당신의 몸이 놓쳐버린 수면을 추적하고 필요할 때 수면을 유도하는 데 사용하는 것일지도 모른다.⁵⁾
Thus, this molecule may be **[what / that]** your body uses to keep track of **[lost / enough]** sleep and **[to trigger / triggering]** sleep when needed.
- 아데노신의 축적과 다른 요인들은 왜 당신이 최적의 수면량에 미치지 못한 며칠 밤 후에 평소보다 더 오래 잠으로써 당신이 보충해야 하는 수면 빚을 쌓는지를 설명할 수도 있다.⁶⁾
An accumulation of adenosine and other factors might **[be explained / explain]** why, after several nights of less than optimal amounts of sleep, you build up a sleep debt **[that / what]** you must make up by sleeping **[longer / shorter]** than normal.
- 이러한 내재된 분자적 피드백 때문에, 당신은 당신의 몸이 필요로 하는 것보다 적은 잠을 자는 것에 익숙해질 수 없다.⁷⁾
[Because / Because of] such built-in molecular feedback, you can't become accustomed to **[get / getting]** **[less / more]** sleep than your body needs.
- 결국 수면 부족은 당신을 따라잡는다.⁸⁾
Eventually, a lack of sleep **[catches / is caught]** up with you.

WORKBOOK 괄호 안에서 옳은 어법과 어휘를 골라 보세요.

- 대중이 불확실성을 이해하기 어렵게 만드는 것들 중 하나는 불확실성의 중요성이 상대적이라는 것이다.¹⁾
One of the **[thing / things]** that makes **[uncertainty / certainty]** difficult for members of the public **[to appreciate / appreciating]** **[are / is]** that the **[insignificance / significance]** of uncertainty is relative.
- 지구와 태양 사이의 거리, 즉 연중 한 지점에서 측정된 $1.49597 \times 10^8 \text{ km}$ 의 예를 들어보자.²⁾
[Taking / Take], for example, the distance between Earth **[and / or]** the sun: $1.49597 \times 10^8 \text{ km}$, as **[measured / measuring]** at one point during the year.
- 이것은 상대적으로 정확해 보이지만, 결국, 여섯 자리의 유효 숫자를 사용하는 것은 백만 분의 일 정도의 정확도로 그 거리를 알고 있다는 것을 의미한다.³⁾
This seems **[relative / relatively]** precise; after all, **[use / using]** six significant digits means I know the distance to an **[accuracy / inaccuracy]** of one part in a million or so.
- 하지만, 만약 다음 숫자가 불확실하다면, 그것은 지구와 태양의 정확한 거리를 아는 것에 있어서의 불확실성이 뉴욕과 시카고의 거리보다 더 크다는 것을 의미한다!⁴⁾
However, if the next digit is **[uncertain / certain]**, that means the uncertainty in knowing the **[imprecise / precise]** Earth-sun distance **[are / is]** larger than the distance between New York and Chicago!
- 따라서, 인용된 숫자가 '정확한지' 아닌지는 내가 그것으로 무엇을 하려고 하느냐에 따라 다르다.⁵⁾
[If / Whether] or not the quoted number **[are / is]** "precise" therefore **[depends / depend]** on **[which / what]** I'm intending to do with **[it / them]**.
- 만약 내가 내일 태양이 몇 분에 뜰지에만 관심이 있다면, 여기 인용된 숫자로 괜찮다.⁶⁾
If I care only about what minute the sun will **[rise / raise]** tomorrow, then the number **[quoted / quoting]** here **[are / is]** fine.
- 하지만 만약 내가 태양 바로 위에 궤도를 돌 위성을 보내고 싶다면, 나는 더 정확하게 거리를 알 필요가 있을 것이다.⁷⁾
If I want **[to send / sending]** a satellite to orbit just **[above / below]** the sun, however, then I would need to know distances more **[accurately / accurate]**.

WORKBOOK 괄호 안에서 옳은 어법과 어휘를 골라 보세요.

- 미국인 저널리스트인 Richard Heinberg는 지구 온난화를 막기 위해 재생 가능 에너지 기반 시설을 구축할 때, 우리는 실제로 인류 역사상 가장 큰 변화 프로젝트 중 하나에 관여하는 것이라고 주장한다.¹⁾
Richard Heinberg, an American journalist, argues **[what / that]** in building the renewable energy infrastructure to **[stop / start]** global warming, we are actually **[involved / involving]** in one of the **[greater / greatest]** change **[project / projects]** in human history.
- 태양광 패널과 풍력 터빈에 더하여 우리는 대체 교통 기반 시설, 농업 절차 그리고 산업 프로세스를 구축해야 한다.²⁾
[In addition to / In addition] solar panels and wind turbines, we have to **[build / be built]** an alternative transport infrastructure, farming procedures and **[industrial / industrious]** processes.
- 이 변화는 화석 연료 없이는 일어날 수 없다.³⁾
This transformation cannot **[be happened / happen]** without fossil fuels.
- 예를 들어, 콘크리트 구조물과 강철 요소의 생산은 화석 에너지로만 생산가능한 에너지의 양을 필요로 한다.⁴⁾
For instance, production of concrete structures and steel elements require **[amounts / numbers]** of energy **[what / that]** is only **[possible / impossible]** to produce with fossil energy.
- 태양광 패널의 생산은 발굴되어야 하는 희귀하고 값비싼 광물들을 필요로 하며, 이는 또한 화석 연료 사용을 필요로 한다.⁵⁾
Production of solar panels **[requires / is required]** **[common / scarce]** and expensive minerals **[where / which]** must **[excavate / be excavated]**, again **[requiring / required]** the use of fossil fuels.
- 따라서, 우리가 재생 가능 에너지 시스템을 향하여 더 세게 밀고 나아갈수록, 더 빠르게 우리는 건설 과정에서 화석 에너지를 사용해야 한다.⁶⁾
Thus, the **[harder / hard]** we push towards a renewable energy system, the **[faster / fastest]** we have to **[be used / use]** fossil energy for the construction process.
- 이는 단지 비용이 많이 들 뿐만 아니라, 전세계적 배기가스를 줄이려는 우리의 노력을 훼손하는 요인이 된다.⁷⁾
This is not only **[inexpensive / expensive]**, **[but / and]** also a(n) **[supporting / undermining]** factor for our efforts to cut global emissions.
- Heinberg는 이러한 새로운 에너지 기반 시설을 구축하는 비용이 전환 제안에서 거의 계산되지 않는다고 언급하는데, 이는 에너지 공급 요구 사항에만 집중하는 경향이 있다.⁸⁾
Heinberg remarks **[that / what]** the cost of building this new energy infrastructure **[is / are]** seldom counted in transition proposals, **[that / which]** tend to focus just on energy **[supply / demand]** requirements.

WORKBOOK 괄호 안에서 옳은 어법과 어휘를 골라 보세요.

1. 인간은 수 세기 동안 지능적이게 될 수 있고 인간과 같은 결정을 내릴 수 있는 기계를 꿈꿔왔다.¹⁾
Humans for centuries have **[been dreamed / dreamed]** of machines **[that / what]** could become intelligent and **[makes / make]** human-like decisions.
2. 고대 그리스 이래로 로봇, 자동 장치, 인공 생명체에 대한 신화가 존재해 왔다. (예를 들면, 세상에 불행을 퍼뜨린 Pandora의 신화).²⁾
There **[has / have]** been myths about robots, automatons, and artificial beings since ancient Greece (e.g., the myth of Pandora, **[which / who]** released ills upon the world).
3. 마찬가지로, 역사를 통틀어 문학은 인간과 같은 생명체와 사고하는 기계를 창조하는 꿈을 꾀왔다. (예를 들면, Mary Shelley의 '프랑켄슈타인').³⁾
Likewise, **[literature / literacy]** throughout history **[have / has]** dreamed of **[creating / destroying]** human-like creatures and thinking machines (e.g., Mary Shelley's *Frankenstein*).
4. 1950년, 영국의 수학자 Alan Turing은 기계가 인간처럼 사고하고 추론할 수 있는지 물었고, 그 다음에 기계의 지능과 기계가 자율적으로 사고할 수 있는지를 측정하기 위해 튜링 테스트를 개발했다.⁴⁾
In 1950, British mathematician Alan Turing asked whether machines could think and **[reason / reasons]** like humans and then **[was developed / developed]** the Turing test to measure a machine's **[intelligence / intelligent]** and whether the machines can think **[autonomously / dependently]**.
5. 몇 년 후, MIT 교수 John McCarthy는 이전에 사용된 '자동 장치 연구'라는 표현을 대체해 '인공지능'이라는 표현을 만들어냈다.⁵⁾
A **[little / few]** years later, MIT professor John McCarthy coined "artificial intelligence," **[replacing / replaced]** the **[previous / previously]** used expression "automata studies."
6. 그 이후로, 인공지능은 인간처럼 사고하도록 프로그램화된 즉, 그들의 창조자들에 의해 추론과 학습 능력을 부여받은 '지능적인 기계 만들기'에 대한 연구와 실행이 되었다.⁶⁾
Since then, artificial intelligence has become the study and practice of "making intelligent machines" that **[are / is]** programmed to think like **[humans / robots]** — **[endowed / endowing]** by their creators with reasoning and **[being learned / learning]**.

WORKBOOK 괄호 안에서 옳은 어법과 어휘를 골라 보세요.

- 사막거북은 Death Valley의 극심한 더위를 극복하기 위해 간단한 해결책을 가지고 있는데 그것은 더위를 피하는 것이다.¹⁾
The desert tortoise has a **[simple / complex]** solution for coping with Death Valley's extreme **[cold / heat]**. It avoids **[them / it]**.
- 그 느리게 움직이는 생명체는 겨울에는 동면하고 대부분의 여름에는 그것의 굴 속에서 보내는데 이는 그 생의 90퍼센트 이상을 움직이지 않은 채로 보낸다는 것을 의미한다.²⁾
The **[fast / slow]**-moving creature hibernates **[during / for]** the winter and **[stays / stay]** in its tunnel for much of the summer, **[mean / meaning]** that it spends more than 90 percent of its life **[immobile / mobile]**.
- 사실, 거북은 보통 충분한 비가 온 후에만 밖으로 나온다.³⁾
In fact, the tortoise usually only **[surfaces / surface]** after a good rain.
- 그 다음에 그것은 활동을 시작한다.⁴⁾
Then, it **[gets / is got]** to work.
- 거북은 식물을 먹고, 빗물을 모으기 위한 구멍을 팜으로써 물을 비축한다.⁵⁾
The tortoise stocks up on water by eating plants and **[digging / to dig]** holes to **[collect / lose]** rain.
- 하지만 그것의 장기간에 걸친 동면 동안 수분이 공급된 채로 지내기 위해, 이 파충류는 다른 것에 의존한다. 즉, 그것의 매우 정교한 방광이다.⁶⁾
But to stay **[supplying / supplied]** with water through its **[extended / expended]** hibernation, the reptile relies on something else — its **[highly / high]** **[unsophisticated / sophisticated]** bladder.
- 대부분의 동물과 달리, 거북의 방광은 보관 탱크로서의 역할을 하며, 그것이 그것의 몸으로 물을 다시 흡수할 수 있게 한다.⁷⁾
[Like / Unlike] most animals, the tortoise's bladder acts as a holding tank, **[allowing / allowed]** it **[reabsorbing / to reabsorb]** water back into its body.
- 놀랍게도, 사막거북은 1년 내내 담수를 전혀 섭취하지 않고도 살아갈 수 있다.⁸⁾
Incredibly, a desert tortoise can go a full year **[with / without]** taking in any freshwater at all.

9. 그리고 그것의 방광이 거북의 생존에 매우 중요하기 때문에, 공원 순찰대원들은 종종 방문객들에게 멈추어 그 느리게 움직이는 것을 도로를 건너도록 도와주지 않을 것을 상기시킨다.⁹⁾

And **[because / because of]** its bladder is so **[unimportant / important]** to a tortoise's survival, park rangers often **[reminds / remind]** visitors not to stop and **[helping / help]** the slow-movers across the road.

10. 거북은 사람들이 그들을 들어 올릴 때 너무 겁을 먹어 그들의 방광을 비워버리고, 소중한 저장된 물을 잃게 된다.¹⁰⁾

Tortoises become so **[terrifying / terrified]** when people pick **[it / them]** up that they **[fill / empty]** their bladders, **[lost / losing]** their precious water reserves.

WORKBOOK 괄호 안에서 옳은 어법과 어휘를 골라 보세요.

- 자전거 페달을 수평의 도로에서 밟고 있다고 상상해 보아라.¹⁾
[Imagine / Imagining] you are pedalling your bicycle on a [sloping / level] road.
- 당신은 페달을 밟는 것을 멈추고 당신을 앞으로 나아가게 하는 어떠한 힘도 이제 작용하지 않는다.²⁾
You stop [pedalling / to pedal]: no force is now acting to move you [forward / backward].
- 그러면 어떻게 될까? 당신은 서서히 느려진다.³⁾
What happens? You [immediately / gradually] slow down.
- 당신은 더 짧은 거리 안에서 더 갑자기 속도를 줄이려면 어떻게 해야 할까? 브레이크를 작동시키면 된다.⁴⁾
How could you [slow down / speed up] more suddenly, in a [shorter / longer] distance? By putting the brakes on.
- 브레이크는 당신의 움직임을 변화시켜 당신을 더 갑자기 느려지게 하기 때문에, 그것들이 바퀴 테두리를 잡고 닿으면서 자전거와 당신에게 힘을 가하고 있어야 한다.⁵⁾
[Because of / Because] the brakes change your movement, [made / making] you [slow / to slow] down more suddenly, they must be [exhausting / exerting] a force on the bicycle and you, as they grip and [rubs / rub] on the wheel-rims.
- 이것이 마찰력이라고 불리는 힘이며, 그리고 그 힘은 움직임의 반대 방향, 즉 뒤쪽으로 작용함으로써 움직이는 물체를 느리게 하는 경향이 있다.⁶⁾
This is the force [called / calling] friction, [which / that] [tends / tend] to slow down moving things by acting in the direction opposite to movement, that is [forward / backwards].
- 심지어 브레이크를 작동시키지 않아도 당신과 당신의 자전거에 작용하는 다른 마찰력이 존재하며, 이것은 또한 당신을 느리게 한다.⁷⁾
Even without the brakes on, there [is / are] other friction forces [acting / act] on you and your bicycle, [that / which] also [slows / slow] you down.
- 이들 중 하나는 축에 닿는 바퀴의 마찰이다.⁸⁾
One of these [is / are] friction in the wheels [rubbing / rub] on the axles.

9. 또 다른 하나는 당신과 자전거가 앞으로 움직일 때 당신을 뒤쪽으로 미는 공기 저항으로 이는 당신이 느낄 수 있다.⁹⁾

Another is air resistance, **[which / where]** you can feel, **[pushing / push]** you backwards as you and the bicycle move **[upward / forwards]**.

10. 카트와 같은 당신 주변에 있는 어떤 것에 이러한 개념을 적용하면, 주로 회전하면서 본체에 닿는 축들과 같이, 당신은 무엇이 마찰력을 발생시킬 수 있을지 알 수 있다.¹⁰⁾

When you apply these ideas to something around you, like a cart, you can see **[what / that]** could be **[generated / generating]** friction: mainly the axles rubbing on the body as they rotate.

WORKBOOK 괄호 안에서 옳은 어법과 어휘를 골라 보세요.

- 모든 편집 시스템은 이제 어떤 비디오 화면이나 장면을 찾기 위해 빨리 감거나 빨리 되감기를 할 필요 없이 어떤 비디오 샷이나 장면으로의 임의적 접근을 가능하게 하는 비선형 컴퓨터 기반 시스템이다.¹⁾
All editing systems are now **[nonlinear / linear]** computer-based systems **[that / what]** **[allow / allows]** random access to any video shot or scene without having to fast forward or fast reverse to **[be found / find]** it.
- 비선형 시스템은 슬로 모션, 와이프 그리고 디졸브 같은 다양한 특수 효과를 만들 수 있다.²⁾
Nonlinear systems can **[be created / create]** a range of special effects, such as slow motion, wipes and dissolves.
- 디지털 비선형 시스템의 또 다른 주요 특징은 편집자가 비디오테이프를 빨리 감거나 되감는데 시간을 들일 필요 없이 원하는 샷이나 장면을 찾는 것을 쉽게 해주는 그것의 임의적 접근 과정이다.³⁾
Another **[highlights / highlight]** of a digital nonlinear system **[are / is]** its random access process that **[make / makes]** it easy for an editor **[finding / to find]** desired shots or scenes without having to spend time fast forwarding or **[to rewind / rewinding]** videotape.
- 비선형 편집으로는 샷이나 장면을 프로그램의 어디에나 쉽게 추가하거나 삭제할 수 있으며, 컴퓨터는 프로그램의 길이를 자동으로 조정한다.⁴⁾
With nonlinear editing, shots or scenes can be easily added or **[removing / removed]** anywhere in the program, and the computer **[adjusts / admires]** the program length automatically.
- 선형 편집은 타자기로 글을 작성하는 것과 같았다.⁵⁾
[Linear / Nonlinear] editing was like composing a paper on a typewriter.
- 만약 실수가 생겼거나 새로운 정보가 추가되어야 할 필요가 있다면, 전체를 다시 작성해야 했다.⁶⁾
If a mistake **[was made / made]** or new information needed to **[be added / add]** the whole piece had to be retyped.
- 비선형 편집은, 반면, 워드 프로세싱 프로그램을 사용하는 것과 같다.⁷⁾
Nonlinear editing, on the other hand, **[is / are]** like using a word processing program.
- 만약 실수가 생기면 그것은 몇 번의 키 입력으로 쉽게 삭제되고 수정될 수 있으며, 새로운 정보가 쉽게 추가될 수 있다.⁸⁾
If a mistake is **[making / made]**, it is easily deleted and **[fixed / fixing]** with a **[few / little]** keystrokes, and new information can **[be added / add]** easily.

WORKBOOK 괄호 안에서 옳은 어법과 어휘를 골라 보세요.

- 도덕적으로 선한 사람은 대부분의 사람들보다 도덕적으로 나쁜 행동을 훨씬 덜 자주 하고, 도덕적으로 선한 행동을 훨씬 더 자주 하는 사람이다.¹⁾
A morally good person is one who **[do / does]** morally bad actions significantly **[less / more]** often than most and **[does / do]** morally good ones significantly more often than most.
- 사람을 판단할 때는 그녀의 행동뿐 아니라 그녀의 의도와 동기 또한 관련이 있다.²⁾
In judging a person not only her actions **[and / but]** also her intentions and motives **[are / is]** **[irrelevant / relevant]**.
- 도덕적으로 선한 사람은 도덕적으로 선한 행동을 하려고 의도해야 하고, 도덕적으로 나쁜 행동은 피하려고 의도해야 한다.³⁾
A **[immorally / morally]** good person must intend to do morally good actions and **[intends / intend]** to avoid morally bad **[one / ones]**.
- 다른 사람에게 해를 의도하지 않게 예방하고 단지 그녀가 의도한대로 일이 일어나지 않았기 때문에 그들에게 해를 끼치지 않은 사람은 도덕적으로 선하지 않다.⁴⁾
A person **[who / whom]** unintentionally **[prevents / prevent]** harm to **[other / others]** and **[do / does]** not harm them simply because things do not turn out as she intends is not morally **[good / bad]**.
- 이런 종류의 상황은 일반적으로 슬랩스틱 영화에서만 발생하지만, 그녀가 도덕적으로 선하거나 나쁜지 판단되는 것에 중요한 것은 한 사람의 행동의 실제 결과라는 잘못된 인상을 피하기 위해 언급할 가치가 있다.⁵⁾
Although this kind of situation generally **[occurs / occur]** only in slapstick movies, it is worth **[to mention / mentioning]** to avoid the **[true / false]** impression **[which / that]** it is the actual consequences of a person's actions **[what / that]** count toward her **[having / being]** judged morally good or bad.
- 하지만 실제 결과는 중요하다.⁶⁾
But **[actually / actual]** consequences are important.
- 항상 해를 예방하려고 하지만 결코 그렇게 하지 못하는 사람은 일반적으로 도덕적으로 선하다고 생각되지 않는다.⁷⁾
A person who always **[try / tries]** to prevent harm but never **[do / does]**, **[are / is]** not generally thought of as **[moral / morally]** good.
- 그런 사람에 대해, 그녀가 선한 의도를 가지고 있다고 말할 수 있지만, Kant와 달리, 그녀가 도덕적으로 선하다고 간주되기 전에 어떤 결과가 필요하다.⁸⁾
Of such a person, **[that / it]** may be said that she means well; but, contrary to Kant, some results are **[necessary / unnecessary]** before she **[is regarded / regards]** as morally good.

WORKBOOK 괄호 안에서 옳은 어법과 어휘를 골라 보세요.

1. 시각은 현실에 대한 우리의 선입견에 의해 영향을 받는다.¹⁾

Vision **[is influenced / influences]** by our preconceptions about **[reality / fantasy]**.

2. 한 장면을 볼 때, 우리는 우리의 사물과의 기능적 관계와 우리의 순간적인 우선순위를 반영하는 무의식적인 위계를 확립한다.²⁾

In viewing a scene, we establish **[unconscious / conscious]** hierarchies that **[reflects / reflect]** our functional relationship to objects and our momentary priorities.

3. 예를 들어, 우리 마음의 눈으로 망치를 시각화할 때, 우리는 망치를 옆모습이나 '사용 준비 완료' 각도에서 '보는' 경향이 있다.³⁾

For example, when **[visualizing / visualized]** a hammer in our mind's eye, we tend to "see" it in profile or at some other "ready for use" angle.

4. 손잡이가 망치 머리에 가려지도록 망치가 위에서 보여진 모습으로 아마 시각화하지 않을 것이다.⁴⁾

One would probably not visualize a hammer as **[seen / seeing]** from the top so that the handle **[is hidden / hides]** by the hammer's head.

5. 우리가 가진 사물과의 기능적인 관계는 '카메라처럼' 보는 우리의 능력을 방해하는 시각적 기대를 만든다.⁵⁾

The functional relationship we have with objects **[create / creates]** **[auditory / visual]** expectations that **[interferes / interfere]** with our ability to see "like a camera."

6. 카메라는 인간의 눈처럼 오직 형태와 색깔만을 본다.⁶⁾

The camera, like the human eye, **[is seen / sees]** only shapes and colors.

7. 그것은 눈과 비슷한 렌즈를 통해 세상을 공평하게 기록한다.⁷⁾

It documents the world **[partially / impartially]** through a lens **[what / that]** is similar to the eye.

8. 우리가 사진들을 주의 깊게 들여다볼 때, 그것들은 혼란을 주는 세부 사항들을 해석하는 것이 아니라 기계적인 무관심으로 우리에게 그것들을 단순히 제공해주기 때문에 종종 놀랍다.⁸⁾

When we look at them carefully, photographs are often **[surprising / surprised]** **[because / because of]** they don't interpret **[confused / confusing]** details but simply serve them up to us with a mechanical **[indifference / difference]**.

9. 그리고 그것들의 평면성 때문에 사진들은 종종 알아보기 어려운 색과 형태들로 보이는 영역을 포함한다.⁹⁾

And **[because / because of]** their flatness, photographs often contain areas that **[are appeared / appear]** as **[unrecognizable / recognizable]** colors and shapes.

10. 우리의 시각적 인식은 기능적 관계에 기반한 확립된 위계에 의해 형성되며, 이는 카메라의 객관적인 시각과는 달리 사물을 있는 그대로 보는 능력을 방해한다.¹⁰⁾

Our visual perception **[is shaped / shapes]** by an **[establishing / established]** hierarchy based on functional relationships, **[which / that]** interrupts our ability to see objects as they truly are, unlike the **[objective / subjective]** perspective of a camera.

WORKBOOK 괄호 안에서 옳은 어법과 어휘를 골라 보세요.

1. “도와드릴까요?”는 고객이 말을 하도록 하지 않고, 그들이 방어적이게 하기 때문에 소매 판매원이 말할 수 있는 최악의 네 단어이다.¹⁾
 “May I help you?” are the **[best / worst]** four words **[that / what]** a retail salesperson can utter **[because / because of]** they don't encourage the customer **[talking / to talk]** and put them on the **[defensive / offensive]**.
2. 그 네 단어는 판매 거래를 완전히 막는 부정적인 반응을 주로 끌어낸다.²⁾
 The four words usually draw out a **[negative / positive]** response that **[stop / stops]** cold a sales transaction.
3. 고객에게 다가갈 때 사용할 수 있는 더 나은 질문들의 예들로는 “특별히 당신이 찾고 계신 어떤 것이 있나요?”와 “당신은 선물을 위한 쇼핑을 하고 있나요?”가 있다.³⁾
 Examples of **[better / worse]** questions to use when **[approaching / approaching to]** customers **[is / are]** “Is there anything in particular **[what / that]** you are looking for?” and “Are you shopping for a gift?”
4. 만약 패션 판매원이 “도와드릴까요?”로 당신에게 다가온다면, 당신은 그 판매원이 신경 쓰지 않는다고 느낄 가능성이 있다.⁴⁾
 If a fashion salesperson **[approached to / approached]** you with “May I help you?” chances are you would feel the salesperson didn't care.
5. 이 문장은 훈련되지 않고 무관심한 판매원들에 의해 매우 지나치게 사용되는 기계적인 접근 방식이다.⁵⁾
 This line is a rote approach that **[is / are]** so overused by **[trained / untrained]** and **[disinterested / uninterested]** salespeople.
6. 실제로, 우리 대부분은 이 단어들을 들을 때 기겁하여 몸서리친다.⁶⁾
 In fact, **[mostly / most]** of us shudder in **[horror / delight]** on hearing these words.
7. “도와드릴까요?”라는 이 질문의 진짜 의미는 고객이 어떤 종류의 곤경에 처해 있고 구출될 필요가 있다는 것을 내포한다.⁷⁾
 The very meaning of the question “May I help you?” **[implies / imply]** that the customer is in **[trouble / danger]** of some sort and **[needs / need]** rescuing.

WORKBOOK 밑줄 친 부분 중 어법상 어색한 것을 세 개 찾아 알맞게 고쳐 쓰세요.1)

Big mammalian herbivore species react to danger from predators or humans in different ways. Some species are nervous, fast, and programmed for instant flight when they perceive a threat. Other species are slower, less nervous, seek protection in herds, stands their ground when threatened, and don't run until necessary. Naturally, the nervous species are difficult to keep in captivity. If put into an enclosure, they are likely to panic, and either die of shock or hit themselves repeatedly to death against the fence in their attempts to escape. That's true, for example, of gazelles, which for thousands of years was the most frequently hunted game species in some parts of the Fertile Crescent. There is no mammal species that the first settled peoples of that area had more opportunity to domesticate than gazelles. But no gazelle species has ever domesticated. Just imagine trying to herd an animal that runs away, blindly hits itself against walls, can leap up to nearly 30 feet, and can run at a speed of 50 miles per hour!

For a species born in a time when resources were limited and dangers were great, our natural tendency to share and cooperate are complicated when resources are plenty and outside dangers are few. When we have less, we tend to be more open to sharing that we have. Certain nomadic tribes don't have much, yet they are happy to share because it is in their interest to do so. If you will happen upon them in your travels, they will open up their homes and give you their food and hospitality. It's not just because they are nice people; it's because their survival depends on sharing, for they know that they may be the travelers in need of food and shelter another day. Ironically, the more we have, the bigger our fences, the more sophisticated our security to keep people away and the less we want to share. Our desire for more, combined with our reduced physical interaction with the "common folk," starts to create a disconnection or blindness to reality.

Whether we feel happy or sad, content or discontent, are not determined merely by each individual successive moment of life experience — a good thing happens and I'm happy, a bad thing happens and I'm sad. While our experiences affect our mood, we are not blown in a completely new direction by each gust of wind. As humans, we adjust — to new information and events both good and bad — and returns to our personal default level of well-being. There will be highs and lows, but over time, like water seeking its own level, we are pulled toward our baseline — back *up* after bad news and back *down* after good. The euphoria of first love fades, and so is the despair of a break-up. This tendency is best seen with little kids and their toy joy: When they get what they've longed for, they believe they will be happy for the rest of their lives. And for the first few minutes of the rest of their lives, they are. But then the kids — like adults — adapt.

WORKBOOK 밑줄 친 부분 중 어법상 어색한 것을 세 개 찾아 알맞게 고쳐 쓰세요.¹⁾

Although you may put off going to sleep in order to squeeze more activities into your day, eventually your need for sleep becomes overwhelming and you are forced getting some sleep. This daily drive for sleep appears to be due, in part, to a compound known as adenosine. This natural chemical builds up in your blood as time awake increases. While you sleep, your body breaks down the adenosine. Thus, this molecule may be that your body uses to keep track of lost sleep and to trigger sleep when needed. An accumulation of adenosine and other factors might explain why, after several nights of less than optimal amounts of sleep, you build up a sleep debt that you must make up by sleeping longer than normal. Because of such built-in molecular feedback, you can't become accustomed to get less sleep than your body needs. Eventually, a lack of sleep catches up with you.

One of the things that makes uncertainty difficult for members of the public to appreciate are that the significance of uncertainty is relative. Take, for example, the distance between Earth and the sun: 1.49597×10^8 km, as measured at one point during the year. This seems relatively precise; after all, using six significant digits means I know the distance to an accuracy of one part in a million or so. However, if the next digit is uncertain, that means the uncertainty in knowing the precise Earth-sun distance are larger than the distance between New York and Chicago! Whether or not the quoted number is "precise" therefore depend on what I'm intending to do with it. If I care only about what minute the sun will rise tomorrow, then the number quoted here is fine. If I want to send a satellite to orbit just above the sun, however, then I would need to know distances more accurately.

Richard Heinberg, an American journalist, argues that in building the renewable energy infrastructure to stop global warming, we are actually involved in one of the greatest change projects in human history. In addition to solar panels and wind turbines, we have to build an alternative transport infrastructure, farming procedures and industrial processes. This transformation cannot be happened without fossil fuels. For instance, production of concrete structures and steel elements require amounts of energy that is only possible to produce with fossil energy. Production of solar panels requires scarce and expensive minerals which must be excavated, again requiring the use of fossil fuels. Thus, the harder we push towards a renewable energy system, the fastest we have to use fossil energy for the construction process. This is not only expensive, but also an undermining factor for our efforts to cut global emissions. Heinberg remarks that the cost of building this new energy infrastructure is seldom counted in transition proposals, that tend to focus just on energy supply requirements.

Humans for centuries have dreamed of machines that could become intelligent and make human-like decisions. There have been myths about robots, automatons, and artificial beings since ancient Greece (e.g., the myth of Pandora, who released ills upon the world). Likewise, literature throughout history has dreamed of creating human-like creatures and thinking machines (e.g., Mary Shelley's *Frankenstein*). In 1950, British mathematician Alan Turing asked whether machines could think and reason like humans and then developed the Turing test to measure a machine's intelligence and whether the machines can think autonomously. A few years later, MIT professor John McCarthy coined "artificial intelligence," replaced the previously used expression "automata studies." Since then, artificial intelligence has become the study and practice of "making intelligent machines" that is programmed to think like humans — endowing by their creators with reasoning and learning.

The desert tortoise has a simple solution for coping with Death Valley's extreme heat: It avoids it. The slow-moving creature hibernates during the winter and stays in its tunnel for much of the summer, meant that it spends more than 90 percent of its life immobile. In fact, the tortoise usually only surfaces after a good rain. Then, it gets to work. The tortoise stocks up on water by eating plants and digging holes to collect rain. But to stay supplied with water through its extended hibernation, the reptile relies on something else — its highly sophisticated bladder. Unlike most animals, the tortoise's bladder acts as a holding tank, allowing it reabsorbing water back into its body. Incredibly, a desert tortoise can go a full year without taking in any freshwater at all. And because its bladder is so important to a tortoise's survival, park rangers often remind visitors not to stop and help the slow-movers across the road. Tortoises become so terrifying when people pick them up that they empty their bladders, losing their precious water reserves.

WORKBOOK 밑줄 친 부분 중 어법상 어색한 것을 세 개 찾아 알맞게 고쳐 쓰세요.1)

Imagine you are pedalling your bicycle on a level road. You stop pedalling: no force is now acting to move you forward. What happens? You gradually slow down. How could you slow down more suddenly, in a shorter distance? By putting the brakes on. Because the brakes change your movement, making you to slow down more suddenly, they must be exerting a force on the bicycle and you, as they grip and rub on the wheel-rims. This is the force called friction, which tend to slow down moving things by acting in the direction opposite to movement, that is backwards. Even without the brakes on, there are other friction forces acting on you and your bicycle, that also slow you down. One of these is friction in the wheels rubbing on the axles. Another is air resistance, which you can feel, pushing you backwards as you and the bicycle move forwards. When you apply these ideas to something around you, like a cart, you can see what could be generating friction: mainly the axles rubbing on the body as they rotate.

WORKBOOK 밑줄 친 부분 중 어법상 어색한 것을 세 개 찾아 알맞게 고쳐 쓰세요.1)

All editing systems are now nonlinear computer-based systems that allows random access to any video shot or scene without having to fast forward or fast reverse to find it. Nonlinear systems can create a range of special effects, such as slow motion, wipes and dissolves. Another highlight of a digital nonlinear system is its random access process that makes it easy for an editor finding desired shots or scenes without having to spend time fast forwarding or rewinding videotape. With nonlinear editing, shots or scenes can be easily added or removed anywhere in the program, and the computer adjusts the program length automatically. Linear editing was like composing a paper on a typewriter. If a mistake was made or new information needed to be added the whole piece had to be retyped. Nonlinear editing, on the other hand, are like using a word processing program. If a mistake is made, it is easily deleted and fixed with a few keystrokes, and new information can be added easily.

WORKBOOK 밑줄 친 부분 중 어법상 어색한 것을 세 개 찾아 알맞게 고쳐 쓰세요.¹⁾

A morally good person is one who does morally bad actions significantly less often than most and does morally good ones significantly more often than most. In judging a person not only her actions but also her intentions and motives is relevant. A morally good person must intend to do morally good actions and intends to avoid morally bad ones. A person who unintentionally prevents harm to others and does not harm them simply because things do not turn out as she intends is not morally good. Although this kind of situation generally occurs only in slapstick movies, it is worth mentioning to avoid the false impression which it is the actual consequences of a person's actions that count toward her being judged morally good or bad. But actual consequences are important. A person who always tries to prevent harm but never does, is not generally thought of as morally good. Of such a person, it may be said that she means well; but, contrary to Kant, some results are necessary before she is regarded as morally good.

WORKBOOK 밑줄 친 부분 중 어법상 어색한 것을 세 개 찾아 알맞게 고쳐 쓰세요.1)

Vision is influenced by our preconceptions about reality. In viewing a scene, we establish unconscious hierarchies that reflect our functional relationship to objects and our momentary priorities. For example, when visualizing a hammer in our mind's eye, we tend to "see" it in profile or at some other "ready for use" angle. One would probably not visualize a hammer as seen from the top so that the handle is hidden by the hammer's head. The functional relationship we have with objects creates visual expectations that interfere with our ability to see "like a camera." The camera, like the human eye, sees only shapes and colors. It documents the world impartially through a lens that is similar to the eye. When we look at them carefully, photographs are often surprised because they don't interpret confusing details but simply serve them up to us with a mechanical indifference. And because of their flatness, photographs often contain areas that are appeared as unrecognizable colors and shapes.

[요약문] Our visual perception is shaped by an established hierarchy based on functional relationships, which interrupt our ability to see objects as they truly are, unlike the objective perspective of a camera.

1) (1) Examples of better questions to use when approaching customers is "Is there anything in particular that you are looking for?" → Examples of better questions to use when approaching customers are "Is there anything in particular that you are looking for?"

(2) The subconscious thought by the customer is often "I'm smart enough to figure out that I want, and I don't need your help" → The subconscious thought by the customer is often "I'm smart enough to figure out what I want, and I don't need your help"

(3) that makes customers to feel there is no rush → that makes customers feel there is no rush

43~45번

1) (1) yet forced being a part of it → yet forced to be a part of it

(2) and nervously glanced back at his table which other students in his class were sitting → and nervously glanced back at his table where other students in his

class were sitting

(3) He calmly explained how did the machine often have trouble accepting dollar bills → He calmly explained how the machine often had trouble accepting dollar bills

WORKBOOK 다음 문단을 흐름상 알맞게 배열해 보세요.1)

- (A) There is no mammal species that the first settled peoples of that area had more opportunity to domesticate than gazelles. But no gazelle species has ever been domesticated. Just imagine trying to herd an animal that runs away, blindly hits itself against walls, can leap up to nearly 30 feet, and can run at a speed of 50 miles per hour!
- (B) Big mammalian herbivore species react to danger from predators or humans in different ways. Some species are nervous, fast, and programmed for instant flight when they perceive a threat. Other species are slower, less nervous, seek protection in herds, stand their ground when threatened, and don't run until necessary. Naturally, the nervous species are difficult to keep in captivity.
- (C) If put into an enclosure, they are likely to panic, and either die of shock or hit themselves repeatedly to death against the fence in their attempts to escape. That's true, for example, of gazelles, which for thousands of years were the most frequently hunted game species in some parts of the Fertile Crescent.

WORKBOOK 다음 문단을 흐름상 알맞게 배열해 보세요.1)

- (A) Ironically, the more we have, the bigger our fences, the more sophisticated our security to keep people away and the less we want to share. Our desire for more, combined with our reduced physical interaction with the "common folk," starts to create a disconnection or blindness to reality.
- (B) For a species born in a time when resources were limited and dangers were great, our natural tendency to share and cooperate is complicated when resources are plenty and outside dangers are few. When we have less, we tend to be more open to sharing what we have. Certain nomadic tribes don't have much, yet they are happy to share because it is in their interest to do so.
- (C) If you happen upon them in your travels, they will open up their homes and give you their food and hospitality. It's not just because they are nice people; it's because their survival depends on sharing, for they know that they may be the travelers in need of food and shelter another day.

WORKBOOK 다음 문단을 흐름상 알맞게 배열해 보세요.1)

- (A) As humans, we adjust — to new information and events both good and bad — and return to our personal default level of well-being. There will be highs and lows, but over time, like water seeking its own level, we are pulled toward our baseline — back *up* after bad news and back *down* after good. The euphoria of first love fades, and so does the despair of a break-up.
- (B) Whether we feel happy or sad, content or discontent, is not determined merely by each individual successive moment of life experience — a good thing happens and I'm happy, a bad thing happens and I'm sad. While our experiences affect our mood, we are not blown in a completely new direction by each gust of wind.
- (C) This tendency is best seen with little kids and their toy joy: When they get what they've longed for, they believe they will be happy for the rest of their lives. And for the first few minutes of the rest of their lives, they are. But then the kids — like adults — adapt.

_____ → _____ → _____

WORKBOOK 다음 문단을 흐름상 알맞게 배열해 보세요.1)

- (A) This natural chemical builds up in your blood as time awake increases. While you sleep, your body breaks down the adenosine. Thus, this molecule may be what your body uses to keep track of lost sleep and to trigger sleep when needed.
- (B) Although you may put off going to sleep in order to squeeze more activities into your day, eventually your need for sleep becomes overwhelming and you are forced to get some sleep. This daily drive for sleep appears to be due, in part, to a compound known as adenosine.
- (C) An accumulation of adenosine and other factors might explain why, after several nights of less than optimal amounts of sleep, you build up a sleep debt that you must make up by sleeping longer than normal. Because of such built-in molecular feedback, you can't become accustomed to getting less sleep than your body needs. Eventually, a lack of sleep catches up with you.

WORKBOOK 다음 문단을 흐름상 알맞게 배열해 보세요.1)

- (A) If I care only about what minute the sun will rise tomorrow, then the number quoted here is fine. If I want to send a satellite to orbit just above the sun, however, then I would need to know distances more accurately.
- (B) One of the things that makes uncertainty difficult for members of the public to appreciate is that the significance of uncertainty is relative. Take, for example, the distance between Earth and the sun: 1.49597×10^8 km, as measured at one point during the year. This seems relatively precise; after all, using six significant digits means I know the distance to an accuracy of one part in a million or so.
- (C) However, if the next digit is uncertain, that means the uncertainty in knowing the precise Earth-sun distance is larger than the distance between New York and Chicago! Whether or not the quoted number is "precise" therefore depends on what I'm intending to do with it.

_____ → _____ → _____

WORKBOOK 다음 문단을 흐름상 알맞게 배열해 보세요.1)

- (A) This is not only expensive, but also an undermining factor for our efforts to cut global emissions. Heinberg remarks that the cost of building this new energy infrastructure is seldom counted in transition proposals, which tend to focus just on energy supply requirements.
- (B) For instance, production of concrete structures and steel elements require amounts of energy that is only possible to produce with fossil energy. Production of solar panels requires scarce and expensive minerals which must be excavated, again requiring the use of fossil fuels. Thus, the harder we push towards a renewable energy system, the faster we have to use fossil energy for the construction process.
- (C) Richard Heinberg, an American journalist, argues that in building the renewable energy infrastructure to stop global warming, we are actually involved in one of the greatest change projects in human history. In addition to solar panels and wind turbines, we have to build an alternative transport infrastructure, farming procedures and industrial processes. This transformation cannot happen without fossil fuels.

WORKBOOK 다음 문단을 흐름상 알맞게 배열해 보세요.1)

- (A) Likewise, literature throughout history has dreamed of creating human-like creatures and thinking machines (e.g., Mary Shelley's *Frankenstein*). In 1950, British mathematician Alan Turing asked whether machines could think and reason like humans and then developed the Turing test to measure a machine's intelligence and whether the machines can think autonomously.
- (B) Humans for centuries have dreamed of machines that could become intelligent and make human-like decisions. There have been myths about robots, automatons, and artificial beings since ancient Greece (e.g., the myth of Pandora, who released ills upon the world).
- (C) A few years later, MIT professor John McCarthy coined "artificial intelligence," replacing the previously used expression "automata studies." Since then, artificial intelligence has become the study and practice of "making intelligent machines" that are programmed to think like humans — endowed by their creators with reasoning and learning.

WORKBOOK 다음 문단을 흐름상 알맞게 배열해 보세요.1)

- (A) Then, it gets to work. The tortoise stocks up on water by eating plants and digging holes to collect rain. But to stay supplied with water through its extended hibernation, the reptile relies on something else — its highly sophisticated bladder. Unlike most animals, the tortoise's bladder acts as a holding tank, allowing it to reabsorb water back into its body. Incredibly, a desert tortoise can go a full year without taking in any freshwater at all.
- (B) And because its bladder is so important to a tortoise's survival, park rangers often remind visitors not to stop and help the slow-movers across the road. Tortoises become so terrified when people pick them up that they empty their bladders, losing their precious water reserves.
- (C) The desert tortoise has a simple solution for coping with Death Valley's extreme heat: It avoids it. The slow-moving creature hibernates during the winter and stays in its tunnel for much of the summer, meaning that it spends more than 90 percent of its life immobile. In fact, the tortoise usually only surfaces after a good rain.

WORKBOOK 다음 문단을 흐름상 알맞게 배열해 보세요.1)

- (A) Another is air resistance, which you can feel, pushing you backwards as you and the bicycle move forwards. When you apply these ideas to something around you, like a cart, you can see what could be generating friction: mainly the axles rubbing on the body as they rotate.
- (B) This is the force called friction, which tends to slow down moving things by acting in the direction opposite to movement, that is backwards. Even without the brakes on, there are other friction forces acting on you and your bicycle, which also slow you down. One of these is friction in the wheels rubbing on the axles.
- (C) Imagine you are pedalling your bicycle on a level road. You stop pedalling: no force is now acting to move you forward. What happens? You gradually slow down. How could you slow down more suddenly, in a shorter distance? By putting the brakes on. Because the brakes change your movement, making you slow down more suddenly, they must be exerting a force on the bicycle and you, as they grip and rub on the wheel-rims.

WORKBOOK 다음 문단을 흐름상 알맞게 배열해 보세요.1)

- (A) Another highlight of a digital nonlinear system is its random access process that makes it easy for an editor to find desired shots or scenes without having to spend time fast forwarding or rewinding videotape. With nonlinear editing, shots or scenes can be easily added or removed anywhere in the program, and the computer adjusts the program length automatically. Linear editing was like composing a paper on a typewriter.
- (B) If a mistake was made or new information needed to be added the whole piece had to be retyped. Nonlinear editing, on the other hand, is like using a word processing program. If a mistake is made, it is easily deleted and fixed with a few keystrokes, and new information can be added easily.
- (C) All editing systems are now nonlinear computer-based systems that allow random access to any video shot or scene without having to fast forward or fast reverse to find it. Nonlinear systems can create a range of special effects, such as slow motion, wipes and dissolves.

WORKBOOK 다음 문단을 흐름상 알맞게 배열해 보세요.1)

- (A) Although this kind of situation generally occurs only in slapstick movies, it is worth mentioning to avoid the false impression that it is the actual consequences of a person's actions that count toward her being judged morally good or bad.
- (B) But actual consequences are important. A person who always tries to prevent harm but never does, is not generally thought of as morally good. Of such a person, it may be said that she means well; but, contrary to Kant, some results are necessary before she is regarded as morally good.
- (C) A morally good person is one who does morally bad actions significantly less often than most and does morally good ones significantly more often than most. In judging a person not only her actions but also her intentions and motives are relevant. A morally good person must intend to do morally good actions and intend to avoid morally bad ones. A person who unintentionally prevents harm to others and does not harm them simply because things do not turn out as she intends is not morally good.

_____ → _____ → _____

WORKBOOK 다음 문단을 흐름상 알맞게 배열해 보세요.1)

- (A) When we look at them carefully, photographs are often surprising because they don't interpret confusing details but simply serve them up to us with a mechanical indifference. And because of their flatness, photographs often contain areas that appear as unrecognizable colors and shapes.
- (B) Vision is influenced by our preconceptions about reality. In viewing a scene, we establish unconscious hierarchies that reflect our functional relationship to objects and our momentary priorities. For example, when visualizing a hammer in our mind's eye, we tend to "see" it in profile or at some other "ready for use" angle.
- (C) One would probably not visualize a hammer as seen from the top so that the handle is hidden by the hammer's head. The functional relationship we have with objects creates visual expectations that interfere with our ability to see "like a camera." The camera, like the human eye, sees only shapes and colors. It documents the world impartially through a lens that is similar to the eye.
